Compact. Functional. Modular

# uvex pheos faceguard

## Compact. Functional. Modular

This innovative face protection system consists of a height-adjustable suspension harness and width adjustable head strap and high-quality polycarbonate visor with permanent uvex supravision excellence lens coating on the inside - providing clear, long-lasting fog- and distortion-free vision. On the outside of the visor is a durable, scratch-resistant coating to help prolong product life.

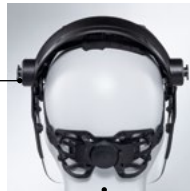

The unique feature is the low weight and ergonomic design which evenly distributes the weight across the body's centre of gravity to support a natural head posture, minimising strain on the neck and spine, even when the visor is 'parked'. Semi-automatic sprung mechanism makes lifting and lowering the visor smooth and effortless. It also helps hold the visor in the park position.

As an adaptive modular system, additional protective products can be attached as and when needed such as a bump cap, chin guard and ear muffs can be attached and removed quickly using a rotating mechanism.

### **Suspension harness and sweatband**

Adapts comfortably to the head shape

### **Highly adjustable wheel ratchet system with wide neck piece**

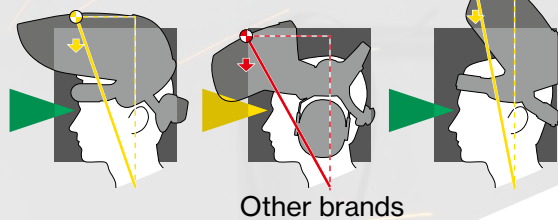

uvex spiderneck single-handed width adjustment wheel ratchet system for a customised, comfortable fit. Suitable for head sizes 52–64 cm.

## What sets uvex pheos faceguard face protection apart?

- Fully preassembled face protection
- Sturdy polycarbonate visor with anti-fog and scratch-resistant uvex supravision excellence coating and uvex UV400 protection
- Wide field of vision with the highest optical quality class
- Low weight, slim design and balanced centre of gravity to relieve the spine
- Comfortable fit even when worn with prescription spectacles and respirators
- Expandable modular system with replaceable individual parts

### Designed to protect the face and neck

The uvex pheos faceguard has been ergonomically designed to evenly distribute the weight across the body's centre of gravity. The low weight and centre of gravity supports a natural head posture, minimising strain on the neck and back. The narrow design and wide field of vision help to support the natural posture of the head and neck.

### Flexible face protection system

Space for prescription spectacles and respiratory protection, plus quick attachment of hearing protection via bayonet lock.

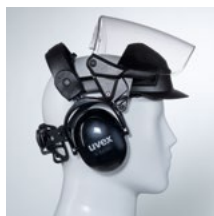

### Robust visor with UV400 and proven uvex coating

Scratch-resistant on the outside, permanent anti-fog on the inside. UV 400 protection.

### Removable earmuffs

Hearing protection  
SNR 28 dB
