## **uvex safety with new PPE highlights at bauma**

**The construction industry is meeting in Munich and uvex safety will be there: at bauma 2025, the German manufacturer of personal protective equipment will be presenting new products that are ideally suited to the special challenges of the construction sector.**

Every three years, the world's largest trade fair in terms of exhibition space takes place in Munich: bauma. From 7 to 13 April 2025, the self-proclaimed world's leading trade fair for construction machinery, building material machines, mining machines, construction vehicles and construction equipment will open its doors at the exhibition centre in the Bavarian capital. A good 200,000 square metres of hall space and more than twice as much outdoor space will be occupied by around 3,500 exhibitors from 57 countries. Three years ago, this attracted almost half a million visitors.

One of these exhibitors will be the uvex safety group. The family-run company from Germany manufactures occupational safety products from head to toe - from safety helmets to safety shoes. In Hall B4 at stand number 302, uvex will be presenting its own product range and, of course, specifically addressing the special features of the construction industry. For example, the robust uvex 3 MACSOLE® safety boots with BOA® Fit System and the new uvex 3 quatro in sizes 36 to 52 and widths 10, 11 and 12 will be available to try on. Interested visitors can put the shoes through their paces on a test course.

In addition to footwear, the PPE manufacturer is also bringing safety helmets such as the new and innovatively designed uvex pronamic, workwear such as the attractive uvex suXXeed craft collection, gloves such as the HexArmor Helix 1095 equipped with protectors and many other product highlights: The new uvex ultrashield safety spectacles impress with their sporty look, while the uvex aXess one active hearing protection features the practical Real Active Listening function. Occupational safety from head to toe.

‘We are looking forward to presenting our high-quality products to the industry at bauma, including real problem solvers,’ says Rainer Föger, Sector Manager Construction of the uvex safety group, in the run-up to the trade fair. ‘Our team is

ready to provide visitors to the trade fair with advice for a week and is looking forward to good discussions and new contacts.'

## About the uvex group

The uvex group unites four companies under one roof: the uvex safety group, the uvex sports group (uvex sports and ALPINA), the Filtral group (Filtral and Primetta) and Protecting People GmbH for the B2C business. The uvex group is represented by 49 subsidiaries in 22 countries and produces out of conviction with a focus on Germany. uvex is a global partner of international top-class sport as a supplier to countless top athletes. The guiding principle of protecting people is both a mission and an obligation. To this end, the uvex group develops, produces and distributes products and services for the safety and protection of people at work, during sports or leisure.
