protecting people

uvex-sportstyle-rx.com

protecting people since 1926

uvex protects people – when at work, when playing sport and when relaxing. With innovative products, we are setting new standards year after year.

We are constantly developing revolutionary technologies to reliably protect people – whether they are in the saddle, teeing off, exploring nature or working on the production line.

uvex safety and uvex sports are leading suppliers in their respective disciplines, with both brands forming an unbeatable team that pursues a clear, common goal: reaching the winners podium.

**wherever
your vision
counts**

A full-page background image showing a mountain biker in a blue jersey and helmet riding down a steep, rocky trail in a forest. The biker is in a crouched position, navigating a challenging descent. The trail is composed of dirt and rocks, with mossy logs and trees visible in the background. The lighting is natural, suggesting a sunny day with some shadows.

uvex sportstyle RX frames are equipped with high definition (HD) prescription lenses with the latest freeform technology. The lenses are made of polycarbonate or Trivex to guarantee the best possible protection for a wide variety of sports. The collection includes full-rim frames with direct glazing and rimless frames for indirect glazing with the innovative uvex clipnetic technology. Advanced eye protection for every face shape – from narrow to wide. For maximum safety, visual comfort, and superior flexibility.

wherever you perform

See more. Accomplish more. Experience more. In sport or in daily life. In the city or in nature. In any weather. High-quality materials, innovative technologies and the latest safety standards make uvex prescription sports glasses the perfect accessory anywhere, any time. Optimal protection. 365 days a year. Any time of day. Wherever the road takes you.

uvex colorvision®

uvex colorvision®

Through forests or down city streets.
On an e-scooter or road bike. Brake lights or
the sun setting. The uvex colorvision® lens
technology is designed specifically to meet
the visual requirements and light conditions of
different environments and sports.

uvex colorvision®

The four colorvision® filters – urban, daily,
nature and outdoor – ensure optimal contrast
and brilliant colours.

uvex colorvision variomatic®

A perfect match: uvex variomatic® meets
uvex colorvision technology. Each lens comes
with automatic lens tint and optimal contrast
enhancement to create the perfect visual
experience.

Note: The lenses are available with various glazing options. See marking.

direct glazing

uvex sportstyle RXd

The highly curved frame design gives a good fit and provides optimal protection against wind and airborne particles. For the glazing of the wrap-around style frames, we use HD lenses made from extremely impact-resistant plastic materials and with the corresponding base curve. To ensure an unrestricted field of vision, the angle of inclination in front of the eye is also taken into account when calculating the prescription data. The lenses are then custom made with the resultant compensatory values. Further individual parameters such as vertex distance, pantoscopic tilt and head/body position during sporting activity may be taken and directly incorporated into the lens.

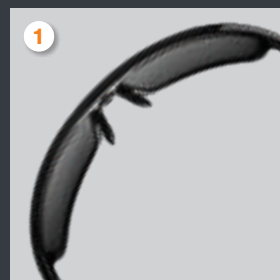

Please ensure all relevant measurements are provided when ordering.

direct glazing

uvex sportstyle RXd 4003

Uncompromising protection, sharp vision right to the edge, and a cool style – the uvex sportstyle RXd 4003 combines everything that sports glasses need. Due to the advanced customization options, these glasses provide a perfect fit for all sports, while the black shiny/pink color combination also gives a modern, feminine look. The combination of the red mirror lenses, made of break-resistant polycarbonate, and the lightweight, adaptable comfort frame in black/pink is the ultimate in sport chic.

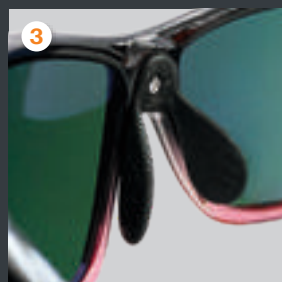

Wrap-around style

The 8-base frame curve adapts to the wearer's head shape and provides perfect protection against airborne particles and wind.

Direct glazing

The glazing uses the latest freeform technology to ensure sharp and comfortable vision in all areas of view.

