protecting people

## Product system planet series › Visors

uvex has developed the **protecting planet** icon, to help raise awareness of its commitment to achieving increased sustainability. Based on the brand claim, **protecting people**, our sustainable approach integrates three core interlinked pillars – **ecology, economy** and **social responsibility**, that are incorporated throughout the business to improve our sustainability performance.

This explains the comprehensive audit, measurement and evaluation management process uvex undertakes along the entire value chain to ensure its products are as sustainable as possible.

# uvex pronamic

MADE IN GERMANY 

Date created 06/2023\*

#### Visor system

- › visor lens made of up to 100 percent mass-balanced\*\* polycarbonate
- › visor arms made of up to 85 percent recycled plastic (made of high-quality post-industrial and post-consumer materials)
- › reduction in CO<sub>2</sub> emissions by over 50 percent

#### Instructions for use

- › made from waste paper

#### Packaging

- › CO<sub>2</sub>-offset polybag
- › clean disposal and return to the recycling process possible

100%

mass-balanced\*\*  
polycarbonate  
per lens

CO<sub>2</sub> emissions

50%  
saving

85%

recycled plastic in the  
visor arms

\*\* Mass-balanced products are products where **traceable** bio-based raw materials or primary products **have been used in the production process** within a specified scope **without** biogenic carbon **being reliably detectable in the final product**. Mass balancing is a bookkeeping method (e.g. for the proportion of recycled materials) used to record and track mass flows of plastics along the entire value creation chain. This allows sources of fossil-based raw materials to be removed from the production process, for example by removing CO<sub>2</sub>, biomass or secondary raw materials from chemical recycling. As the mass balancing approach is a bookkeeping method, the exact percentage of recycled material in the product cannot be determined precisely.

# Standards at a glance

EN 397 · EN 50365

## EN 397 – Industrial safety helmets

Protection against falling objects and the consequences thereof, such as brain damage and skull fracture

**Binding requirements:** all helmets certified according to EN 397 must meet these requirements.

- shock absorption, vertical
- penetration resistance (against sharp and pointed objects)
- flame resistance
- chin strap attachment: chin strap releases at minimum 150 N and maximum 250 N

**Optional requirements:** a helmet certified in accordance with EN 397 may meet these requirements; they are, however, not mandatory requirements.

- very low temperatures (-20 °C or -30 °C)
- very high temperatures (+150 °C)
- electrical insulation (440 V)
- molten metal (MM)
- lateral deformation (LD)

very low temperatures (-20 °C or -30 °C)							
very high temperatures (+150 °C)							
electrical insulation (440 V)							
molten metal (MM)							
lateral deformation							

## EN 50365 – Insulating helmets for use on low voltage installations

Protection against electric shocks and prevention of dangerous electric current passing through the head

### Requirements:

- All helmets must also meet the requirements in accordance with EN 397.
- Protection against alternating voltage of up to 1000 V (AC) or direct voltage up to 1500 V (DC)
- Insulating helmets must not contain any conductive parts.
- Air vents (if available) must not allow any accidental contact with live parts.

uvex pheos E

uvex pronamic alpine E

# Overview of standards

EN 12492 · EN 1078

## EN 12492 – Helmets for mountaineers

Protection against hazards that may occur during activities undertaken by mountaineers

### Requirements:

- Shock absorption, vertical, frontal, lateral, dorsal
- Penetration resistance
- Carrier element (chin strap releases at min. 500 N)
- Strength of carrier element: Chin strap may exhibit maximum elongation of 25 mm
- Carrier element effectiveness: Helmet must not slide from the head

uvex pheos alpine

uvex perfexxion

uvex pronamic alpine

## EN 1078: Cycling helmet

Helmets for pedal cyclists and for users of skateboards and roller skates

### Requirements:

- absorbs impact from vertical force
- the effectiveness of the retention system must be ensured via a retention test
- the mechanical strength of the chin strap must be ensured
  - the maximum permissible elongation is 35 mm

uvex perfexxion

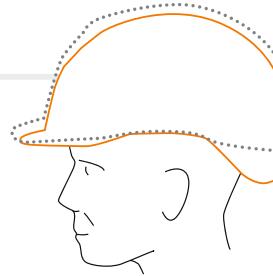

# uvex pronamic

## The innovative multi-functional helmet

### Perfect interplay of protection and dynamic

The modern, sporty uvex pronamic has a unique, innovative helmet structure. Taking inspiration from bionics (namely, the lily pad), a completely new helmet design has been brought to life – for increased performance, better ergonomics and a more sustainable use of materials. The uvex pronamic offers maximum protection: It meets both the requirements of necessary standards (shock absorption, penetration, flammability) and optional requirements (" $-30^{\circ}\text{C}$ ", MM).

