The uvex CO₂ footprint

List of calculated products

Content:

uvex safety eyewear

uvex hearing protection

uvex safety helmets

uvex respiratory protection

uvex safety gloves

uvex safety footwear

uvex prescription eyewear

How and why are we calculating the CO₂ footprint of our products?

To achieve our science-based climate targets and reach carbon neutrality by 2045, we must first gain a transparent understanding of the CO₂ emissions across our product portfolio.

We therefore calculate the carbon footprint of our products in accordance with ISO 14067, taking into account all materials, processing steps, transport routes, and packaging throughout the product lifecycle, up to and including disposal. We then use the results to identify specific reduction potentials. Additionally we support our customers in taking a holistic view of their overall corporate footprint.

You can find further information regarding our methodology at uvex-safety.ie/carbon-footprint
