Safety through active lighting

High-visibility clothing that creates its own lighting

It's raining. It's dark. You can hardly see your hand in front of your face. But because you're someone who works for the emergency services, a road maintenance company or a construction site, you still have to get out there. Because you have your job to do. Your job is tough and the worse the visibility, the more dangerous it is. If you work outside in all weathers, you should ensure that you are always clearly visible.

uvex high-visibility clothing minimises the dangers. uvex has specifically designed the products in its protection active flash collection with light guides by OSRAM®. The result is self-illuminating jackets and vests that make sure you are visible in even the most adverse weather conditions.

What if you also need to cycle to and from work in these adverse conditions, in the dark or in the fog? An actively illuminated vest will keep you safe on your commute as well.

Visible advantages

Certified
High visibility
standard
20471

min.
20 wash cycles
guaranteed

Light guides
2,500 hours
guaranteed
service life

Sustainable
Battery life
8 hours

Low 5 V
for working safely
in wet conditions

EMC-tested
failure-free

100% visibility thanks to
large light guide surface

Safe use
in traffic

OEKO-TEX®
