uvex i-range

sustainable. flexible.
safe.

uvex i-guard

additional protection against liquids and large dust particles thanks to the highly flexible frame that adapts to any facial shape without pressure (marking 3 and 4 in accordance with EN 166)

uvex i-guard+

goggle version of the iguard with the same great features, but EN 166 B impact rated

uvex i-lite

impressive modern design with flat lens geometry

The uvex i-range is our new flexible 3 in 1 safety eyewear range that allows wearers to select the right product for the workplace hazard or environment.

x-tended sideshield for additional side protection

Flat lens design for an unrestricted field of vision

With proven **uvex supravision coating technology** and UV400 protection

protecting planet

by using recycled material // by using bio-based material

uvex i-range planet is made of recycled and bio-based materials to protect the environment

Ergonomically shaped side arms for a perfect fit and secure hold without creating pressure points

Three-stage adjustable side arms for individual customisation

Soft and flexible face seal made from sustainable materials for a universal fit

uvex i-range utilises recycled materials for its packaging helping to limit the impact on the environment.

uvex i-range

- Versatile 3 in 1 safety eyewear range – allows eyewear to be adapted according to workplace hazards
- Large, flat lens delivers unrestricted field of vision
- X-tended sideshield offers additional protection from hazards
- Side arms with multi-incline points allow for a high level of individualisation to ensure a good fit for all facial shapes and head widths
- Ergonomically shaped side arms provide a secure fit without pressure
- Robust polycarbonate lens with uvex's proven supravision coating technology – permanent anti-fog and scratch-resistant lens
- UV400 – 100 % protection against dangerous UVA and UVB radiation up to 400 nm
- Metal-free
- uvex i-guard: soft, flexible face seal adapts to the wearer providing both protection and comfort. It also protects against droplets or splashes of liquids and large dust particles (markings 3 and 4)
- uvex i-guard+: above features together with increased impact protection

uvex i-range planet

protecting people
and the planet

The uvex i-range planet version also sets new standards in terms of sustainability:

We use recycled and bio-based materials for our innovative safety eyewear – in the spirit of environmentally friendly and resource-saving manufacturing. The properties of our safety eyewear (e. g. mechanical strength, UV protection, design and comfort) are not affected in any way.

39% of the side arm is made from the castor oil plant which is a bio-based renewable raw material. The couplings and hooks are made of

22% recycled PET bottles and the soft face seal of the guard version is made up of more than 35% recycled granulate, which comes from production waste.

The film of the packaging bags used consist of up to 70% recycled material, which is obtained from production waste.

All cardboard cartons are made from over 90% recycled paper.

By using a smaller format text for our eyewear user instructions the amount of paper used has reduced by 30%. Increasing the packaging unit from 5 to

10 pairs of glasses resulted in an additional reduction in the amount of cardboard required and significantly less waste. It also helps cut CO₂ emissions during the transportation of goods.

The uvex i-range planet makes an effective contribution to environmental protection supporting our protecting planet product system and our sustainability journey.

New uvex supravision excellence

Next level performance

Permanent anti-fog coating on the inside
exceeds the standard four times over

Without anti-fog coating

The lens fogs up on the inside due to the
wearer's body heat and breath

Strenuous work, Physical exertion, Intense heat

The newly improved uvex supravision excellence combines powerful anti-fog performance on the inside of the lens, with a durable, scratch resistant coating on the outside. The anti-fog performance is now four times that required by the EN168 standard and twice the performance of its uvex predecessor.

This unique formula ensures lenses stay fog-free for longer, helping to improve safety, product longevity and value for money. uvex coatings are permanent and won't wash off even after repeated cleaning, helping to reduce replacement rates and waste.

uvex UV400

Included in all uvex safety eyewear

- Even on cloudy days, UV rays can still put a strain on the eyes when working outdoors, where we are regularly exposed to harmful UV radiation.
- Whether you choose clear or tinted lenses, all uvex safety spectacles are equipped with uvex UV400 as standard
- Latest findings show that EN166/170 safety eyewear that provides UV protection up to 380nm is not enough (20% of damaging UV radiation still passes through)
- uvex UV400 provides 100% protection against UVA and UVB radiation up to 400nm for the eyes and surrounding skin helping to minimise long-term damage
- uvex UV400 also reduces damaging blue light content (HEV) by 15% which is harmful to the retina
