uvex sustainability

Protecting people and the planet

Under the motto “protecting planet”, uvex is launching a complete product system of environmentally friendly products, retaining the high quality standards our customers have come to expect.

The “protecting planet” range combines the development of recycling concepts and the use of bio based materials. The durability and long service life of uvex products also help to reduce waste and conserve resources.

As a family-owned manufacturer, our USP is that we can control, measure and transparently report our sustainable progress across our entire global business.

Having implemented over 300 measures and projects to improve our sustainability performance by investing in new technologies, processes and green energy.

We have measurably reduced CO₂ output by 70% a reduction from 13,679 tonnes to 4,101 tonnes.

Our goal is to be carbon-neutral in the near future.

The fact that uvex manufactures over 80% of all products in our own facilities means that we are able to directly control our impact on the environment.

For more information about our sustainability commitment visit our website uvex-safety.co.uk/sustainability or speak to a uvex representative.

uvex pure-fit

- Reduced to the max - pure, ultralight safety spectacle - weighing a mere 19 grams for a extremely comfortable wear
- Designed to be recycled
- A timeless design that will appeal to all and not date, helping to prolong the life cycle of the product
- Innovative side arm concept - flexible side arms for a perfect fit and secure hold without creating pressure points
- Frameless lens design for a wide field of vision
- x-tended sideshield offers additional protection from hazards
- Nose bridge designed for all-day comfort
- Robust polycarbonate lens with uvex's proven supravision excellence lens coating technology – permanent anti-fog on the inside and a durable, scratch-resistant coating on the outside
- Metal-free
- UV400 - 100% production against UVA and UVB radiation up to 400 nm

uvex pure-fit	
Product code	9145265
Version	uvex supravision excellence
Standard	EN 166, EN 170
Frame	transparent W 166 FT CE
Lens	PC clear UV400 2C-12 W1 FTKN CE
Weight	19 g

MADE IN GERMANY

recyclable products

uvex pure-fit

stylish. safe. sustainable.

Designed to be recycled

Thanks to their unique single-material design, these safety spectacles – just like their packaging – are 100% recyclable. Manufactured using a fully automated, energy-saving production process, the CO₂ emissions for this product are reduced by around 50% making the uvex pure-fit a highly sustainable solution. Using new packaging techniques, uvex have also reduced the amount of packaging materials by more than half which helps reduce waste and cut CO₂ emissions in logistics. The timeless design will appeal to all and not date, again helping to prolong the life cycle of the product.

Ultra-light for high levels of wearer comfort, these safety spectacles feature hingeless side arms for a perfect fit and secure hold without creating pressure points adding to the extremely high levels of wearer comfort. The spring effect ensures this spectacle grips the side of the head without pressure – giving a secure, stable fit that suits most facial shapes and sizes.

The inclusion of uvex's unique supravision excellence coating technology ensures long-lasting fog-free vision, while the durable, scratch-resistant coating helps prolong product life. uvex UV400 provides 100% protection against UVA and UVB radiation up to 400 nm for the eyes and surrounding skin helping to minimise long-term damage.

Product and packaging
100% recyclable

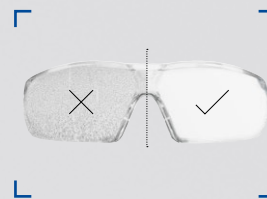

x-tended sideshield
for additional side protection
from workplace debris and
contaminants

Frameless and innovative lens
design for an optimum,
unrestricted field of vision

Unique uvex side arm concept
Hingeless, flexible side arms
ensure a secure hold without
pressure points

**With proven uvex supravision
coating technology and UV400
protection**

Feather light - at just 19 grams the
ultra low weight enhances comfort.
Made purely from polycarbonate
giving a unobtrusive, modern,
clean design.

New uvex supravision excellence

Next level performance

Permanent anti-fog coating on the inside
exceeds the standard four times over

Without anti-fog coating
The lens fogs up on the inside due to the
wearer's body heat and breath

Strenuous work, Physical exertion, Intense heat

All have a bearing on the optical quality of a lens which impacts on wearer compliance and therefore, safety.

The newly improved uvex supravision excellence combines powerful anti-fog performance - four times that required by the EN168 standard on the inside of the lens, with a durable, scratch resistant coating on the outside.

This unique formula ensures lenses stay fog-free for longer, helping to improve safety, product longevity and value for money. uvex coatings are permanent and won't wash off even after repeated cleaning, helping to reduce replacement rates and waste.

uvex UV400

Included in all uvex safety eyewear

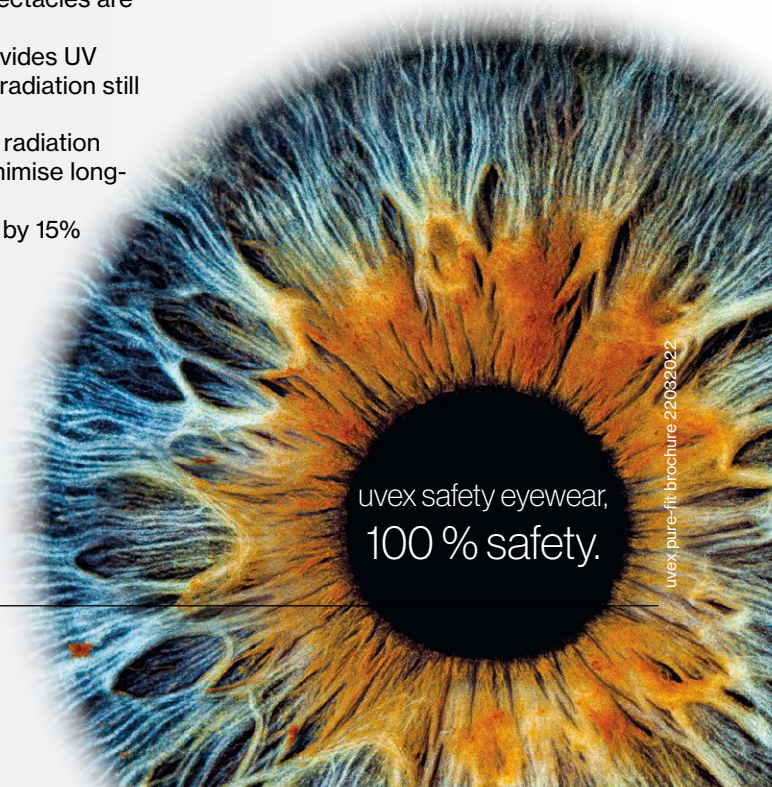

- Even on cloudy days, UV rays can still put a strain on the eyes when working outdoors, where we are regularly exposed to harmful UV radiation.
- Whether you choose clear or tinted lenses, all uvex safety spectacles are equipped with uvex UV400 as standard
- Latest findings show that EN166/170 safety eyewear that provides UV protection up to 380nm is not enough (20% of damaging UV radiation still passes through)
- uvex UV400 provides 100% protection against UVA and UVB radiation up to 400nm for the eyes and surrounding skin helping to minimise long-term damage
- uvex UV400 also reduces damaging blue light content (HEV) by 15% which is harmful to the retina
