uvex

# Hard work. Easy going.

The uvex 3 has been specially developed for the extreme demands faced in heavy applications. It combines necessary robustness with a sporty and dynamic design. Equipped with the latest uvex technologies, the uvex 3 reliably protects the wearer while providing high levels of comfort.

# Science. Not Fiction.

## uvex i-PUREnrj Technology

Cushioning. Stability. Energy Return.

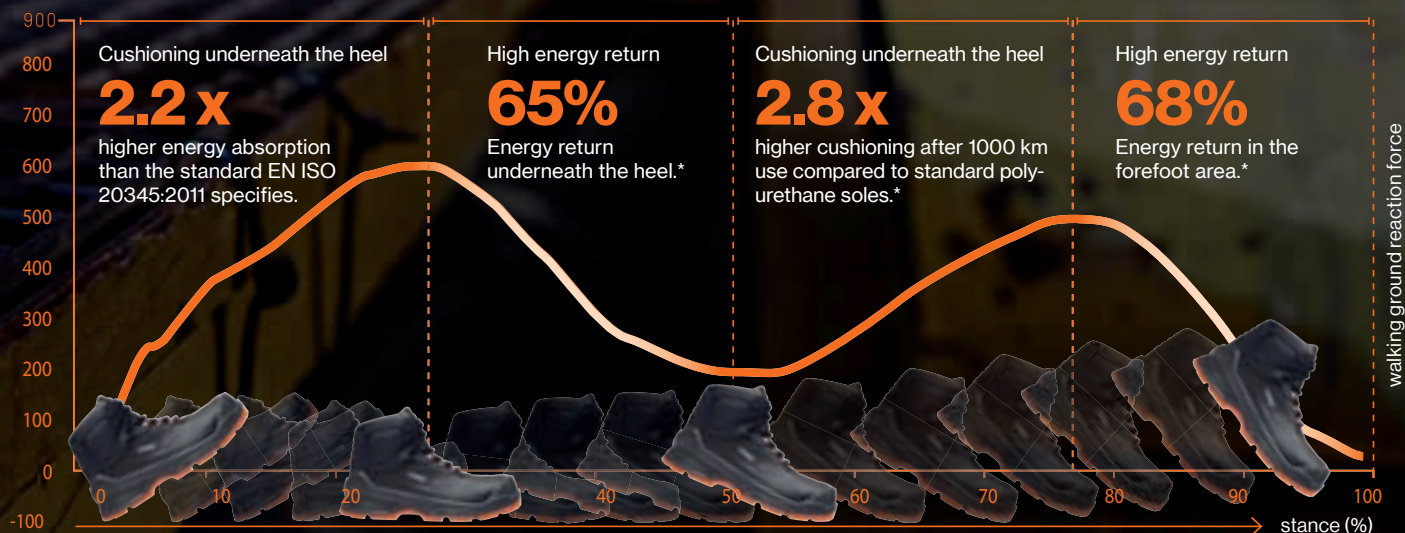

### uvex i-PUREnrj technology

uvex's innovative new polyurethane sole technology – uvex i-PUREnrj – returns the landing energy over the entire sole unit back to the wearer, redefining shock absorption and stability. The sole of the uvex 3 features a special anti-fatigue effect thanks to 68% energy return in the forefoot area, 65% energy return underneath the heel and the high shock absorption level of 44 joules.

More stability. Reduced risk of injuries.  
More safety.

Excellent stability and secure fit in the shoe due to foamed heel basket and adapted density of the uvex i-PUREnrj technology. Reduces risk of injury from twisting through bending over.

\* Marked mentioned results reported in: Test report N°: L210304422\_1CTC Lyon, 04/07/2021

#### Sustainability – recycled insole

The uvex 3 is sustainably produced and is free from harmful substances according to our restricted substances list. What's more, the insole is made of 100% recycled fibres and foam.

#### Extraordinary sensitivity

A high degree of sensitivity and the flexibility of the sole are especially important when operating machines controlled by foot.

#### uvex waterstop technology

uvex waterstop technology reliably protects against water penetration for four times longer than required by the standard.

**bionom x**  
**clima zone**

Orthopaedic solutions in accordance with German DGUV 112-191\* and Austrian ONORM Z1259

**uvex lace lock**  
Optimised lacing for increased stability with locking lace hooks.

**uvex anklepro**  
Provides excellent protection against painful impacts in the ankle area.

**uvex bionom x**  
The uvex bionom x principle is an approach to creating new products that combines the essential biomechanical functions of the body with the functions of the footwear, thus creating a harmonious unit consisting of body, footwear and environment. Only when our body achieves its maximum performance level can it protect us from injury in the best possible way. uvex bionom x was developed in collaboration with our biomechanics expert Dr Caleb Wegener from the uvex safety group in Australia.
