uvex suXXeed

strong. sporty. functional.

uvex suXXeed combines stylish good looks with comfort, fit and protection.

The contoured wide angle lens together with the low profile frame gives this spectacle a sleek, sporty design that fits multiple face shapes and sizes.

The soft, flexible nose pad and dual-component soft-grip side arms deliver high levels of comfort while ensuring that during intense physical activity or when performing strenuous work, the uvex suXXeed stays where it should - in front of your eyes.

The inclusion of uvex's unique supravision excellence coating technology ensures long-lasting fog-free vision, while the durable, scratch-resistant coating helps prolong product life. uvex UV400 provides 100% protection against UVA and UVB radiation up to 400 nm for the eyes and surrounding skin helping to minimise long-term damage.

An optional clip-in foam frame provides even greater protection from dust and dirt, as and when it is needed.

maXXimum comfort

ergonomically shaped side arms with soft-grip temple ends for a comfortable and secure hold

eXXtended, contoured lens

for added protection without restricting peripheral vision

fleXXible nose pad
for added comfort and a non-slip fit

eXXtremely sleek, sporty looking spectacle with a dynamic, attractive frame design

eXXcellent vision

with proven uvex supravision coating technology and UV400 protection

MADE IN GERMANY 

uvex suXXeed

- Sporty safety spectacle, contoured to fit multiple face shapes and sizes for a comfortable fit
- Ergonomically shaped side arms with soft-grip temple ends provide a comfortable, secure fit without pressure
- Soft, flexible nose pad adapts to the wearer, delivering a non-slip and pressure-free fit
- uvex's proven supravision lens coating technology: permanent anti-fog coating on the inside, scratch resistant outside
- Optional clip-in frame seal provides extra protection against particles, dirt and dust
- Metal free
- UV400 - 100% protection against UVA and UVB radiation up to 400 nm

uvex

uvex UV400

100% UV protection. 100% safety. 100% uvex.

The EN166/170 standard specifies safety eyewear should provide UV protection up to 380 nm. The WHO* and latest scientific studies state that this level of protection is insufficient and recommend safety eyewear lenses provide UV protection up to 400nm covering UVB and UVA rays.

”

“The reasons why the WHO recommends UV400 protection are clear. The outer tissues of the eye, cornea and lens fully absorb UV light. While UVB light primarily damages the genetic material, UVA rays penetrate deeper, cause thermal damage and magnify the effects of UVB light.”

Univ.-Prof. Dr. rer. nat. Olaf Strauß

“

uvex UV400 – included in all uvex safety eyewear

Regardless of whether you choose a clear or tinted lens, all uvex safety eyewear has UV absorption incorporated in the lens which filters 100% of UV rays up to 400nm. uvex which stands for **ultraviolet exclusion**, prides itself on delivering the best possible protection together with top-quality lens coatings, incredible comfort and stylish designs.

Even without sun, UV rays can still put strain on the eye

When working outdoors, your eyes are regularly exposed to harmful UV radiation – even when it is cloudy. The result: using insufficient protection may cause dangerous long-term damage such as corneal injury, cataracts and loss of sight.

100% protection against dangerous UVA and UVB radiation

For the eye and surrounding skin

uvex UV400 offers complete protection against UVA and UVB radiation as well as high-energy visible light (HEV) up to a wavelength 400 nm.

uvex UV400 not only filters 100% of UVA rays (20% still passes through 380 nm lenses), it also completely minimises temperature-induced cell changes – a factor which increases tenfold in the percentage of total cell damage in the range from 380 to 400 nm. In addition, the dangerous, damaging blue light content (HEV), which is also harmful to the retina, is reduced by 15%.

uvex safety eyewear,
100% safety.
