uvex i-gonomics

Measurable stress reduction for safety goggles

The innovative uvex i-gonomics product system sets new standards in ergonomics, delivering perfect fit, light weight and optimum temperature. Goggles are comfortable and remain fog free even during periods of physical exertion which increases wearer well-being and enables you to get on with the job at hand.

uvex u-sonic

The uvex u-sonic innovative soft seal adapts to the face for a customised, non-irritating fit without pressure points. The unrivalled anti-fog lens coating ensures that the compact wide-vision goggle boasts an impressive RI value of 4.40 in comparison with other wide-vision safety eyewear.

force

- Test method: tensile force of headband*
- Test result: seal pressure: 21 N (IV 4.2)

• **Perfect fit without any irritating pressure points**

* independently tested by the Chemnitz Technical University

Relief-Index

4.40

The relief index is calculated using the mean value of the three index values (IV) for force, weight and temperature – ranging from 0 (= poor) to 5 (=perfect).

weight

- Test method: weighing the product
- Test result: product weight = 69 g (IV 4.2)

• Comfortable to wear, reducing onset of fatigue

clima

- Test method: uvex "Anti-fog" benchmark test
- Test result: AntiFog performance = 29 points (IV 4.8)

• Fog-free view even under extreme conditions

cold -20°C

uvex supravision plus

Core Coatings

uvex supravision sapphire

Coated lenses are extremely scratch resistant on both sides and offer excellent resistance to chemicals. The coating system, which has been enhanced using nanotechnology, offers significantly increased non-stick properties and subsequently are easier to clean. Aqueous and oily dirt can be removed effortlessly.

uvex supravision excellence

Coated lenses are anti-fog (for at least 16 seconds) on the inside, while the outside offers extreme scratch and chemical resistance. The anti-fogging properties are permanent even after repeated cleaning. The lenses are also easy to clean and less susceptible to dirt due to the non-stick nanotechnology.

uvex supravision plus

Coated lenses have advanced anti-fog performance (at least 30 seconds) on both sides, scratch-resistant and antistatic. The anti-fogging properties are permanent, even after being repeatedly cleaned. This lens coating is suitable for areas with high humidity.

Coating technology

dirty

Find your perfect coating

1. Select the temperature which best represents your working environment on the horizontal temperature axis.
2. Define the air humidity of the surroundings in percentage terms and find the figure on the diagonal axis.
3. Determine the degree of dirt on the vertical axis.
4. Join these three points to form a triangle.

The part of the triangle with the largest area will show you the appropriate coating for your defined area of use.

uvex supravision sapphire

hot +35°C

wet 100% RH

Special coatings

uvex supravision extreme

Coated lenses are scratch-resistant on the outside and permanently anti-fog on the inside. Lenses will not fog up as the coating never reaches the point of saturation. Ideally suited for workplace environments with long-lasting exposure to condensation and a high degree of dirt.

uvex supravision variomatic

Coated lenses are self-tinting filters, which automatically become darker when exposed to UV (within 10 seconds) and become lighter when exposure is reduced (after 30 seconds). Now available with the tried and tested uvex supravision excellence technology (permanently anti-fog on the inside and extremely scratch-resistant on the outside). Particularly suitable for workplaces where you frequently move between indoor and outdoor environments, from light to dark.

uvex supravision clean

Coated lenses are autoclavable and resistant to chemicals. Anti-fog on the inside, extremely scratch-resistant on the outside. The anti-fog properties last for at least 10 autoclave cycles. The coating ensures complete fog protection and maximum vision.

uvex infradur

Coated lenses are scratch-resistant on both sides and minimise damage from welding sparks.

uvex infradur plus

Coated lenses are anti-fog on the inside, extremely scratch-resistant on the outside and minimise damage from welding sparks.

Lens tinting

Characteristics

CLEAR

Protection: UV/markung: 2(C)-1.2
Transmission: approx. 91%
Standards: EN 166, EN 170

Anti-glare mechanical hazard protection

AMBER

Protection: UV/markung: 2(C)-1.2
Transmission: approx. 88%
Standards: EN 166, EN 170

Anti-glare mechanical hazard protection with **contrast adjustment**

LIGHT BLUE

Protection: UV/markung: 2(C)-1.2
Transmission: approx. 85%
Standards: EN 166, EN 170

Protection **offering relaxing, focussed vision**

AR (anti-reflective)

Protection: UV/markung: 2(C)-1.2
Transmission: approx. 96.5%
Standards: EN 166, EN 170

