

The image is a composite of three circular vignettes. The top-left vignette shows a satellite in space with its solar panels and a large dish antenna, set against the Earth's horizon and the blackness of space. The top-right vignette shows the nose and cockpit of a white commercial airplane inside a large, well-lit hangar with a high ceiling and structural beams. The bottom vignette shows a white commercial airplane in flight, banking to the right, with a sunset or sunrise sky in the background.

uvex safety programme

End-to-end support

Leveraging our deep technical expertise and decades of experience, we tailor safety programmes to meet each customer's specific requirements – enhancing protection, wearer wellbeing and PPE compliance. Our commitment to education and behavioural change also ensures that safety is embedded at every level, and by focusing on durable, high-performance products, we help reduce overall costs and support a more sustainable approach to workplace safety.

Key benefits

Lufthansa

uvex

Case study

The Technical Fleet Management teams at Lufthansa chose not to compromise when it comes to perfectly fitting hearing protection for all their employees. With a tailored hearing protection programme, employees can perform their jobs confidently while protecting their long-term hearing health.