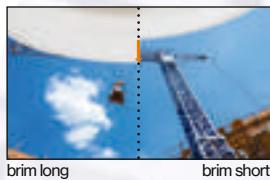

### Positioning closer to head

The optimised shape of the uvex pronamic helmet shell means that it rests closer to the head. This makes the helmet feel lighter because its centre of gravity is now closer to the centre of the head. The enlarged neck area at the back of the head also provides greater protection.

### Maximum ventilation

The fully integrated ventilation sliders are easy to operate even when wearing gloves.

### Optimal vision

The long brim protects against sunlight, while the short brim expands the field of vision.

### Space for accessories

There is a wide range of accessories available for the uvex pronamic, such as a half visor.

### Integrated neck piece

The ergonomic spiderneck neck piece enlarges the contact surface at the back of the head and provides increased wearer comfort, especially when carrying out work above head height.

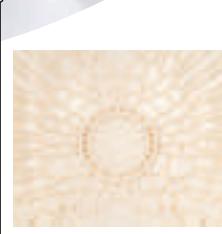

### Extended size range

Variable size adjustment from 51 to 65 cm.

### Integrated neck piece

The ergonomic spiderneck neck piece enlarges the contact surface at the back of the head and provides increased wearer comfort, especially when carrying out work above head height.

### Robust, lightweight structure

The newly developed design of the inside of the helmet saves material without sacrificing stability.

# Safety Helmets

uvex pronamic alpine

## Generous ventilation

The side air vents significantly improve the temperature inside the helmet.

## Closed version

This version also offers optimal protection for work in low-voltage areas. It fully complies with EN 397, EN 50365 and EN 12492 except point 4.1.4 (ventilation).

## Optimal adjustment

The wheel ratchet system provides plenty of scope for adjustments and the suspension harness inside the helmet can be adjusted as desired to provide the perfect fit for the wearer's head shape

Further information can be found at [uvex-safety.com/en/uvex-pronamic-alpine](http://uvex-safety.com/en/uvex-pronamic-alpine) (or scan the QR code).

## EN 12492 and EN 397

The best equipment for various applications. Whether used while working at height or as an industrial safety helmet, the helmet's chin strap system is quick and easy to change, enabling the helmet to fulfil the safety standards for both applications and offer optimum protection at all times

## MIPS included

An additional MIPS inner shell can be integrated as an option to absorb rotational energy, reducing the force transferred to the wearer's head. A detailed description of how the MIPS safety system works can be found on page 123.

## Accessories can be fitted easily and quickly

The four stylistic retaining clips guarantee an optimal fit of the helmet accessories. This ensures that the user has access to any necessary application-related products, such as helmet torches or goggles, and that these are in the perfect position at all times.

# Safety Helmets

uvex pheos S-KR Mips

## MIPS inner shell

The additional MIPS safety system is integrated into the suspension harness.

## Large neck piece

The additional neck piece increases the contact surface, reducing pressure on the back of the wearer's head. This improves the wearing comfort.

## Pre-mounted forked chin strap

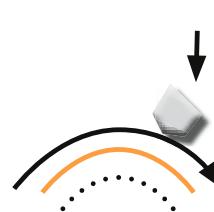

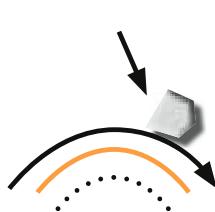

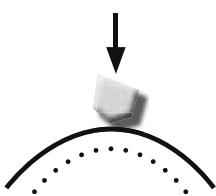

The comfortable forked chin strap secures the helmet and guarantees optimum protection, especially when carrying out overhead work

# Safety Helmets

## uvex pheos S-KR Mips

### What is MIPS?

The MIPS safety system is designed to provide additional protection for helmets during a wide variety of accidents. In certain impact situations, the MIPS system can reduce dangerous forces that might otherwise be transferred to the helmet wearer's head.

### Linear impacts

Conventional helmets are designed and tested for linear impacts. In most cases, however, impacts occur at an angle and lead to a rotational movement of the head.

Further information can be found at  
[uvex-safety.com/en/mips/](http://uvex-safety.com/en/mips/)  
(or scan the QR code).

