protecting people

**uvex 1 x-craft**  
the next level **technologies**

**work zone**

The PU scuffcap combined with a durable upper protects the forefoot area and ensures durability.

**PUtek**

PU-coated polyester fibres are woven into an extremely abrasion-resistant and flexible material. PUtek is twice as tear-resistant as microfibre.

**clima zone**

Special materials and a functional design ensure that they are comfortable to wear over long periods. In particular, the perforated tongue design makes breathability visible and noticeable.

**ripstop**

The material, commonly used in the outdoor recreation industry, is breathable and very light. Ripstop is 50% more tear-resistant than microfibre.

the next level **ergonomics**

**flex zone**

The flex groove integrated in the midsole increases flexibility when bending the forefoot and improves comfort, especially during tasks that require kneeling.

**i-PUREnrj planet**

The innovative PU midsole material redefines cushioning and energy return, reducing fatigue. It consists of 15% recycled PU from our in-house production processes.

**bionom x**

Ergonomic design based on biomechanical principles supports natural movement.

**x-tended grip planet**

The TPU outsole with up to 10% recycled PU granulate increases abrasion resistance and provides grip on smooth and wet floors.

## x-dry knit planet

The breathable and water-repellent knitted upper prevents sweating and keeps feet dry. The material consists of 100% recycled PET bottles.

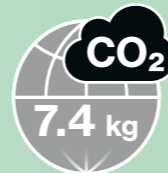

## uvex 1 x-craft planet

With a midsole, upper and outsole made from recycled and bio-based materials, the uvex 1 x-craft planet takes safety and sustainability to a new level. In accordance with DIN EN ISO 14021:2016, the uvex 1 x-craft planet **consists of 30% recycled material**, making it an ideal work shoe for anyone who also values sustainability in their personal protective equipment.

- EN ISO 20345:2022 standard: S1 PL FO SC SR (shoe)
- Upper: textile (x-dry knit planet, up to 100% recycled)
- Midsole: PU (up to 15% recycled)
- Outsole: TPU (up to 10% recycled)
- Size range: 35-52
- Multiple widths: 10, 11 and 12

## uvex profi pure HydroGrip

Unrivalled grip in wet conditions. The innovative Hydro-Grip special polymer coating sets a completely new benchmark. This waterproof glove offers increased grip in wet and damp working conditions, both indoors and outdoors. Thanks to the cotton fibre on the inside of the glove, your skin will also stay dry all day long. In addition, the uvex profi pure HG is produced at our carbon-neutral site in Germany, is proDERM®-certified and therefore offers the maximum level of health protection.

**H/G** Hydro Grip

- safety glove with uvex Hydro-Grip technology
- outstanding grip in wet working conditions
- heat protection up to 100°C
- excellent wearer comfort thanks to the high moisture absorption of the cotton lining
- dermatologically tested, free from allergenic accelerators
- certified according to OEKO-TEX® Standard 100 (S02-0648 HOHENSTEIN HTTI)
- ergonomic fit
- highly flexible
- good tactile feel

## grip. fit. vented. uvex pheos nxt

The uvex pheos nxt combines a classic sporty design with comfort, lightness and optimum protection. The special design of the side arms is not just visually impressive: the directional structure ensures extremely good grip – even for demanding work. Numerous cut-outs in the side arms improve air circulation and make the spectacles lightweight without sacrificing strength. In addition, the large panoramic lens offers a wide, distortion-free field of vision to provide a clear, comfortable view. The uvex pheos nxt is an appealing all-rounder and ideal companion for a wide range of working conditions.
