Training and Support Solutions

Our customer promise

To provide our customers with the information and support required to optimise 'fit for purpose' product selection, which delivers:

Our Background

uvex is committed to the design and manufacture of personal safety products which respect the maxim that 'one size does not fit all' - enabling Personal Protective Equipment (PPE) solutions to be tailored to individual requirements - delivering absolute consistency of protection and performance levels.

We surround our products with an array of services which support PPE decision makers in selection and safety strategy implementation ensuring that PPE wearers derive maximum benefit in terms of protection and 'issue free' wearability.

Training Delivery

Our support team operates without geographic limitation and is highly skilled in developing and delivering a range of support specific to individual customer requirements.

Safety Strategy Implementation

Best Practice Workshop

- Relevant examples of best practice supporting product introduction
- Managing resistance to change
- Delivery of communication content

Product Implementation Plan

- Structured support programme
- Multi-locational
- Message content and delivery
- Product wearer trials
- On hand to address teething problems
- Training and education
- Issue management

Customised Training

Wearers and Supervisors

- Personal Protective Equipment (PPE)
- Customer PPE goals
- Why PPE makes sense
- Regulation and Standards
- Products: features, benefits, basis for selection, care, maintenance and wearability
- Parallel best practice
- Soft copy / hard copy
- Train the Trainer / Supervisor
- Higher level content

uvex academy - Germany

- Manufacturing process - uvex PPE - building confidence and awareness of available technology
- EN test laboratory - real time access to test standards for PPE

On Site Services

Multi-location Support

- Customised toolbox talks
- PPE implementation support
- Visual/graphic message boards
- Wearer issue resolution

uvex Chemical Expert System

Extensive web-based chemical database that provides you with product solutions and permeation times based on your chemical use.

- Easy access with:
 - Quick search
 - Advanced search (multiple chemicals)
 - Customised log in facility
