wherever you perform

In the wild or amidst the urban jungle. During training or leisure time. Sharp vision is essential. This ensures safety, improves performance and enables you to achieve your best. uvex sportstyle RX prescription sports glasses are the ideal companion for whatever you have planned. Materials finished to a high quality, innovative technologies and state-of-the-art safety standards offer the best protection. And the excellent design ensures the perfect look. More vision. More achievement. Safety while you perform.

uvex sportstyle RX

Prescription sports glasses

uvex sports glasses with personalised prescription lenses enable you to see clearly right to the edge. Better vision means greater safety and enjoyment enabling you to perform. The collection includes full-frame versions for direct prescription lenses (RXd) as well as rimless versions for indirect prescription lenses (RXi/RXs) with the innovative uvex clipnetic technology. All glasses and frames are shatterproof for optimal protection.

#whereveryouperform

uvex sportstyle RX models

Direct (RXd) and Indirect (RXi/RXs) prescription lenses

uvex sportstyle RX glasses are made exclusively from impact-resistant material and offer maximum protection for ambitious athletes. The collection comprises 12 models in different colour variations – 7 direct prescription lens (RXd) and 5 indirect prescription lens (RXi/RXs) models. On RXd models, standard, non-prescription sun protection lenses are replaced by your prescription lenses. On RXi/RXs models, by contrast, optical lenses are fitted into an insert and this is integrated into the glasses with uvex clipnetic technology.

1

Frames made from shatter-proof plastic. Wrap-around styles provide a wide field of vision, right up to the edge, and offer additional protection from draughts, dust and particles.

2

Impact-resistant polycarbonate lenses, fully coated. Available with single vision and varifocal lenses. Also mirrored, contrast-enhancing, polarising and self-tinting. 100% protection against harmful UV radiation up to 400 nm. For RXi/RXs, also with interchangeable lenses.

3

Adjustable non-slip earpieces and nose pads.

3

X

NEW

Material Bio-based plastic

New uvex sportstyle RX frames are made of up to 45 percent bio-based plastic. We use renewable material from the castor oil plant – not crude oil. In doing so, uvex is embracing resource-saving production.

lens tech

See everything: on trails, on runs, outdoors and during leisure time

Lens technology is the brand DNA of uvex. Based on in-house engineering and in-house production. High-tech products, quality and perfect vision are guaranteed.

colorvision variomatic

Note: The lenses are available with various lens options. See marking.

uvex sportstyle RX: Prescription sports eyewear

- Sports glasses individually adapted to your prescription
- High-definition (HD) prescription safety lenses with the latest Freeform technology
- Perfect vision right to the edge

uvex polavision®: glare-free and relaxed on the go

- Reduces distracting reflections
- Minimises eye strain and glare
- See more detail even in low light conditions

uvex variomatic®:
ultimate comfort

- Automatic, continuous self-tinting
- Three levels of protection in a single pair of glasses (cat. 1–3)
- From light to dark in a few seconds

uvex colorvision®:
Wow effect included

- Ultimate contrast enhancement
- Maximum colour recognition
- 100% UVA, UVB and UVC protection up to 400 nm

uvex colorvision®

More contrast
More detail
More to see

uvex colorvision® lens technology is designed specifically for the visual requirements and light conditions of different surroundings and sports.

lens tech

colorvision outdoor

Improved depth perception through the optimised contrast makes potholes, boulders or dangerous uneven ground more visible. High contrast – more detail.

Mountain biking // Climbing //
Trail running

colorvision daily

The daily colour filter makes your everyday life a whole new experience. Natural colours are rendered more clearly and shine with a new brilliance. Comfortable, stylish, trendy.

Running // Biking // Water Sports

colorvision urban

The urban colour filter helps to quickly identify traffic lights or brake lights, which can lead to faster reaction times. See better, react faster, ride safely.

E-Bike // Road Bike // City Running

colorvision nature

The nature colour filter makes outdoor sport a new experience. It ensures clear contours and enhances nature's brilliant colours. Sharp vision. Strong colours. More detail.

Golf // Hiking // Winter Sports

colorvision variomatic®

A perfect match: uvex variomatic® meets uvex colorvision® technology. Each lens comes with automatic lens tinting and optimal contrast enhancement to create the perfect visual experience.