### Angled impacts

The low-friction inner shell is designed to help reduce the rotational forces acting on the head in certain cases of an angled impact.

## uvex pheos alpine

### uvex pheos alpine

- multifunctional helmet for working at heights and rescue operations
- combines the features of an industrial protection helmet (EN 397) with the requirements for a climbing helmet (EN 12492)
- light ABS helmet shell offers a high level of protection and durability
- shorter brim for a wider field of upward vision
- side Euroslot adapters (30 mm) for attaching earmuffs and visor
- options for attaching head torches and goggles
- permanently opened air vents
- meets standard EN 397 and additional requirements for very low temperatures (-30°C)
- firmy riveted chin strap for use in accordance with EN 12492

- six-point textile band attachment ensures ideal fit and great comfort
- suspension harness with wheel ratchet system for variable width adjustment
- the helmet is delivered as standard with a black PU sweatband (art. no. 9760009); there is also an option of a light sweatband made of synthetic leather (art. no. 9760005)

### uvex pheos forestry

- set specially developed to meet the needs of forestry workers, consisting of the uvex pheos ABS B-S-WR, uvex pheos forestry visor and uvex pheos K2P mechanical
- labelled with label set, including pre-attached chin strap and signal whistle
- meets standards EN 166, 1731, 352-1 and 397 and additional requirement for very low temperatures (-30 °C)
- fully integrated metal mesh visor with high transmission (transparency) protects against foreign objects and ensures a clear view
- high-insulation earmuffs (SNR: 30 dB) round off the system perfectly and reliably protect against noise produced by chainsaws and brush cutters
- three variable air vents for maximum ventilation, offering ventilation in the direction of movement
- suspension harness with wheel ratchet system enables the width to be variably adjusted with just one hand

# protecting planet

To help raise awareness of its commitment to achieving increased sustainability, uvex has developed the **protecting planet** icon.

For uvex, **protecting planet** is more than a label. Based on the brand claim, **protecting people**, our sustainable approach integrates three core interlinked pillars – **ecology, economy** and **social responsibility**, that are incorporated throughout the business to improve our sustainability performance.

This explains the comprehensive audit, measurement and evaluation management process uvex undertakes along the entire value chain to ensure its products are as sustainable as possible.

Creation date 05/2022

The **uvex pheos planet** is an example of the **planet series** product system.

The helmet shell is made of up to 30 percent bioplastic. The organic raw material, sugar cane, is converted using a process that complies with the strictest quality requirements and achieves high stability and strength. 50 percent of the material for the headband is made of helmet shells. This significantly reduces process-related waste during production.

All individual packaging is made of regranulated material and has been taken from the recycling economy. The packaging is single-grade and can be returned to the recycling chain after use. This also saves fossil resources. The user instructions are printed on 100 percent recycled paper.

## uvex pheos planet B-WR · pheos planet B-S-WR · pheos planet S-KR Mips

- safety helmet with slots for uvex visors, helmet earmuffs and helmet torches
- helmet shell partially made of bio-based plastic
- head rings made of regranulated helmet shells
- MIPS inner shell absorbs rotational forces on the uvex pheos planet S-KR MIPS
- three adjustable air vents for maximum ventilation
- suspension harness with wheel ratchet system for variable width adjustment
- six-point textile band attachment ensures excellent fit and comfort
- pre-assembled four-point forked chin strap (9790021) for uvex pheos planet S-KR MIPS
- large neck piece (9790149) increases the wearer comfort of the uvex pheos planet S-KR MIPS
- equipped with sweatband 9760005 or 9760260 in the case of uvex pheos planet S-KR MIPS

# Visors and Face Protection

# Visor lenses, certification and norms

The right solution for every requirement

## Polycarbonate lenses with uvex supravision excellence coating

Polycarbonate has a high mechanical impact strength. Coated lenses are anti-fog on the inside, and scratch- and chemical-resistant on the outside. The anti-fogging properties are permanent even after repeated cleaning. The lenses are especially easy to clean and less susceptible to dirt due to the non-stick nanotechnology.

## Cellulose acetate lenses

Face protection visors made of cellulose acetate are ideally suited for protection against chemicals.

## Stainless steel mesh

is robust and has excellent stability and long life. Stainless steel mesh visors offer a higher light transmission than nylon mesh visors and are used for more rugged work in agriculture and forestry.

