uvex profisystem construction

Reliable protection for construction professionals

protecting people

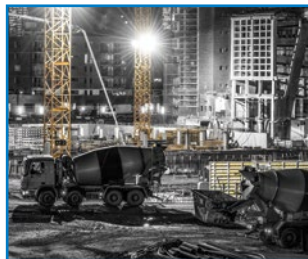

The PPE product system designed specifically for the construction sector

The safety challenges in the Construction industry are diverse and exist in all activity phases from preparatory site work, build to fit-out. To deliver projects on time, to specification and on cost requires flawless synergy between all teams and the same is true for an appropriate and complementary range of personal protective equipment.

From its wide range, uvex has selected over 150 innovative safety products for the Construction industry, each of which has been designed to meet the specific needs of wearers. Grouped into 12 distinct product categories, the uvex Profisystem provides leading edge solutions for wearer needs across a broad spectrum of applications. Optimum protection, value and wearability from uvex.

The uvex profisystem construction was developed for the following applications:

- Road Building / Asphalt Work
- Water / Wastewater / Pipeline Construction
- Plumbing / Heating / Air-Conditioning
- Masonry / Stone Setting / Stone Work / Bricklaying
- Wrecking / Demolition
- Bridge / Tunnel / Elevated Highway Construction
- Electrical Works
- Plastering / Concrete
- Driving Machinery / Machine Operator
- Ground Covering / Tiling
- Painting / Paper Hanging
- Metal Works

Protection for construction professionals – from head to toe

Falling debris? Uneven ground? Abrasive material handling? Airborne dust? uvex provides optimum solutions for multiple head to toe applications. The safety experts at uvex understand the needs of the Construction industry and can provide clear advice to help customers select the right PPE.

Reliable safety helmets – essential kit for any construction site:

The uvex pheos IES helmet features an integrated clip for the direct attachment of uvex pheos safety spectacles. This system keeps your eye protection exactly where it should be and can be safely tucked away in the helmet if required.

Innovative safety spectacles for all construction industry applications:

The uvex pheos cx2 provides reliable protection against construction site dust, and features an ergonomic eye shield for exceptional comfort – even during long-term wear.

Flexible safety gloves to enable your team to get to grips with the task at hand:

The uvex phynomic XG glove fits like a second skin, and features an innovative coating for extra grip when handling oily workpieces.

Robust safety footwear to provide solid foundations for your construction site team:

The uvex 2 is equipped with the latest-generation metal-free protective toe cap, resulting in low-weight, ultra-flexible footwear that offers maximum wearer comfort.

Reliable protection against extreme construction noise:

Thanks to its extra-soft ear cushions, the uvex K4 is exceptionally comfortable – while the eye-catching hi-vis design improves wearer visibility.

Your team is guaranteed to be seen on any construction site:

The highly water-resistant uvex protection active flash softshell jacket features a battery-powered light guide system for enhanced safety when visibility is poor.

Professional service, individual support

Know-how from professionals, for professionals.
