uvex 1 sport white

Designed for clean environments

The uvex 1 sport white safety shoe line combines sporty design, optimal comfort and sophisticated functionality. The virtually seam-free finish prevents unwanted contaminants from getting inside the shoe when worn in environments where hygiene is paramount, for example, hygienic areas, clean room applications, the food industry, pharmaceutical industry, industrial kitchens, hospitality and other areas that require the use of white shoes.

clima zone

Meets the ESD specification with a leakage resistance of less than 35 megaohms

Sizes 3 to 6.5 have been produced using a ladies' last to mimic the contours of a female foot as women's feet tend to be narrower and higher than men's feet (rather than taking a male last and simply shrinking the size which is common practice)

Hydrophobic microfibre

Almost-seamless hydrophobic microfibre upper that's easy to clean and prevents unwanted contaminants from getting inside the shoe. Can be washed at 30°C.

Lightweight, sporty design

Stylish design combined with first-class wearer comfort, thanks to its lightweight design, climate optimised high-tech materials and ergonomically shaped outsole.

Metal-free toe cap

Compact metal-free uvex xenova® protective toe cap and midsole (S3) anatomically designed shape to provide good lateral stability and no thermal conductivity.

Dual density PU sole

Ergonomically designed outsole made from dual density polyurethane (PU) with outstanding shock absorption and excellent slip resistance.
