uvex – protecting people since 1926

In an industry driven by cutting-edge technology and uncompromising standards, protecting the workforce is critical. uvex delivers Personal Protective Equipment (PPE) engineered to meet the exacting demands of defence environments. Our solutions are trusted across defence segments – from production and maintenance of air, land, and naval systems to manufacturing of advanced integrated defence technologies.

uvex safety programme

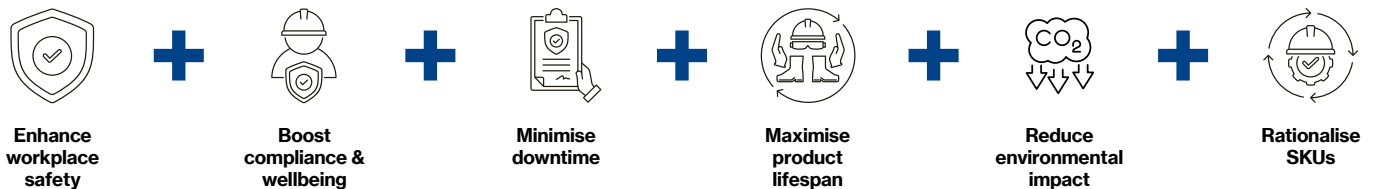

End-to-end support

Leveraging our deep technical expertise and decades of experience, we tailor safety programmes to meet each customer's specific requirements – enhancing protection, wearer wellbeing and PPE compliance. Our commitment to education and behavioural change also ensures that safety is embedded at every level, and by focusing on durable, high-performance products, we help reduce overall costs and support a more sustainable approach to workplace safety.

Key benefits

Customer testimonial

We had particular issues with sourcing anti-fog eyewear that could be worn under a welding helmet. This was an issue that uvex was able to resolve. I highly recommend uvex for their products and trial service.

They worked with us to find the right product for our needs. Currently, we are using the uvex supravision extreme coating in the sportstyle and CX2 spectacle frame, which fits all of our workers, and the CBR lens to reduce glare from the strong lighting in the bay work area.

Customisation

uvex add-on

Tailored to your needs

uvex offers full-service individualisation for protective clothing and workwear that reflects your company's image. Our in-house design and textile experts guide you from concept to delivery, tailoring solutions to your needs. We match your corporate colours and add logos or emblems – transforming safety wear into a strong part of your brand identity.
