

How to get the best out of your eye protection...

Lens Cleaning Instructions

Rinse dust and coarse particles off the lens under running water OR use the edge of folded towelette to brush away surface dust

Spray a small amount of cleaning fluid onto both sides of the lens OR unfold towelette

Do not clean / wipe the lens dry. Allow residue of fluid to evaporate

Using a lens cleaning tissue or towelettes wipe the lens inside and out using a circular motion

Do not scrub the lens backwards and forwards

Caring for your Eyewear

Do handle your spectacles/goggles by holding the frame or top and bottom of the lens

Do not handle the lens. This helps reduce scratches and smearing

Store spectacles / Goggles in a clean pouch or case when not in use

Do place your spectacles/goggles as shown above

Do not put your spectacles/goggles down on the nose bridge or lens

The best eye protection is the one that gets worn!
