

Arch support insoles for uvex 1 and uvex 2

**LOW**

Art.No: 9528.1  
Sizes: 35-52

**MEDIUM**

Art.No: 9528.2  
Sizes: 35-52

**HIGH**

Art.No: 9528.3  
Sizes: 35-52

**climazone**

Walking or standing on hard and flat surfaces can put strain and pressure on the arches of our feet. Arch pain is generally caused by the pronation of our feet. Pronation relates to the rolling motion of the foot as we walk or run, if you over-pronate or under-pronate, pressure and forces can become unevenly distributed across the foot – causing pains in the arch of the foot. Insoles that effectively support foot arches can help ease discomfort by distributing the body weight evenly across the foot.

uvex tune-up arch support insoles provide support and comfort to the arch of the foot. They can help realign the foot's natural position helping to reduce foot, back and knee pain and also help avoid fallen arches.

- Three different arch support versions: High, Medium, Low
- Very good cushioning for comfort underfoot
- Reduces symptoms of fatigue
- Prevents pressure points
- Breathable fabric that absorbs moisture
- Antibacterial
- Antistatic
- Suitable for ESD footwear