Optimum **anti-reflective** protection with high degree of light transmission

SILVER MIRROR 53%

Protection: UV/markung: 5-1.7
Transmission: 53%
Standards: EN 166, EN 172

Protection in **changing light conditions**

SILVER MIRROR 12%

Protection: UV/markung: 5-3.1
Transmission: 12%
Standards: EN 166, EN 172

Protection from both highly **artificial and natural glare conditions**

POLAVISION

Protection: UV/markung: 5-3.1
Transmission: 14%
Standards: EN 166, EN 172

Reduction of irritating surface reflection by **filtering scattered light**

GREY 14% / GREY23%

Protection: UV/markung: 5-3.1/5-2.5
Transmission: 14%/23%
Standards: EN 166, EN 172

Protection against **natural glare** with **signal colour recognition**

BROWN

Protection: UV/markung: 5-2.5
Transmission: 20%
Standards: EN 166, EN 172

Protection against **natural glare** with **signal colour recognition** and **increased contrast effect**

VARIOMATIC

Protection: UV/markung: 5-1.1<2
Transmission: 12-86%
Standards: EN 166, EN 172

Fast accommodation of changing UV irradiation conditions: automatic lens darkening (10 s) and lightening (30 s)

WELDING PROTECTION, GREY

Protection: UV/welding shades: 1.7/3/4/5/6
Transmission: 1 - 43%
Standards: EN 166, EN 169

Protection against **IR and UV irradiation (glare)** with **perfect colour recognition**

UV PROTECTION

uv-ex = ultraviolet excluded
Direct integration of UV absorption filters in the raw material 100% protection against UV irradiation up to 400 nm. All uvex lenses offer 100% UVA, UVB and UVC protection.

Safety spectacles – matching your corporate identity

Eye protection with “personality”

Give your team an unmistakable image: uvex safety glasses offer various options for individual design – from printing your company’s logo on the side arms to frames in your company’s colours. You can coordinate your protective equipment perfectly with your corporate identity.

Frames in the company colours

“Your” safety spectacles are recognisable at first glance: the frames are designed in your company colours.

Insert in the side arms

Adding your company name to the soft components of the side arms is bespoke and subtle.

Pad printing on the side arms

(1 to 4 colours)

The direct pad printing process is recommended for printing your logo in colour on the side arms.

How individual can you be?

We are happy to advise you personally on the technical options for customising our safety glasses. You can also use our online product configuration tool at

www.uvex-safety.com/configurator

(or scan the QR code).

You can choose and design the required spectacles model online here.

Please note that the following minimum quantities must be ordered:

- Pad printing – minimum of 500 pairs
- Insert/customised corporate colouring/individual headband/laser engraving – minimum of 5,000 pairs
- Customised accessories on request

Customised accessories

Have your logo printed on your spectacle case.

Laser engraving on the lens

Safety spectacles will retain 100% of their functionality even with customised laser engraving.

Headband embroidery

Customise your spectacles by having your corporate logo embroidered on the headband.

Labelling and norms

Marking on frame

Symbol for resistance to high speed particles (where applicable)

Mechanical strength	
none	without mechanical strength (filters only)
S	increased strength (filters only)
F	low energy impact (45m/s)
B	medium energy impact (120 m/s)
A	high energy impact (190 m/s)

Field(s) of use (where applicable)

Designation	Description of application areas
none	General use Non specific mechanical risks, risks due to UV and/or visible IR light
3	Liquids Liquids (droplets and splashes)
4	Coarse dust particles Dust with > 5µm grain size
5	Gas and fine dust particles Gas, vapour, mist, smoke, and dust with < 5µm grain size
8	Short circuit electric arc Electric arc due to short circuit in electrical equipment
9	"Molten metal and hot solids" Splashes of molten metal and penetration of hot solids

uvex i-3 AR

Taking the wearer experience to a new level

Nose loops

The extremely soft adjustable Softflex nose loops ensure the spectacles do not slip at any point and sit comfortably on the nose.

Side arm inclination

The variable side arm inclination allows flexible adjustment to individual requirements and optimum coverage of the eyes. The Softflex ear pieces ensure a secure and pressure-free fit.

Coating

The anti-reflective coating on both sides provides 100% protection against UV 400 and a transmission factor of more than 96.5%, which means distracting reflections are effectively prevented.

Ensuring the eyes are also wide awake.

uvex i-3 AR are innovative safety spectacles with anti-reflective coating on both sides of the lenses. The high light conductivity ensures perfect vision at all times, for example when reading test parameters or working with highly reflective components. Strain on the eyes is reduced and the wearer will find it easier to focus.

