

For best results, we recommend to follow the instructions of use:

- Clean the glasses beforehand
- Simply wipe both sides of the lens with the uvex antifog cloth using 5-10 circular motions
- Cleaning your glasses with a standard lens cloth will affect the anti-fog performance and will need reapplying

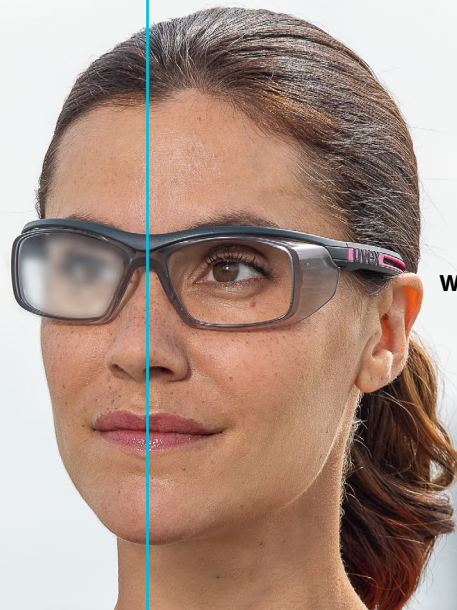

60x

- **Cost effective** - reusable up to 60 times
- **Long-lasting** - 8 to 10 hours of anti-fog performance depending on environmental factors
- **Easy to store** - in zip bag provided, ideal for a pocket, bag or tool box

- **Less waste** - minimises waste compared to single use alternatives
- **Reusable** - once its finished its lifecycle you can use it as a general cleaning cloth

uvex antifog cloth

The affordable anti-fog solution

The uvex antifog cloth provides an ideal solution for those who wish to benefit from uvex's anti-fog technology as and when they need it.

Simply wipe the cloth over your lenses and an ultra-thin layer of uvex's unique anti-fog formula is applied to the lens preventing them from misting up. The uvex antifog cloth can be used on any lens: prescription glasses, sunglasses, industrial and sports visors, goggles or screens, and is ideal for mask wearers. The uvex antifog cloths are individually wrapped so they can be carried in a handbag, toolkit or in the glovebox so you can administer anti-fog protection whenever it's needed.
