Respirator advisor · Cleaning · Functions

uvex Respiratory Expert System

Your respiratory protection advisor will help you choose the right respirator and provide detailed information.

As a leader of innovation, we set the highest standards in products and service. The uvex Respiratory Expert System (uRES) will help you choose the appropriate respirator and will give you detailed information about products, technologies, standards and guidelines.

You can choose the correct mask from the uvex portfolio based on the work due to be carried out or based on the hazardous substance used. You will find useful detailed pictures of the products in use for all products and the relevant data sheets.

The uvex Respiratory Expert System gives you a quick overview of the correct respirator choice and provides clear and concise answers to fundamental questions relating to this topic.

Experience your breathing protection in a new dimension:

The uvex breathing protection navigator

The fast route to finding the right respirator for your needs

Choosing the right respiratory protective devices is essential for ensuring the safety of the respective wearer and is a process that requires the utmost care. In order to choose the filtering respirator that meets your requirements, please observe the following points:

- The type, composition and concentration of the respective hazardous substances must be provided and known (note the CAS number). The measurement can be carried out by the employers' liability insurance association, for example. In addition, the respective work conditions with due regard to occupational exposure limit values must be known.
- There must be a sufficient volume of oxygen in the environment. Please observe the legal provisions regarding this; in Germany, 17 vol. % is required as a minimum.
- If further PPE is required, this must be compatible. uvex respirators are particularly ideal for use in combination with uvex safety spectacles (page 129).
- Respiratory protective devices are not suitable for persons with beards, sideburns or deep scars in the area of the respirator sealing lines.

- Masks designated with "NR" can be used for up to eight hours. Masks designated with "R" may be used for up to 24 hours but must be cleaned after each period of use. As a general rule, a mask with a noticeably increasing level of breathing resistance must be replaced.
- After determining/being advised on the protection class required (FFP1, FFP2 or FFP3) – through the respective employers' liability insurance association, for example – the following table can be used to select a respirator model that meets the requirements of the respective work conditions. Please note that we only offer our FFP3 masks with an exhalation valve in order to give you the highest possible level of wearer comfort.

If a gas mask is required for the workspace, please note that the uvex respirator models do not offer adequate protection.

Selection

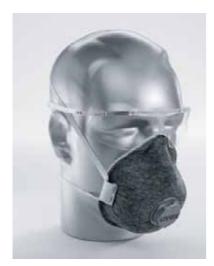

| Brief periods of use or light | er activities at normal ambient temperatures | |
|-------------------------------|--|---|
| Protection class | Folding mask (with or without valve) | Cup-style mask (without or without valve) |
| FFP1 | 3100, 3110, 8103, 8113, 5100, 5100+, 5110, 5110+ | 2100, 2110, 7100, 7110 |
| FFP2 | 3200, 3210, 8203, 8213, 5200, 5200+, 5210, 5210+ | 2200, 2210, 7200, 7210, 7212 |
| FFP3 | 3310, 8313, 5310, 5310+ | 2310, 2312, 7310 |
| Long periods of wear or ha | rd, strenuous activities at increased ambient temperatur | es |
| Protection class | Folding mask (with valve) | Cup-style mask (with valve) |
| FFP1 | 3110, 8113, 5110, 5110+ | 2110, 7110 |
| FFP2 | 3210, 8213, 5210, 5210+ | 2210, 7210, 7212, 7233, 7232 |
| FFP3 | 3310, 8313, 5310, 5310+ | 2310, 2312, 7310, 7333, 7330, 7312, 7315 |
| With activated carbon layer | r to protect against unpleasant odours | |
| Protection class | Folding mask (with valve) | Cup-style mask (with valve) |
| FFP1 | - | - |
| FFP2 | 3220, 5220+ | 2220, 7220 |
| FFP3 | 5320+ | 7320 |

▶ The minimum requirements for selected areas of application can be found on page 130.

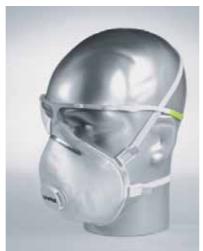

Perfect Match

Protection from a single source

For many years, has been a global leader in industrial safety eyewear. uvex has built on this expertise in the development of its highly functional uvex silv-Air respirators.

With the aim of creating two products that can be worn together perfectly, eyewear and breathing protection product development was carried out in close consultation. Safety eyewear and breathing protection were regarded as one, uniting to provide the best possible protection.

The result of this combined expertise is the three dimensional shape of uvex silv-Air respirators. They ensure an optimum, close fit of safety eyewear, without slipping and wobbling. As the equipment remains firmly in place, optimum eye protection is guaranteed. uvex preformed and folding masks are therefore particularly suitable for combination with uvex safety eyewear.