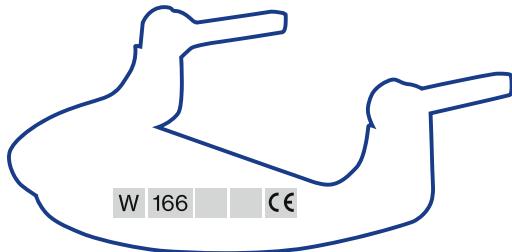

## Standards at a glance

### EN 166 – Personal eye protection

The European standard EN166 applies to all types of eye protection. EN 166 visors are made of frames and lenses.

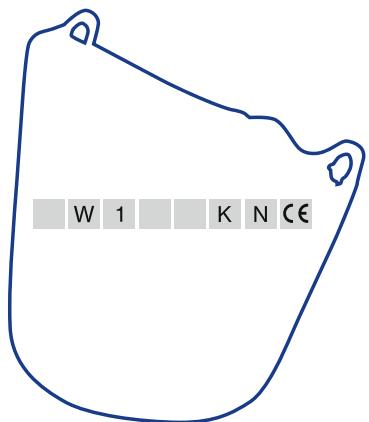

#### Certification according to DIN EN 166

Marking  
on frame

Marking  
on lenses

A detailed  
description of frame  
and lens markings  
can be found  
on page 23.

# Labelling and norms

## EN 170 – Ultraviolet protection filters

In the standards for special product requirements, the standard EN 170 sets out levels of protection and transmission requirements for ultraviolet protection filters. Excessive exposure to ultraviolet light can cause the lens of the eye to lose its transparency, which may cause

visual impairment or loss of vision. Visor lenses in accordance with EN 170 therefore meet performance requirements to protect the eye from ultraviolet radiation during hazardous work.

## EN 1731 – Mesh face protection

The European standard EN 1731 describes all requirements for personal eye and face protection made of mesh material. EN 1731 visors consist of frames and lenses.

Technical information on the frame and the lens are specified according to EN 1731 in the following order:

- Identification of the manufacturer
- Number of European standard
- Symbol for mechanical strength

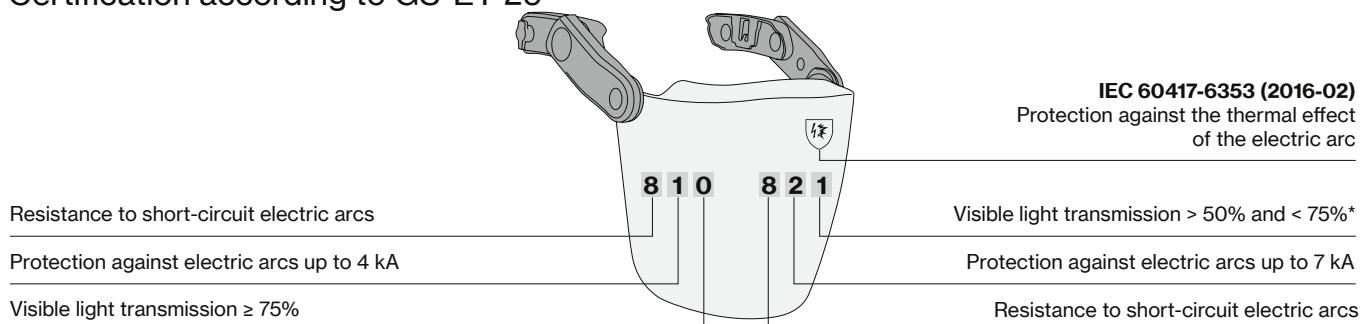

Mechanical strength	
none	without mechanical strength (filters only)
S	increased strength (filters only)
F	low energy impact (45 m/s)
B	medium energy impact (120 m/s)
A	high energy impact (190 m/s)
T	tested at extreme temperatures (-5°C and +55°C)

## GS-ET 29

When working on energised electrical systems and equipment, the risk of a short circuit electric arc must be assessed. Short circuit electric arcs are usually caused by a short circuit between the electrical lines. The GS-ET 29 test principle is an additional requirement for the testing and certification of electrician face protection. These visors are a category 3 product, which means there is a risk of physical injury and

death. With regards to different intensities of short circuit electric arcs, the certified products must be assessed for their suitability for the respective application. Here, there are distinctions between two classes, Class 1 – up to 4 kA – and Class 2, up to 7 kA.

## Certification according to GS-ET 29

Previously

According to 7 kA short  
circuit electric arc

\*It is obligatory to use an additional illumination, to reach a minimum illuminance of 30 lux behind the faceshield.

