uvex sportstyle

Style without compromise

Whatever your industry or sporting activity, the uvex sportstyle delivers the perfect combination of performance, safety and style.

The distinct close fitting athletic design, unrivalled uvex lens coating technology, together with the sportstyle's low weight and use of high-tech materials means that wearers will experience the highest levels of comfort, ultimate fit and an excellent field of vision.

Suitable for a wide range of applications in multiple industrial sectors or sporting activities.

Lightweight safety spectacles
weighing just 23 grams

Soft grip side arms and bridge
also ensures optimum wear comfort

Contoured lens
delivers ultimate cohesive fit

Adjustable, soft nose piece
for comfortable, customised fit.

uvex supravision
lens coating technology:
permanent anti-fog
coating on the inside,
scratch resistant outside

uvex UV400

100% UV protection. 100% safety. 100% uvex.

The EN166/170 standard specifies safety eyewear should provide UV protection up to 380 nm. The WHO* and latest scientific studies state that this level of protection is insufficient and recommend safety eyewear lenses provide UV protection up to 400nm covering UVB and UVA rays.

”

“The reasons why the WHO recommends UV400 protection are clear. The outer tissues of the eye, cornea and lens fully absorb UV light. While UVB light primarily damages the genetic material, UVA rays penetrate deeper, cause thermal damage and magnify the effects of UVB light.”

Univ.-Prof. Dr. rer. nat. Olaf Strauß

“

uvex UV400 – included in all uvex safety eyewear

Regardless of whether you choose a clear or tinted lens, all uvex safety eyewear has UV absorption incorporated in the lens which filters 100% of UV rays up to 400nm. uvex which stands for **ultraviolet exclusion**, prides itself on delivering the best possible protection together with top-quality lens coatings, incredible comfort and stylish designs.

Even without sun, UV rays can still put strain on the eye

When working outdoors, your eyes are regularly exposed to harmful UV radiation – even when it is cloudy. The result: using insufficient protection may cause dangerous long-term damage such as corneal injury, cataracts and loss of sight.

100% protection against dangerous UVA and UVB radiation

For the eye and surrounding skin

Radiation in nm

uvex UV400

uvex UV400 offers complete protection against UVA and UVB radiation as well as high-energy visible light (HEV) up to a wavelength 400 nm.

uvex UV400 not only filters 100% of UVA rays (20% still passes through 380 nm lenses), it also completely minimises temperature-induced cell changes – a factor which increases tenfold in the percentage of total cell damage in the range from 380 to 400 nm. In addition, the dangerous, damaging blue light content (HEV), which is also harmful to the retina, is reduced by 15%.

uvex safety eyewear,
100% safety.