A photograph of a forest stream. The water flows over dark, moss-covered rocks. A small, thin tree stands in the middle of the stream. The background is filled with dense green foliage, creating a vibrant and natural setting.

protecting planet

A promise to people and the environment

We have been protecting people in sports, leisure and at work since 1926. “protecting people” is our mission. “protecting planet” is the natural continuation of this mission when it comes to treating people, society and nature responsibly. With “protecting planet”, we have created a label that offers maximum transparency and information about our sustainability activities: from resource-saving products and innovative measures in our factories through to social commitment and social projects.

Michael Winter
Managing Partner of the uvex group

uvex sportstyle RXd planet

Sustainable protection

Recycled material

100% performance

For anyone wanting a little more, uvex sportstyle RXd planet is an important part of the uvex protecting planet product range.

#protectingplanet

In the interests of sustainability, no paint or polish has been applied to the frame.

Shatterproof frames made of materials recycled from production processes in the airbag industry

Lenses made from bio-based polyamide

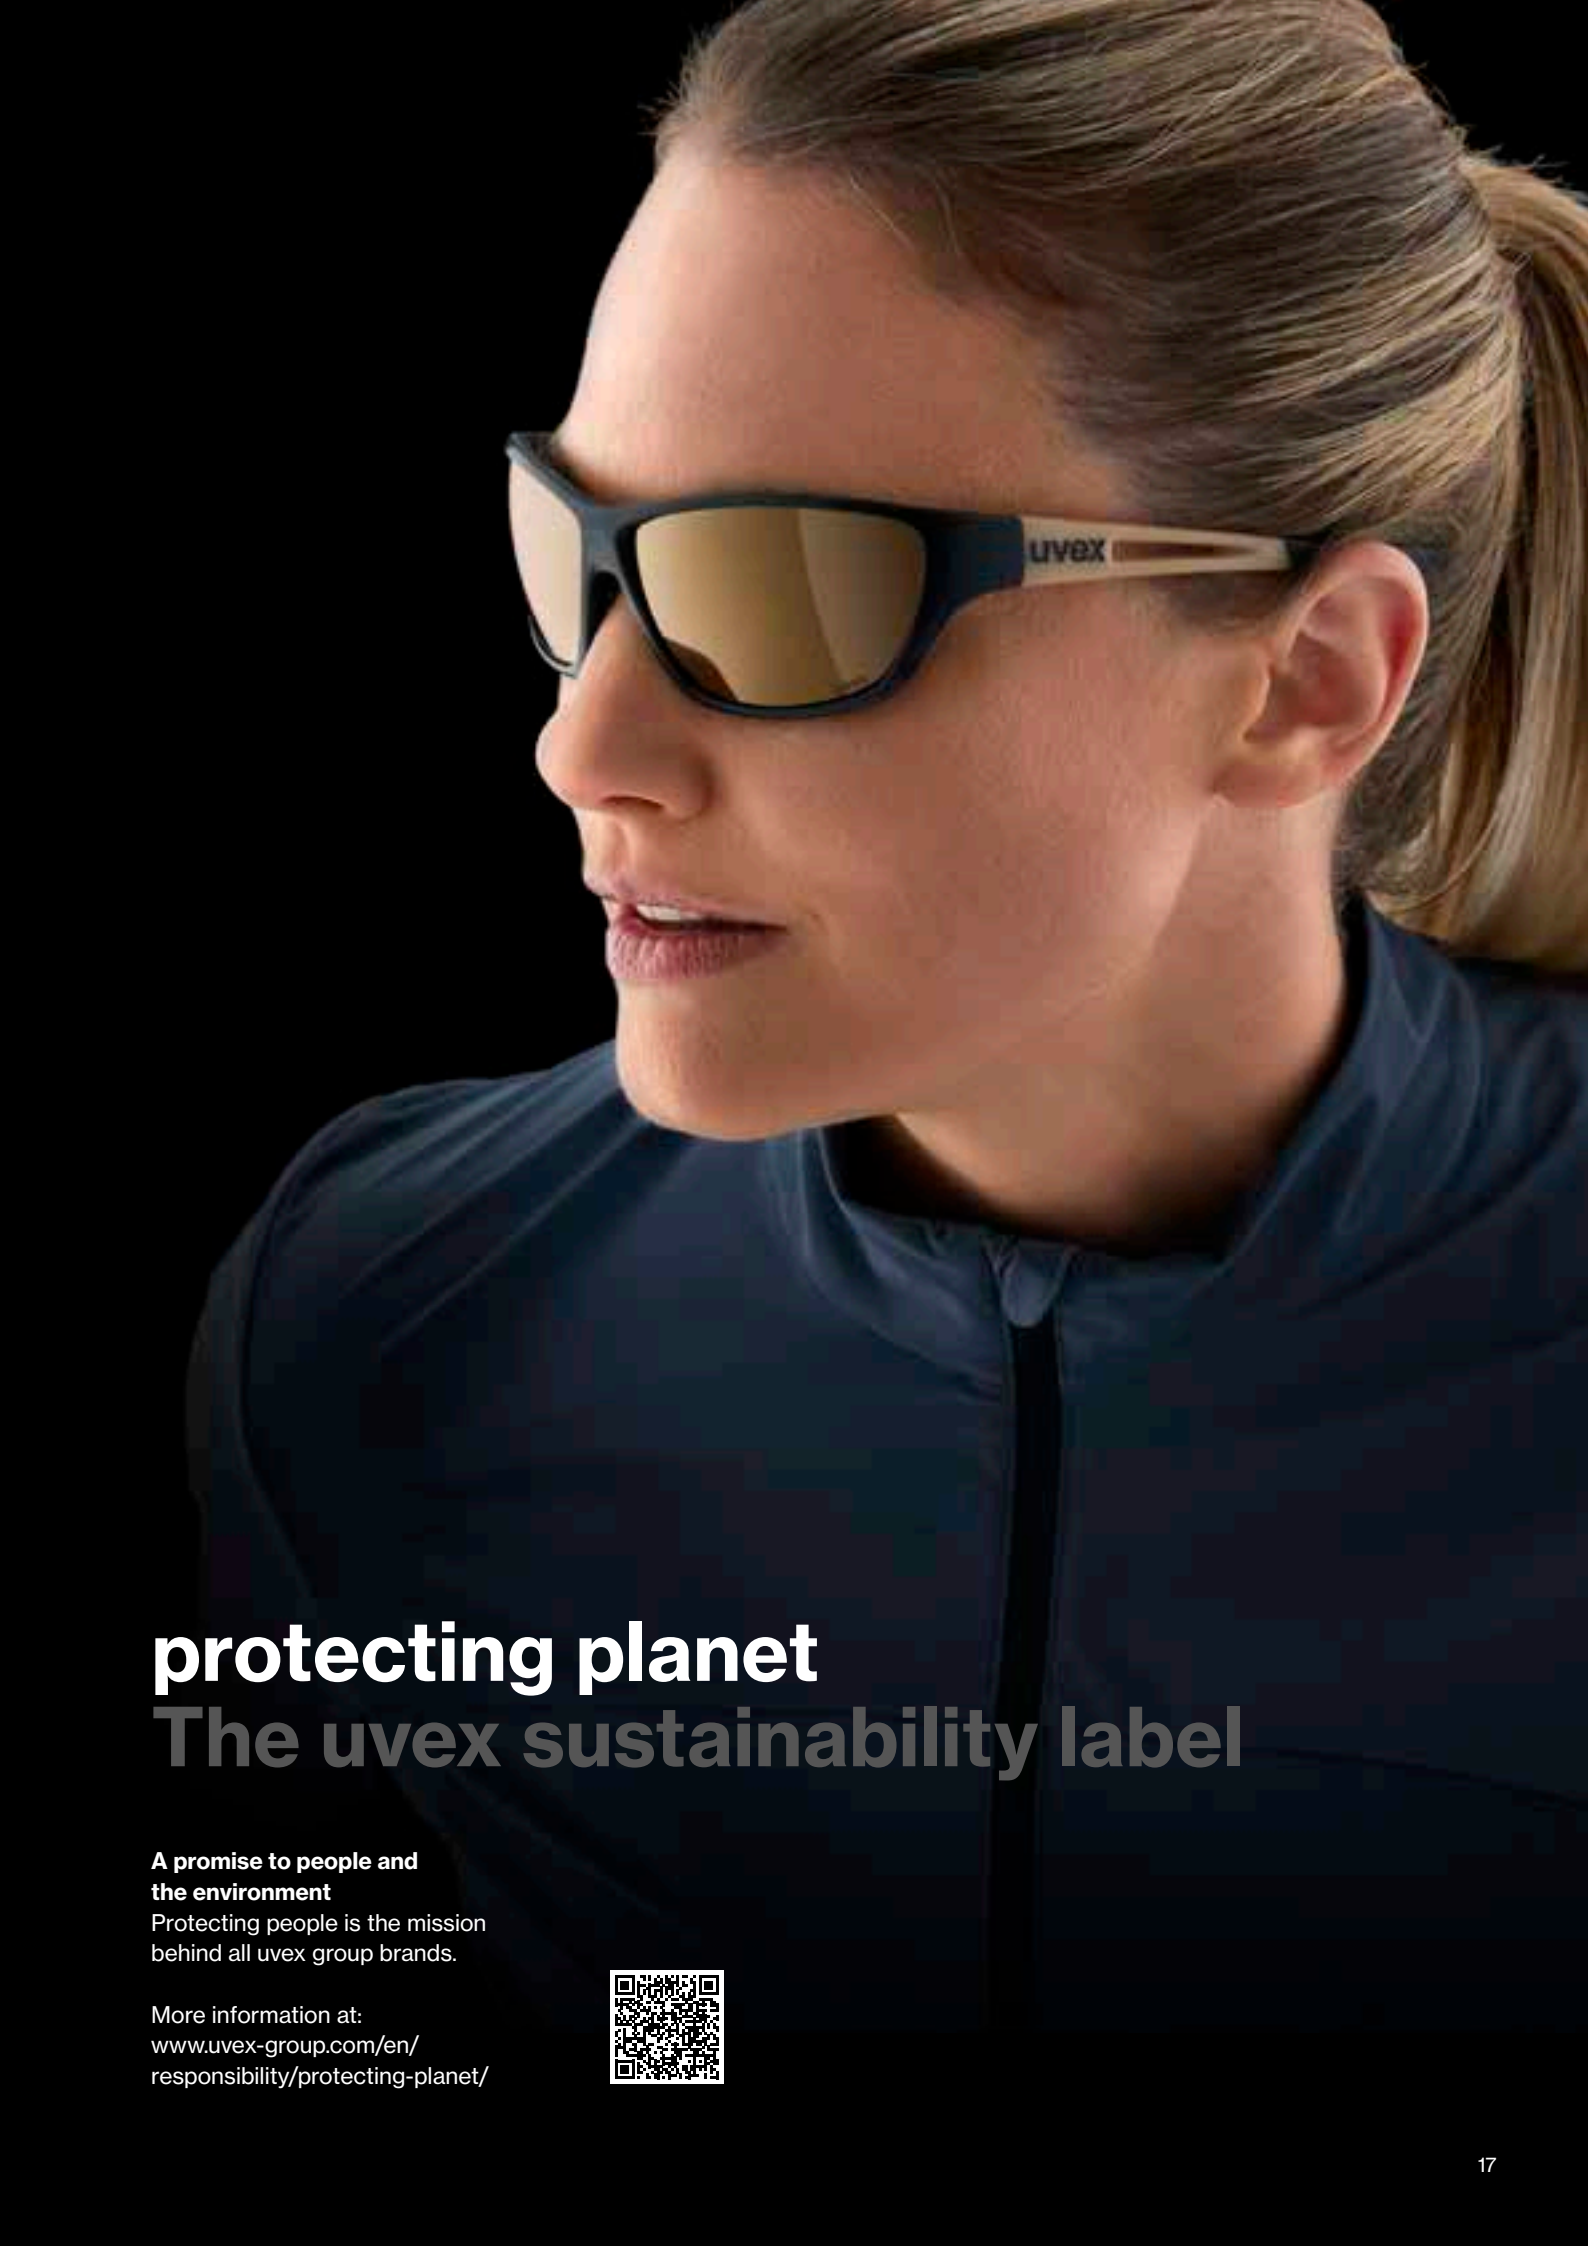

100% recycled paper packaging. Printed with soy ink

 **protecting planet**
by using recycled material //
by using bio-based material

 **protecting planet**
by using environmentally-
friendly packaging

In order to conserve resources and protect the environment, the uvex group processes various types of recycled materials. Residual materials (recycled materials) from production processes in the airbag industry are used and recycled for the shatterproof frames of the uvex sportstyle RXd planet. The lenses are produced from bio-based polyamide, based on castor oil.

