

A man in his 40s or 50s with blue eyes is the central figure. He is wearing a grey UVEX safety helmet with the brand name on the front. His safety glasses are large, clear, and wrap around his face, with a blue UVEX strap. He is also wearing a dark grey or black work jacket. The background is a complex industrial setting with large pipes, metal scaffolding, and various mechanical components, suggesting a chemical or manufacturing plant. The lighting is bright, highlighting the man's face and the metallic surfaces.

uvex megasonic

Visionary technologies at a glance

The uvex megasonic features a revolutionary frameless lens design delivering edge-to-edge, crystal clear, optical class 1 clarity in every direction.

The panoramic lens is approximately 20% larger than similar goggles giving wearers as close to natural vision as possible, eliminating the need to take safety eyewear on and off when walking or moving between workstations. The sporty, ergonomic design and ultra-comfortable fit means these goggles both protect and allow you to get on with your day, without distraction.

uvex

uvex UV400

100% UV protection. 100% safety. 100% uvex.

The EN166/170 standard specifies safety eyewear should provide UV protection up to 380 nm. The WHO* and latest scientific studies state that this level of protection is insufficient and recommend safety eyewear lenses provide UV protection up to 400nm covering UVB and UVA rays.

“The reasons why the WHO recommends UV400 protection are clear. The outer tissues of the eye, cornea and lens fully absorb UV light. While UVB light primarily damages the genetic material, UVA rays penetrate deeper, cause thermal damage and magnify the effects of UVB light.”

Univ.-Prof. Dr. rer. nat. Olaf Strauß

uvex UV400 – included in all uvex safety eyewear

Regardless of whether you choose a clear or tinted lens, all uvex safety eyewear has UV absorption incorporated in the lens which filters 100% of UV rays up to 400nm. uvex which stands for **ultraviolet exclusion**, prides itself on delivering the best possible protection together with top-quality lens coatings, incredible comfort and stylish designs.

Even without sun, UV rays can still put strain on the eye

When working outdoors, your eyes are regularly exposed to harmful UV radiation – even when it is cloudy. The result: using insufficient protection may cause dangerous long-term damage such as corneal injury, cataracts and loss of sight.

100% protection against dangerous UVA and UVB radiation

For the eye and surrounding skin

uvex UV400 offers complete protection against UVA and UVB radiation as well as high-energy visible light (HEV) up to a wavelength 400 nm.

uvex UV400 not only filters 100% of UVA rays (20% still passes through 380 nm lenses), it also completely minimises temperature-induced cell changes – a factor which increases tenfold in the percentage of total cell damage in the range from 380 to 400 nm. In addition, the dangerous, damaging blue light content (HEV), which is also harmful to the retina, is reduced by 15%.

uvex safety eyewear,
100% safety.
