## uvex xact-fit test

Hearing protection fit test system

uvex xact-fit test is one of the most reliable fit testing systems on the market. **It allows you to precisely measure the attenuation level of hearing protection worn, regardless of the brand or model.**

The test system consists of a headset with a Bluetooth connection and a tablet, allowing for quick and wireless configuration. Stored in a carrying case, it is easily transportable and can be used anywhere.

### Goals

01

#### Check for proper fit

Ensure that the hearing protection device fits the user correctly to provide maximum protection.

02

#### Educate users

Teach employees how to properly use and wear hearing protection devices.

03

#### Document protection levels

Provide evidence that employees receive adequate protection from their devices, thereby proving compliance with OHS regulations.

04

#### Customise protection

Recognise that the shape and size of the ear canal varies from person to person, and thus select the most effective type and size of protection for each user.

### Benefits

#### OPEN SYSTEM

- Can test all earplug types (including molded earplugs) and brands
- No modification of the earplugs is necessary

#### FAST RESULTS

- Tests both ears at the same time without compromising accuracy
- Total test time 2-5 minutes per person

#### ★★★ EASY TO USE

- Pre-installed software provides quick and efficient setup
- **The uvex team will provide introductory training as well as ongoing support to customers as needed.**

#### WIRELESS

- Bluetooth connection allows you to set up a test anywhere, as soon as an internet connection is available
- Allows on-site fit testing for employees (construction site, production site, etc.)

#### CLOUD SOFTWARE

- The software updates automatically and for free
- Automatic upload and encrypted cloud storage of results, ability to generate a printable PDF report if needed
- Results accessible from multiple devices