Trust protection from a single source.

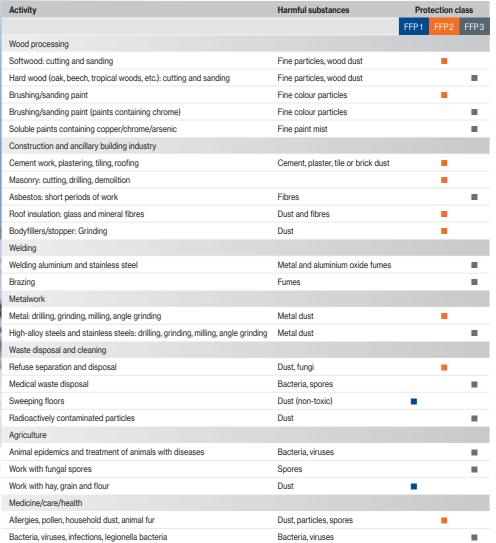

Three dimensional optimised nose shape for optimum combination of respirator with safety eyewear.

UVEX SIV-Air Areas of application

▶ These filter classes are minimum requirements and simply serve as a guide. It is the wearers' responsibility to make sure the breathing apparatus conforms to the requirements in terms of hazardous materials and concentration before use!

FFP2 For hazardous or harmful particles, vapour and smoke; filters for solid and liquid particles with a medium filtering level. For protection up to 10 times the corresponding threshold value (OELs*).

FFP3 For poisonous particles, vapour and smoke; filters for solid and liquid aerosols with a high filtering classification. For protection up to 30 times the corresponding threshold limit value (OFI s*)

* OELs = The occupational exposure limit values (OELs) are the average concentration of a substance in the air in the workplace, up to which no damage (chronic or acute) is to be expected if employees work there for eight hours a day for five days a week. The OELs replace the maximum workplace concentration (MWC) and the technical reference concentration (TRC) – however, as long as both of these values are not yet fully taken into account in the OELs, they can still be used on an interim basis for assessing risks in the workplace.

FFP 1

All FFP 1 respirators provide reliable protection against harmful substances up to **4 times** the threshold limit value (OELs*) and are available with or without a valve.

FFP 2

All FFP 2 respirators provide reliable protection against harmful substances up to **10 times** the threshold limit value (OELs*) and are available with or without a valve.

FFP 3

All FFP 3 respirators provide reliable protection against harmful substances up to **30 times** the threshold limit value (OELs*) and are only available with a valve.

uvex respirators are suitable for protection against solid and liquid aerosols, dust particles, fog and smoke. They do not provide an adequate level of protection against gases and vapours exceeding the limit value.

All respirators have been tested and certified in accordance with European standard 149 "Respiratory protective devices – filtering half masks for protection against particles". They are in line with current EU legislation. Depending on the filter performance and leakages, the respirators are categorised into protection classes P1 (blue), P2 (orange) or P3 (black). All respiratory protective devices fall into PPE category III (high risks).

^{*} OELs = The occupational exposure limit values (OELs) are the average concentration of a substance in the air in the workplace, up to which no damage (chronic or acute) is to be expected if employees work there for eight hours a day for five days a week. The OELs replace the maximum workplace concentration (MWC) and the technical reference concentration (TRC) – however, as long as both of these values are not yet fully taken into account in the OELs, they can still be used on an interim basis for assessing risks in the workplace.

uvex silv-Air premium

Respirators

UVEX SİV-Air premium Respirators, class FFP1, FFP2 and FFP3

The nose clip is easy to adjust, ensuring a particularly good fit.

The comfortable sealing lip offers maximum comfort and a reliable fit.

6 (-) 3

The masks are packaged individually and therefore meet the highest hygiene requirements.

The extra-wide textile headband ensures that the mask fits comfortably and securely.

uvex silv-Air premium respirators

- The shape of the design is optimised so that the mask fits more comfortably and offers maximum protection
- The integrated nose clip can easily be adjusted to each individual face, guaranteeing a particularly good fit
- The comfortable sealing lip (in the nose area for FFP1 and FFP2 and in the nose and chin area for FFP3) provides maximum comfort and a reliable fit
- The masks are packaged individually and therefore meet the highest hygiene requirements
- The masks can be perfectly combined with all uvex safety spectacles; selection guidance is available on page 133
- Seamless, extra-wide textile headband that can be adjusted to ensure the mask fits comfortably and securely
- The mask fulfils the requirements regarding a high dust concentration (dolomite dust test [D])
- Masks available with an exhalation valve to reduce heat and humidity in the mask
- Two additional models with activated carbon are available for working with unpleasant odours

Exhalation valve for reducing heat and humidity.