These spectacles are particularly suitable for workplaces with a combination of artificial and natural light. In combination with exceptional wearer properties, this means the uvex i-3 AR has all the prerequisites of safety spectacles that people enjoy wearing. They always allow a clear view of what matters.

Transmission (transparency)

With the anti-reflective coating, the uvex i-3 AR reaches a higher transmission factor than safety spectacles with regular coating technology – ensuring perfect vision without reflections.

uvex super fit

- lightweight safety spectacles with hinged side arms, a sporty design and uvex x-stream technology
- maximum optical clarity thanks to extremely thin wrap-around lenses
- aerodynamically optimised lenses that are angled forwards to provide optimum ventilation and comfort around the eyes
- excellent wearer comfort guaranteed by the lightweight design
- permanent anti-fog coating on both sides – eliminating risk of fogging (uvex super fit ETC)

Areas of application:

- uvex supravision clean: sterile working environments (laboratories, hospitals, clean rooms, food production)
- ETC on both sides: high humidity and alternating temperatures (cold stores, tunnel construction, catering and food industry)

uvex ETC-coated lenses do not fog up. Instead of droplets, a film of water forms on the lens.

Anti-fog coating after 8 sec. uvex ETC

uvex CR

Autoclave safety eyewear that goes further

Innovative coating technology – the first autoclavable safety eyewear with anti-fog performance

uvex has developed the first autoclavable safety goggles with anti-fog coating for specialist requirements in laboratories, clinics, cleanrooms and food manufacturing. From ultra-light safety spectacles to goggles with a panorama lens, uvex CR is the ideal safety eyewear for all areas of application and specifically designed for repeated autoclave sterilisation.

uvex CR – professional safety eyewear which compliments hygiene standards.

uvex u-sonic

Perfect fit, light weight, optimal temperature

As a result of its ergonomic design with flexible soft components, uvex u-sonic adapts perfectly to any face shape – its low weight and the lack of pressure make comfortable for all day wear. The wide panoramic lens with unique integrated magnet technology allows a sun tint lens to be attached quickly and easily

Magnetic 'snap on' lens technology

attaches a sun tint lens in seconds (grey glare protection 16%).

Optimum wearer comfort

evenly distributed, low pressure seal guarantees good fit

Anti-fog lens coating

on the inside – uvex supravision coating technology

Scratch-resistant on the outside

thanks to uvex supravision coating technology

High levels of comfort

thanks to innovative ventilation system

High levels of compatibility with safety helmet

on account of its compact design

MADE IN GERMANY

A practical introductory seminar on the selection, use and benefits of protective eyewear

- The basic applications of safety eyewear, including which products protect against mechanical dangers, chemical and radiation risks (e.g. welding protection), and products designed for specialised applications
- Demonstration and assessment of the dangers posed by mechanical risks, infrared and ultraviolet radiation (e.g. encountered during welding applications or during the use of chemicals), illustrated by case studies
- Assessment of the risk of eye injury in the workplace
- Explanation of how these risks can be dealt with efficiently in each workplace
- Comprehensive overview of the requirements of industrial safety eyewear, standards, applications, risk assessment and how to care for protective eyewear
- Information on the classification of protection products based on their labelling and the areas of application of the various types of equipment

Target group

Those responsible for the work-related health and safety of employees within a company, e.g. health and safety officers, occupational nurses and specialist purchasers

For more information or to book a place, please visit uvex-academy.de, call +49 (0)911 9736 1710 or email academy@uvex.de

laservision

Innovative laser protection solutions

Rapid developments in laser technology mean that personal laser protection is becoming increasingly important. New laser applications in all areas of industry, research and medicine demand new and unique safety solutions. laservision, a member of the uvex group, is one of the leading global producers of laser protection products. It develops, manufactures and distributes laser protection eyewear, large-scale laser protection (mobile screens and safety curtains), small filters and cabin windows for all laser types and areas of use.

Laser protective spectacles and cabin windows

Based on physical properties, such as radiation intensity and focusing capability (spatial coherence), laser light is potentially very hazardous, particularly for the eyes. The valid laser protective norms (EN 207 and EN 208) and safety regulations (BGV B2) stipulating the wearing of laser safety eyewear are the response to such hazards. Laser safety eyewear with coated or absorbent special lenses and plastics is a core focus of the laservision product portfolio. With more than 30 years of experience of laser technology, laservision offers an extensive range of glass and plastic filter materials as windows for installation in machine housings, partitions and curtains.

