uvex pheos nxt

MADE IN GERMANY 

The uvex pheos nxt combines a classic sporty design with comfort, lightness and optimum protection.

The special design of the side arms is not just visually impressive: The directional structure ensures extremely good grip – even for demanding work. Numerous cut-outs in the side arms improve air circulation and make the spectacles lightweight

without sacrificing strength. Additionally, the large panoramic lens offers a wide, distortion-free field of vision to provide a clear, comfortable view at all times.

The uvex pheos nxt is an appealing all-rounder and ideal accessory for a wide range of working conditions.

In every situation
grip. fit. vented.

During development, the uvex pheos nxt benefited from knowledge from the sporting world: safety eyewear must always fit perfectly, regardless of head position and how strenuous the work.

The revolutionary uvex aero non-slip 3D side arm design ensures a reliable grip for a wide range of applications.

Its versatile features and the option to combine it with uvex safety equipment such as safety helmets and hearing protection make it the ideal all-rounder for a wide range of applications in industry, trade and construction.

More details

Innovative uvex aero non-slip 3D side arm design (patent pending)

A minimal, basic framework, combined with flexible, thin soft components, ensures **noticeable weight reduction** – for exceptional wearer comfort even during long periods of use.

1/ grip.

The **grippy texture** guarantees a secure fit even during demanding work.

2/ fit.

The flexible **side arm twist technology** ensures a comfortable and pressure-free fit.

3/ vented.

The innovative side arm design allows **maximum air circulation** for climate-optimised wearer comfort.

Ready for any challenge

Panoramic vision

For optimal visibility in all situations, the uvex pheos nxt offers a wide distortion-free field of vision using a large panoramic lens.

The robust polycarbonate lens with proven uvex supravision coating technology ensures permanent anti-fog and scratch resistance. In addition, the spectacles offer 100 percent protection against dangerous UV radiation up to 400 nm.

Permanent clear vision thanks to
uvex supravision coating technology
with UV400 protection.

Unrestricted field of vision thanks to the frameless lens design.

uvex

Protecting people and the planet

uvex has developed the **protecting planet** icon, to help raise awareness of its commitment to achieving increased sustainability. Based on the brand claim, **protecting people**, our sustainable approach integrates three core interlinked pillars – **ecology, economy** and **social responsibility**, that are incorporated throughout the business to improve our sustainability performance.

This explains the comprehensive audit, measurement and evaluation management process uvex undertakes along the entire value chain to ensure its products are as sustainable as possible.

47.4%

from post-consumer recycled
material (PCR)

protecting planet

by reducing waste

Paper for instruction manuals

› 30 percent reduction

Packaging units

› increase from 5 to 10 pairs of spectacles reduces
packaging material and causes less waste

** Mass-balanced products are products whose production has been proven to use bio-based raw materials or primary products within a specified scope and without biogenic carbon being reliably detectable in the final product. Mass balancing is a bookkeeping method (e.g. for the proportion of recycled materials) for recording and tracking the mass flows of plastics along the entire value creation chain. In this process, fossil-based raw materials are replaced during production, for example through the replacement of CO₂, biomass or secondary raw materials from chemical recycling. Since the mass-balanced approach is a bookkeeping method, the exact proportion of recycled materials in the product cannot be determined exactly.