Comfort

The non-slip, flexible nose pads guarantee a perfect fit at all times.

uvex colorvision®

uvex sportstyle RXd 4006

The robust frames of the uvex sportstyle RXd 4006 with direct lens ventilation offer outstanding protection for a wide range of activities. The soft nose pads and ear-pieces are comfortable and lightweight and fit any head shape. uvex colorvision® lenses (col. 1200 and 1241) provide ultimate contrast and colour enhancement. uvex variomatic® lenses (col. 1426) provide the perfect tint in all light conditions in an instant.

indirect glazing

uvex sportstyle RXi

The revolutionary clipnetic technology (patent pending) allows fast and easy magnetic fitting of prescription lenses into the uvex sportstyle RX frames. The prescription lens can be fitted and removed with just one hand, which makes cleaning the glasses and the prescription lenses easy. The uvex RXi models come with a removable nose bridge. This allows the glasses to be used with prescription lenses or contact lenses.

indirect glazing

uvex sportstyle RXi 4102

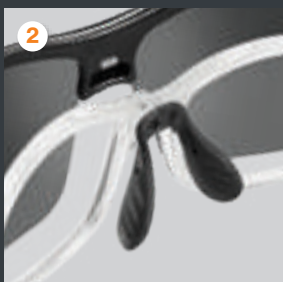

A clear view, whatever the weather. With the interchangeable lens technology, the uvex sportstyle RXi 4102 is equipped for all weather conditions. It offers 100 % UVA, UVB, and UVC protection as well as optimal sun glare protection. The nose bridge can be quickly and easily removed to accommodate the prescription lens. And the direct lens ventilation ensures prolonged anti-fog performance.

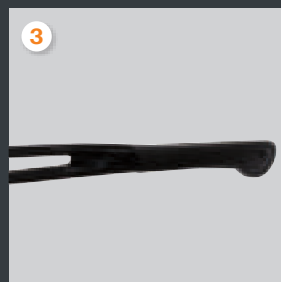

Replacement lenses

Thanks to the innovative interchangeable lens technology, the dark lenses in filter category 3 can easily be exchanged for bright, contrast-enhancing lenses in filter category 1.

uvex clipnetic technology

The revolutionary, patent-pending uvex clipnetic technology allows quick and easy removal of the nose bridge to accommodate a prescription lens.

Secure fit

The soft, non-slip arm tips are easily customizable and ensure optimum grip, wherever you ride or run.

indirect glazing

uvex sportstyle RXi 4104

The uvex sportstyle RXi 4104 are incredibly lightweight with outstanding functionality. The half-rim design offers a large field of vision. The side arms can be adjusted to any angle to guarantee an optimal fit for the wearer. With interchangeable uvex colorvision® lenses (col. 1200 9052), the wearer will experience a new dimension of colour brilliance and contrast. uvex clipnetic technology makes it quick and easy to switch the nose bridge to the perfect corrective insert.

Protection

“Protecting people” is our mission. We develop and produce products that protect the user – during work, sports, and leisure. We use only the best materials, which are continuously tested in our own laboratories to ensure they exceed the required standards.

Technology

Innovative technologies, such as the patent-pending uvex clipnetic technology, which allows a prescription lens to be fitted, and the uvex “anatomic” sports glazing, are used on all uvex sportstyle RX models. For maximum comfort and quality of vision – without compromise!

Performance

With our “anatomic” sports glazing, we take into account a variety of parameters as well as the individual posture adopted during specific sports. It is this attention to detail that helps the athlete to sustain or even increase their performance. True to the motto “focus on your performance”, the wearer can fully concentrate on their sport – we’ll do the rest.

Quality

The promise of quality is one of our core values. For the uvex sportstyle RX collection, only high-quality materials are used. These materials have proven themselves time and time again through their use in our prescription safety glasses. We vouch for this with our name: highly visible on every frame, discreet and inconspicuous on every lens.

Individual fit

uvex has been developing and producing eyewear for different head shapes and uses for 90 years. The fit of the frame can be altered with the adjustable nose pieces, sprung metal hinges, and non-slip arm tips. The use of HD prescription lenses makes the uvex sportstyle RX an individually unique product for the wearer.