Anatomically preformed nose area and integrated nosepiece within the filter material, ensures a perfect fit and the highest level of wearer comfort.

4-point headband attachment for a comfortable, secure fit of the mask.

The high-quality filter material ensures low breathing resistance, while the smooth white filter surface reduces the risk of contamination through "linting" in areas with strict hygiene standards.

uvex silv-Air p

Respirators in protection class FFP1 and FFP2

All-round soft material edges for increased comfort.

Three-dimensional, optimised shape can be combined with safety eye protection and a secure fit is guaranteed without a nose clip

All FFP1 and FFP2 preformed masks are completely metal-free.

FFP2 preformed mask also available with activated carbon filter against unpleasant odours.

Seamless, wide headband with loop for even pressure distribution and a comfortable fit.

Product description

- innovative design with optimised shape for secure fit
- soft material edges for increased comfort
- optional exhalation valve reduces temperature and moisture inside the mask
- optimised nose area design ensures maximum compatibility with uvex safety eyewear
- silver-grey uvex silv-Air outer material is pleasant to touch and prevents mask being discarded prematurely on account of surface staining

Filtering face mask uvex silv-Air c

- innovative design with an optimised shape
- soft material edges for greater comfort and wearer acceptance
- seamless headband for a comfortable, secure fit
- exhalation valve for easy airflow exchange and reduces the build-up of heat and moisture inside the mask
- adjustable nose clip ensures an excellent individual fit
- mask fulfils the requirements of the dolomite dust test
- · compatible with uvex safety eyewear
- the upper sealing lip in the nose area ensures a comfortable and secure fit
- activated carbon filter, suitable for welding applications available in the FFP2 (uvex silv-Air c 2220 and 3220) option

The adjustable nose clip ensures an excellent individual fit and secure positioning.

The soft material edges prevent uncomfortable pressure points.

The seamless headband can be adjusted for an optimum fit.

The exhalation valve with a 360° opening ensures very low breathing resistance and a cooling effect climate inside the mask.

The upper face seal offers both a more secure positioning of the mask and increased wearer comfort.

uvex silv-Air c

Filtering face masks, protection class FFP2

uvex silv-Air 3200

- particle-filtering folding mask
- seamless headband and flexible, adjustable nose clip
- comfortable sealing lip in nose area for secure fit

uvex silv-Air 3210

- particle-filtering folding mask with exhalation valve
- seamless headband and flexible, adjustable nose clip
- comfortable sealing lip in nose area for secure fit
- exhalation valve to further reduce breathing resistance, by helping to minimise moisture build up inside the mask

uvex silv-Air 3220

- particle-filtering folding mask with exhalation valve
- additional activated carbon filter against odours, gases and vapours below threshold
- seamless headband and flexible, adjustable nose clip
- comfortable sealing lip in nose area for secure fit
- exhalation valve to further reduce breathing resistance, by helping to minimise moisture build up inside the mask

uvex silv-Air **Functions**

The 360° exhalation valve considerably reduces breathing resistance and build-up of heat and moisture in the mask.

Comfortable all-round sealing lip

The soft sealing lip guarantees a secure, comfortable sealed positioning of the mask.

Soft sealing lip in the nose and chin area

for a secure and comfortable fit.

Comfortable sealing lip in the nose area

The soft sealing lip in the nose area guarantees a secure, pressure-free fit.

Comfort nose clip
The mask is fitted with a high-quality nose clip making it individually adjustable.

Metal-free

The mask is completely metal-free and is manufactured entirely of skin-tolerant materials.

The 4-point headband attachment allows an individual and secure fit, which can be perfectly adapted to meet the wearer's require-

The masks are individually packed and meet the highest standards of hygiene.

Carbon inside

The additional activated carbon layer incorporated in the filter material reduces unpleasant odours.

The 3D nose area ensures a comfortable fit, low leakage and prevents misting of uncoated eyewear.

High performance climate management

The mask offers extremely low breathing resistance due to the filter chambers connected with the inhalation valve. The climate management of the high performance mask guarantees optimum wearer comfort.

R labelling

The mask has been tested for reusability and has the required performance features for wearing during a second work shift.

"NR" designation

The masks are not reusable and must therefore be disposed of after a work shift.

The mask has undergone additional dolomite dust testing and therefore affords excellent breathability, even in extremely dusty environments and during longer periods of use