# Visors and face protection

## uvex pronamic visor system

The first sustainable visor system - uvex pronamic. For this visor we rely on a mass-balanced polycarbonate for our visor lens and a recycled plastic made of high-quality post-industrial and post-consumer materials for the visor arms. The result: reduction in CO<sub>2</sub> emissions by over 50% for 100% protection.

### Unique uvex click & pull system

The visor can be pulled off the connection system at any time and reattached with a click - perfect for making the helmet a little easier to use when the visor is not needed.

The anti-fog and scratch-resistant visor is made of high-quality, mass-balanced polycarbonate that meets the highest optical quality class. The anti-fogging properties are permanent, even after repeated cleaning. Easy to clean thanks to non-stick nanotechnology. All lenses offer UV 400 protection. The visor fits the helmet seamlessly, leaving no gaps. The injection-moulded transparent peak provides protection against any particles penetrating the inside of the visor.

Suitable for areas of application 3 (liquids) and 9 (molten metal and hot solids). SLB 1 and SLB 2 visors for protection from electrical arcs certified in accordance with GS-ET 29.

Change of lens is possible for an even more sustainable and durable product

uvex earmuffs can be attached to the helmet and removed at any time via a bayonet connection.

The visor can be locked above the helmet shell when not required and the hearing protection can be folded back. Everything fits closely to the helmet and is perfectly balanced over the body's centre of gravity. This means the neck muscles are not placed under strain by any unnecessary weight, ensuring excellent wearer comfort and maximum freedom of movement.

All visors come pre-assembled with a helmet adapter. This is clicked into the side helmet slot and remains attached there. The visor and visor arm can be removed from the helmet at any time.

# Visors and face protection

## uvex pronamic visor system

The uvex pronamic half visor completes the pronamic visor family. With two different lens tints, it offers optimum protection and, because of its design, it allows prescription spectacles to be worn at the same time.

If the visor is not needed, it can be locked above the helmet shell, ensuring excellent wearer comfort and maximum freedom of movement.

The polycarbonate half visor has an anti-fog and scratch-resistant coating. Thanks to its design, it offers enough room to wear prescription spectacles as well. The injection-moulded transparent peak fits the helmet seamlessly and provides protection against any particles penetrating the inside of the visor.

The Euroslot remains free for the use of earmuffs or other accessories.

All visors are pre-assembled with a helmet adapter. This is clicked into the front side helmet slot and remains attached there. The visor can be removed from the helmet at any time thanks to a push button.

# Visors and face protection

uvex vimox visor system

## One for all - uvex comfort for a wide variety of helmet models

Don't use a uvex helmet, but still want our unique lens technology? Then uvex vimox is the solution for you. Because we're bringing the most popular features of our visors to (almost) all common helmet models on the market.

Outstanding ergonomics are at the heart of every single product we develop. A comfortable fit should provide the wearer with relief. That's why we integrated a key feature of our pheos visor range into the uvex vimox visor system - the resting position.

If the visor is not actively in use, it can either be removed completely using the uvex click & pull system or alterna-

tively pushed into the resting position - no matter which helmet the vimox is used with. The optimal centre of gravity is located in the middle of the head to support the natural posture of the neck and significantly reduce strain.

### Unique uvex click & pull system

The visor can be pulled off the connection system at any time and reattached with a click.

### Intelligent connection system

The uvex vimox's unique connection system optimally adapts to a wide range of helmets and is easy to fit. Simply snap it onto the front brim of your helmet, secure it and you're on your way.

### Extra clarity

Our extra-large visor lens offers maximum all-round visibility and is even scratch-resistant on the outside and anti-fog on the inside thanks to the uvex supravision excellence coating. UV 400 protection and the highest optical class are included as standard.

### Additional protection

Every helmet is different. The additional soft sealing lip means that the vimox always seals completely on a variety of helmets - so nothing can come between the helmet and visor.

### Secure hold

The durable non-slip elastic strap provides a secure fit on any helmet and can be easily adjusted in size.

### Ready to try one for all?

Over 20 helmets are compatible with the uvex vimox. Find out here if your current helmet is among them.

# Visors and face protection

## uvex vimox visor system

### Click & pull system

The visor arm and the visor lens can be detached from the connection system via a lateral pull movement. Ideal for making the helmet a little easier to use when the visor is not needed.

### Ergonomic relief

If the visor is not needed, it can be pushed out of the field of vision into a resting position. The visor then rests in a well-balanced and ergonomically secure position on the helmet.

