Safety Eyewear
uvex supravision THS

Core Coatings

- **uvex supravision sapphire**
  Coated lenses are extremely scratch resistant on both sides and offer excellent resistance to chemicals. The coating system, which has been enhanced using nanotechnology, offers significantly increased non-stick properties and subsequently are easier to clean. Aqueous and oily dirt can be removed effortlessly.

- **uvex supravision excellence**
  Coated lenses are anti-fog on the inside, while the outside offers extreme scratch and chemical resistance. The anti-fogging properties are permanent even after repeated cleaning. The lenses are also easy to clean and less susceptible to dirt due to the non-stick nanotechnology.

- **uvex supravision THS**
  Coated lenses have advanced anti-fog performance on both sides, scratch-resistant. The anti-fogging properties are permanent, even after being repeatedly cleaned. This lens coating is suitable for areas with high humidity.
Coating technology

Find your perfect coating

1. Select the temperature which best represents your working environment on the horizontal temperature axis.
2. Define the air humidity of the surroundings in percentage terms and find the figure on the diagonal axis.
3. Determine the degree of dirt on the vertical axis.
4. Join these three points to form a triangle.

The part of the triangle with the largest area will show you the appropriate coating for your defined area of use.

uvex supravision extreme
Coated lenses are scratch-resistant on the outside and permanently anti-fog on the inside. Lenses will not fog up as the coating never reaches the point of saturation. Ideally suited for workplace environments with long-lasting exposure to condensation and a high degree of dirt.

uvex supravision variomatic
Coated lenses are self-tinting filters, which automatically become darker when exposed to UV (within 10 seconds) and become lighter when exposure is reduced (after 30 seconds). Now available with the tried and tested uvex supravision excellence technology (permanently anti-fog on the inside and extremely scratch-resistant on the outside). Particularly suitable for workplaces where you frequently move between indoor and outdoor environments, from light to dark.

uvex supravision clean
Coated lenses are autoclavable and resistant to chemicals. Anti-fog on the inside, extremely scratch-resistant on the outside. The anti-fog properties last for at least 10 autoclave cycles. The coating ensures complete fog protection and maximum vision.

uvex infradur
Coated lenses are scratch-resistant on both sides and minimise damage from welding sparks.

uvex infradur plus
Coated lenses are anti-fog on the inside, extremely scratch-resistant on the outside and minimise damage from welding sparks.

uvex CBR65 and CBR75
fatigue-free and relaxed vision

Ideal for accurate vision in every situation

Bright light, reflective surfaces or using digital devices, changing light conditions can all put additional strain on the eyes which can be uncomfortable and increase the onset of fatigue. The innovative uvex CBR65 and uvex CBR75 lens tint help the eyes to focus more easily by providing better contrasts.

This enables your team to remain focused on the task at hand whether that is on a production line, fine assembly work, viewing digital devices or simply when working outdoors.

Ideal for display screen equipment

LED lights, computers and other visual display screens produce harsh, unnatural light with high blue light content that can over time, damage the eye. The uvex CBR65 tinted lens reduces blue light by up to 50% and uvex CBR75 by up to 40% at 450 nm offering protection against these harmful emissions.

The uvex CBR65 and CBR75 lens technology delivers a relaxed field of vision, preventing the eyes from getting tired too quickly.

This results in wearers being able to fully concentrate without the added eye strain, makes them ideal for all-day wear.

Ideal for precision work

From precision engineering to inspection work, there are many more tasks that require continuous levels of high concentration.

The uvex CBR65 and CBR75 lens technology delivers a relaxed field of vision, preventing the eyes from getting tired too quickly.

This results in wearers being able to fully concentrate without the added eye strain, makes them ideal for all-day wear.
uvex pheos cx2
CBR65

Highly comfortable fit
X-tended Eyeshield
The soft component which is directly connected onto the lens offers additional protection and comfort

X-Twist Technology
Ergonomic side arms adjust to all head shapes thanks to the slight spring effect

Optimum ventilation
The design of these functional safety spectacles provides a pleasant and healthy internal environment around the eyes

23 grams – 100% performance

Customised fit
Extremely soft and adjustable nose piece for a high levels of comfort

Maximum wearer comfort
uvex duo component technology combines a soft inside surface with a hard outside

Flexible and lightweight
The sportstyle spectacles weigh just 23 grams and adjust to individual head shapes

Lens coating from uvex

uvex supravision excellence

uvex supravision excellence coated lenses are anti-fog on the inside and extremely scratch resistant on the outside. The anti-fogging properties are permanent even after repeated cleaning. The lenses are also easy to clean and less susceptible to dirt due to the non-stick nano-technology.
Eyewear and face protection practical introductory seminar on the selection, use and maintenance

- Elimination of eye and face hazards
- Risk of eye and face injuries
- Maintaining safety measures (surveys and ongoing evaluation)
- Control of Eye and face hazards (apply the hierarchy of control)
- Use of personal eye and face protection
- Selection
- Issue and fitting
- Maintenance and re-issue
- Workplace educational program

For more information or to book a place, please contact us on +61 02 9891 1700 or email info@uvex.com.au
uvex x-fit
Reliable protection at just 23 gram

These sporty safety spectacles cannot fail to impress with its optimum coverage of the eyes and high level of wearer acceptance. The X-design of the lens and the translucent side arms make the uvex x-fit a real highlight.
**Safety Spectacles**

**uvex x-fit**

- classic safety spectacles with good coverage of the whole eye area
- lightweight at just 23 grams
- uvex supravision coating technology
- innovative hinged side arm design
- no metal parts

Areas of application:
- manufacturing, construction, mining, food and engineering industries

uvex sportstyle
23 grams, 100% performance

Whatever your workplace environment is, the uvex sportstyle delivers the perfect combination of performance, safety and style. The distinct close fitting athletic design, unrivalled uvex scratch resistant and anti-fog lens coating technology provides a wide field of vision. The ergonomic fit and extra soft, adjustable nose piece enables wearers to achieve a comfortable customised fit, throughout the day.