Competence

uvex has accumulated over 90 years of development expertise for frames and lenses. In our development centers, our opticians work hand in hand with our designers on state-of-the-art CAD systems to make ideas become reality. Collaboration with first-class lens manufacturers results in high-end products.

uvex i-performance

performance system

uvex i-PERFORMANCE combines decades of experience with innovative technologies to provide advanced eye protection and promote increased individual performance. Focus on your performance – we'll take care of the rest.

tech summary

uvex colorvision®

The four innovative colorvision® color filters of the uvex lenses provide unique contrast enhancement and perfect vision – with a lens for every situation.

- Ultimate contrast enhancement
- Maximized color perception
- 100% UVA, UVB, UVC protection up to 400 nm

uvex colorvision® color filter

uvex variomatic®

Eyewear with uvex variomatic® automatically reacts to the natural light conditions. They achieve a tint of approx. 20-92% (cat. 1-3).

- Automatic self-tinting
- 100% UVA, UVB, UVC protection up to 400 nm
- From light to dark in 25 seconds
- Three filter categories in one lens (cat. 1-3)

Automatic tinting

uvex polavision®

Reliable protection against sun glare and reflections. Lenses with uvex polavision® absorb diffuse light and thus protect against eye strain.

- Polarizing lenses for reduced reflection
- Reduction of diffuse light and sun glare
- For a comfortable viewing experience

Reduced reflection

UV blue

The lenses absorb UV radiation up to 400 nm at 100% and filter short-wave blue light up to 410 nm almost entirely. uvex UV blue lenses enhance contrast and effectively prevent signs of fatigue.

- 100% UVA, UVB and UVC protection up to 400 nm
- Contrast enhancement
- Fatigue-free vision for all requirements

uvex colorvision® variomatic®
uvex variomatic® meets uvex colorvision® technology: lens tinting and contrast enhancement in one innovative uvex lens. Made for sports activities in any weather and any environment.

Curve 8
The curved design conforms to the natural shape of the head and fits more snugly at the sides for improved comfort and security.

Decentered lenses
Distortions and curvatures in the field of vision can quickly become annoying. uvex uses grade 1 decentered lenses to ensure a distortion-free view.

Direct lens ventilation
The uvex climate management system delivers permanent, draft-free ventilation. It also ensures that the field of vision remains fog-free for twice as long as the norm requires.

UV blue
The UV blue lenses ensure high contrast and fatigue-free vision. 100% UV filtering up to and including 400 nm.

Interchangeable lenses
The interchangeable lenses guarantee uncomplicated handling and perfect visibility in all weather conditions.

Robust and scratch-resistant
Made of extremely durable polycarbonate, the lenses can withstand temperatures of –40° C without compromising their breaking strength. A special, protective coating in

conformance with the EN ISO 12312-1: 2013 + A1: 2015 (D) standard makes the lenses scratch-resistant without causing any vision impairment.

Soft nose pads and arm tips
You know your eyewear fits perfectly when you can't feel you're wearing it. Soft nose pads and arm tips ensure pressure-free comfort.

The soft arm tips are cold-formable on all models. So it's easy to achieve the perfect fit.

uvex inclination
The side arm inclination allows you to adjust the angle and adapt the glasses to fit any facial shape.

UV protection
UV absorbers integrated directly into the raw material filter harmful UVA, UVB, and UVC radiation up to 400 nm to protect the retina.

**one
brand.**

**one
mission.**

**one
vision.**

uvex products protect people – during work, sports, and leisure. uvex partners with top-class international sport, equipping more than 1,000 elite athletes worldwide.

The know-how transfer between uvex safety and uvex sports makes our products even safer, more functional, and more comfortable. The two product divisions benefit from this mutual cooperation. This was also highlighted in the Challenge Roth, the world's largest long-distance triathlon competition, when uvex safety equipped the construction team and uvex sports equipped the athletes. A brilliant example of successful teamwork!