### Smart lens changing system

If the visor is damaged or has been in use for too long, it can be removed from the connection system by means of a screw and replaced.

# Visors and face protection

## uvex pheos visor system

### uvex pheos visor

- polycarbonate visors with uvex supravision excellence coating technology
- visor is anti-fog on the inside and exceptionally scratch- and chemical-resistant on the outside. The anti-fogging properties are permanent, even after repeated cleaning
- easy to clean thanks to non-stick nanotechnology
- available with two mounting options: mechanical levers or automatic magnetic locks

- visors 9906002, 9906003 and 9906009 can be combined with the industrial protection helmets:
  - uvex pheos B-S-WR
  - Helmet for working at height uvex pheos alpine (visor adapter art. no. 9790067 required)
- visors uvex pheos SLB 1 (9906005 and 9906006) and uvex pheos SLB 2 (9906007 and 9906008) can be combined with the uvex pheos E-S-WR industrial safety helmet

- lenses can be changed
- fulfils standards EN 166 and EN 170
- certified for areas of application 3 (liquids) and 9 (molten metal and hot solids)
- uvex pheos SLB 1 visors are certified in accordance with GS-ET 29 as Class 1 visors for protection from electrical arcs (4kA)
- uvex pheos SLB 2 visors are certified in accordance with GS-ET 29 as Class 2 visors for protection from electrical arcs (7kA)
- you can find the combination options on the next page (on page 148)

### Perfect 'resting position' for the visor and hearing protection

The visor can be locked above the helmet shell when not required and the hearing protection can be folded back. Everything fits closely to the helmet and is perfectly balanced over the body's centre of gravity. This

means the neck muscles are not placed under strain by any unnecessary weight, ensuring excellent wearer comfort and maximum freedom of movement.

### Reliable face protection

The anti-fog and scratch-resistant visor is made of high-quality polycarbonate that meet the highest optical quality class. The visor fits the helmet seamlessly, leaving no gaps.

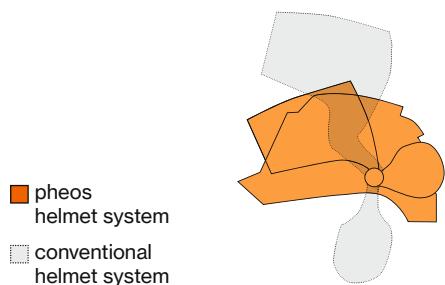

The injection-moulded transparent peak provides protection against any particles penetrating the inside of the visor.

### Magnetic and mechanical locking system

All visors are pre-assembled with a helmet adapter. This is clicked into the side helmet slot and remains permanently attached there. With the magnetic locking system, the attachment parts, visor and earmuffs can be removed easily at any time without having to remove the helmet. The visor is released with a click of the lateral locking system. When re-assembled, the parts automatically snap back

into place. This allows the helmet to remain comfortably on your head.

If the product is equipped with a mechanical locking system, the earmuffs can be removed at any time via a bayonet connection. The mechanical visor remains permanently attached to the helmet.

**Magnetic**  
locking system for visors and earmuffs with a magnetic connection

**Mechanical**  
locking system for visors and earmuffs with a bayonet connection

# uvex pheos faceguard

## Face protection system

This innovative face protection system consists of a height- and width-adjustable head strap and a choice of two different visor lenses. The high-quality polycarbonate visor features uvex coating technology to ensure that the wearer's field of vision remains fog-free for a long period of time and that the outside of the visor is scratch-resistant. The mesh visor is made of robust stainless steel and provides reliable protection when working outdoors. The earmuffs can be attached and removed quickly using a rotating mechanism. The system can be expanded with a wide range of accessories and adapted to suit the application.

### The uvex multi-system in detail

#### The benefits of the uvex pheos faceguard at a glance:

- fully pre-assembled face protection system — ready to use at any time
- wide field of vision with the highest optical quality
- robust polycarbonate visor with anti-fog and scratch-resistant uvex supervision excellence coating or stainless steel mesh visor
- low weight and balanced centre of gravity to relieve the spine

- expandable system with high modularity
- unique combination: visor and bump cap
- replaceable individual parts
- comfortable fit even with glasses and respirators

## Face protection system

### Designed to protect the face and neck

The uvex pheos faceguard has been ergonomically designed. The face protection system has been designed to evenly distribute the weight across the body's centre of gravity. The low weight and ergonomic centre of gravity supports a natural head posture, minimising strain on the neck and back. The narrow design and wide field of vision help to support the natural posture of the head and neck.