Active protection systems

For automated laser processing operations, i.e. operations which are not under constant surveillance, to be classified as test class T1, European standard EN 60825-4 housing must maintain a survival rate of 30,000 seconds. However, where laser output and radiation intensity are constantly on the increase, rates of this order are no longer achievable with passive protection systems, particularly in the case of window materials. The newly patented active cabin window system from laservision provides the ideal and simplest solution to this problem in the form of integrated electronics installed within the safety circuitry of the laser system. When laser beams hit the plastic pane with enough output to activate the sensor integrated in the frame, the laser is immediately switched off before hazardous radiation can be transmitted through the pane. The system gives users a complete CE-certified class T1 system in line with the applicable machine construction directive. In combination with an active cabin wall system, this makes a complete and certifiable solution available for industrial high-performance laser units operating in the 820 to 1100 nm wavelength spectrum.

Screens

Alternatively, it is possible to screen out laser radiation by mechanical means and to protect potentially endangered personnel during laser operation. Screening against laser radiation may take the form of curtains, partitions or even fixed insulating walls. These can be installed in the workplace, or they may be integrated in machinery housing. laservision offers standard and customer-specific solutions for screening which comply with the applicable standards. On account of the wide range of possible materials and solutions, we advise our customers on their protection issues in their own premises in order to find the best possible solution.

Training

laservision, in cooperation with the uvex academy offers a programme of modular courses on laser safety. These feature compulsory annual laser safety training together with special courses for those responsible for laser safety, advanced customised seminars, an internship in laser safety and measuring techniques.

laservision is an active and knowledgeable partner for various National and International standards committees and takes part in domestic and international research projects in the field of laser safety in conjunction with research institutions.

Welding Protection

A new generation of welding protection eyewear available with different grey-tint lenses and protection classes. The innovative technology affords protection from UV and infrared light while maintaining perfect colour recognition in line with uvex sunglare filters.

The special uvex infradur plus coating has anti-fog properties which prevents the inside of the lenses misting up and the extreme scratch-resistance on the outside keeps damage from welding sparks to an absolute minimum.

With various welding safety spectacles and goggle solutions, there is something for everyone – enhancing comfort and the wearer experience.

N.B.: Do not use for electric welding.

New grey tint offers increased impact protection than traditional green welding tint products

IR/UV filter for improved safety

Sun/glare protection filters

Perfect colour recognition

Marking K and N for uvex infradur plus coated lenses

All welding products have polycarbonate lenses providing protection against impact as well as UV rays, IR rays and visible glare.

The products do not provide protection against laser beams!

For expert advice on safety and in selecting the right laser protection eyewear, talk to our specialists

Welding Protection

uvex i-vo · uvex super fit

uvex i-vo

- fashionable safety spectacles with adjustable side arms
- perfect colour recognition
- new filter technology combines UV and IR radiation protection
- minimum damage from welding sparks
- reliable protection provided by customised fit: multi-level side arm inclination and different side arm lengths allow the wearer to adjust the spectacles to suit their facial shape
- soft, uvex quattroflex arms and soft components at the nose and forehead for a comfortable, pressure-free fit
- the shape of the lenses offers unrestricted peripheral vision

uvex super fit

- low weight welding safety spectacles with hinged side arms in a sporty design
- perfect colour recognition
- new filter technology combines UV and IR radiation protection
- minimum damage from welding sparks
- ultra thin, wraparound lens delivers maximum optical clarity and an excellent field of vision
- low weight design for increased wearer comfort
- permanent anti-fog coating on both sides – eliminating risk of fogging (uvex super fit ETC)
- uvex x-stream technology – side arms graduate from hard to soft material for comfortable, non-slip fit

uvex eyewear case

- flexible case made from robust nylon material
- extendable zip on side to increase space
- individually adjustable velcro fastening
- comes with belt loop
- suitable for all spectacles

uvex eyewear case	
Art. no.	6118.002
Retail unit	1

uvex eyewear case

- flexible case made from robust nylon material
- individually adjustable velcro fastening
- comes with belt loop
- for goggle models uvex 9308 and uvex 9307

uvex eyewear case	
Art. no.	9954.650
Retail unit	5

uvex microfibre case

- elegant microfibre case
- for uvex spectacles models

uvex microfibre case	
Art. no.	9954.355
Retail unit	5

- elegant microfibre case
- for uvex goggles and overspecs

uvex microfibre case	
Art. no.	9954.360
Retail unit	5

uvex SECU box

- storage box for wall assembly
- for spectacles and goggles:
2 goggles or
3 spectacles or
1 goggles and 2 spectacles

uvex SECU box	
Art. no.	9957.502
Retail unit	1