- **Perfect fit**
  for all head shapes and sizes.

- **Outstanding wearer comfort**
  due to uvex duo component technology which combines hard and soft materials.

- **A balanced lightweight**
  at only 23 grams.

- **Also available with sun protection**
  in a sporty design (UV 400).

- **Optimal vision**
  with innovative lenses.

- **uvex supravision coating technology**
  for ultimate clear vision.
uvex sportstyle

- featherlight safety spectacles with a sporty design
- optimum vision thanks to uvex lens geometry
- uvex supravision coating technology
- soft, adjustable nose piece and soft, non slip side arms (uvex duo component technology) ensure a secure, pressure-free fit

Areas of application:
- mining, construction, manufacturing, maintenance, engineering and warehousing industries

uvex CR
Autoclavable safety eyewear that goes further

Innovative coating technology – the first autoclavable safety eyewear with anti-fog performance

uvex has developed the first autoclavable safety eyewear with anti-fog coating for specialist requirements in laboratories, clinics, cleanrooms and food manufacturing. From ultra-light safety spectacles and goggles with a panoramic lens, the uvex CR is the ideal safety eyewear for all areas of application and specifically have been designed for repeated autoclave sterilisation (at least 10 to 20 times for 20 minutes each at a minimum of 121°C).

uvex CR – professional safety eyewear that compliments hygiene standards.

uvex super fit CR
• lightweight safety spectacles with hinged side arms, a sporty design and uvex x-stream technology
• maximum optical clarity thanks to extremely thin wrap-around lenses
• aerodynamically optimised lenses that are angled forwards to provide optimum ventilation and comfort around the eyes
• excellent wearer comfort guaranteed by the lightweight design

A new generation of welding protection eyewear available with grey-tint lenses and protection classes. The innovative technology affords protection from UV and infrared light while maintaining perfect colour recognition in line with uvex sunglare filters.

The special uvex infradur plus coating has anti-fog properties which prevents the inside of the lenses misting up and the extreme scratch-resistance on the outside keeps damage from welding sparks to an absolute minimum.

With various welding safety spectacles and goggle solutions, there is something for everyone – enhancing comfort and the wearer experience.

N.B.: Shade number lower than 7.0 are not suitable for electric welding.

All welding products have polycarbonate lenses providing protection against impact as well as UV rays, IR rays and visible glare.

The products do not provide protection against laser beams!
Welding Protection
uvex super fit · uvex duoflex

uvex super fit
- low weight welding safety spectacles with hinged side arms in a sporty design
- perfect colour recognition
- new filter technology combines UV and IR radiation protection
- minimum damage from welding sparks
- adjustable nose piece
- low weight design (21 g) for increased wearer comfort

Areas of application:
- mining, manufacturing, construction and fabrication

uvex duoflex
- classic style spectacles with large field of vision
- perfect colour recognition
- new filter technology combines UV and IR radiation protection
- minimum damage from welding sparks
- fully adjustable side arms enable wearers to achieve a customised fit:
  - multi-level side arm inclination and four different side arm lengths
- adjust to suit any facial shape

- soft, duo-flex ear pieces for a pressure free fit

Areas of application:
- oxy-welding

Note:
Since AS/NZS 1337.1 (Australia & New Zealand Standard) does not recognise shade 4 & 5 in wide vision spectacles (clause 5.2.3). However the product (9180-945) do comply with the performance requirements of this standard except for this clause.
Due to market demand for these products and we are unable to claim full compliance with AS/NZS1337.1, these models are released with our European standard certification to EN 166 - Personal eye-protection – specifications.

uvex i-3 add
Perfect vision in every situation

Optimum protective eyewear means improved, safe vision.

uvex i-3 add safety spectacles have invisible integrated dioptr e correction for near vision. Strain on the eyes is effectively reduced (e.g. when reading) and the patented lens technology ensures an instant high level of compatibility for wearers. At the same time, the uvex i-3 add spectacles provide secure protection and optimal comfort.

Variable side arm inclination

The 5-position side arm inclination allows individual adjustment and optimum coverage of the eyes.

Addition

Two models are available for individualised correction of near vision. (+1.0 dpt. and +2.0 dpt.)

Flexible nose loops

The extremely soft adjustable Softflex nose loops ensure a secure fit and can be individually adapted to sit comfortably on the nose.

Perfection in every detail

The patented lens technology makes it possible to integrate two progression zones for near vision on the inside of the duospherical single lens safety spectacles. The correction strength at the bottom of the lenses is +1.0 or +2.0, depending on the model.

A distinctive feature and unique selling point is that the patented manufacturing technology means the front area and consequently the base curve of the lenses are not altered.

This combines extremely good coverage and fit, all the way to the edge, together with the benefits of a progressive lens on the inside area. A further benefit is that the progressive zone is not visible and that these spectacles comply with all standards of EN norms that are relevant to safety.

Progression zones

This diagram of the lenses shows the large zone that does not feature any optical correction. The transparent, integrated optical correction starts in the region of the middle and the strength increases gradually towards the lower edge of the lenses. The correction strength of the spectacles is +1.0 or +2.0, depending on the model.

The free-form lens is manufactured in accordance with standard parameters and designed for a distance of approximately 64 mm between the eyes. These safety spectacles do not permanently replace prescription safety spectacles.

Made in Germany
