Safety and comfort redefined

Whether in the assembly hall or on the production line, indoors or outdoors: uvex 2 trend safety footwear range is suitable for medium applications (S1-S3) and incorporates numerous proven technologies at an affordable price.

The uvex anti-twist heel cap for increased stability to prevent ankle twisting and the high-quality outsole materials combined with a sporty look and bold colours make this footwear appealing to wear.

The result:
maximum comfort and reliable safety.

uvex 2 trend – add a splash of colour to your day

Reliable protection against twisting

The innovative uvex anti-twist heel cap gives the foot extra support to avoid painful twisting.

First-class wearer comfort

The midsole follows the lines of the arch, making the safety shoes especially comfortable to wear.

Laced in no time

Boa® Fit System engineered to optimise fit and provide precision, adaptability, and control. (on selected S1 models)

Safe slip resistance

The ergonomic design of the outsole supports the natural rolling motion of the foot. The new outsole profiles offer the best grip on almost any surface.

uvex 2 trend – robust, resistant, safe

Robust lacing system

The lacing system of the S3 version is dirt-resistant, smooth-running and heat-resistant.

Sturdy scuffcap

The directly moulded PU scuffcap on the S3 version reliably protects the upper against wear, especially during tasks that require kneeling.

Sporty design

Contemporary colours and a long, flexible lacing area give the uvex 2 trend range a sporty look and a high degree of wearer acceptance.

Greater visibility

Reflective elements provide greater visibility – and therefore safety – even in poor light conditions.

Pleasant foot climate

The breathable, chrome-free microvelour material ensures a pleasant foot climate at all times, even during prolonged periods of use.

uvex 2 trend – modern and versatile

Comfort features:

- ideal foot climate constantly maintained due to uvex climazone: highly breathable lining and upper, and comfortable climatic insole with moisture transport system
- soft, comfortable fit with no pressure points – with soft padding on the collar and a padded tongue
- removable antistatic comfortable insole, with a moisture transport system and additional shock absorption around the heel and forefoot
- orthopaedic solutions in accordance with German DGVU 112-191 and Austrian ÖNORM Z1259

General features:

- sporty S1 safety footwear range with a wide fit
- double, individually adjustable counter-traction hook and loop straps (S1 P models)
- dirt-resistant, smooth-running and heat-resistant lacing system (S3 models)
- upper over the toe cap is protected by the foamed scuffcap (S3 models)
- all sole materials are free of silicones, plasticisers and other paint wetting impairment substances

Protection features:

- meets the ESD specifications with volume resistance under 35 megaohms
- reliable protection for the wearer and material: penetration-resistant steel midsole (S3 models), steel toe cap and stabilising uvex anti-twist heel cap to prevent ankle twisting
- ergonomically designed outsole made from dual density polyurethane with excellent slip resistance
- reflective elements for better visibility

Areas of application:

- medium applications