As part of its sustainability strategy, the uvex group has set itself the aim of continuously increasing the proportion of environmentally friendly packaging. The packaging of the uvex sportstyle RX planet is made from recycled paper. The long service life helps to reduce waste and conserve resources. All uvex sportstyle RX packaging is printed with bio-based materials and soy ink.

protecting planet

The uvex sustainability label

**A promise to people and
the environment**

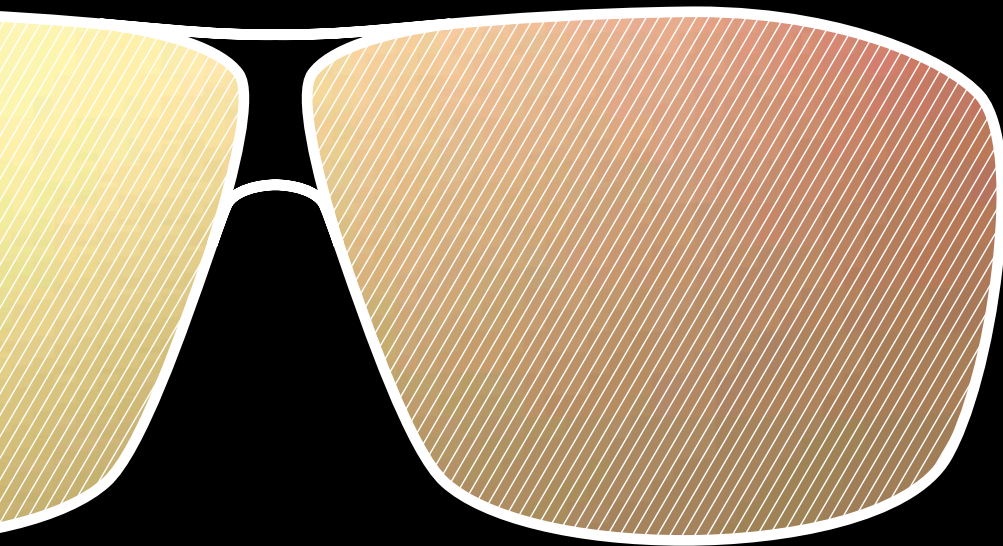

Protecting people is the mission
behind all uvex group brands.

uvex sportstyle RXd

Direct prescription lenses

A highly curved frame offers a great fit and excellent protection from wind, dust and flying objects. For the prescription lenses of the wrap-around style frames, we only use HD lenses made from extremely impact-resistant plastic materials and with the corresponding base curve. To guarantee an unrestricted field of vision, the corrective value is calculated based on the curve of the lens in front of the eye. The lenses are then produced in line with the resulting, compensated values. We can also incorporate further individual parameters such as corneal vertex distance and frame lens angle, as well as the wearer's head and body position during a sporting activity.

uvex sportstyle RXi/RXs

Indirect prescription lenses

Thanks to the state-of-the-art clipnetic technology – with patent application pending – the magnetic prescription insert can be quickly and easily attached to the rimless uvex sportstyle RX frames. The prescription insert can be fitted and removed in an instant, making it easy to clean the glasses and the prescription lenses. The uvex RXi/RXs models are supplied with a nose bridge for changing the lenses. This feature allows the glasses to be used without prescription lenses or worn with contact lenses.

uvex sportstyle RXd 4001
uvex colorvision nature lens

uvex sportstyle RXd 4000

The rugged uvex sportstyle RXd 4000 with base curve 6 is also suitable for higher dioptré values. It provides reliable protection for the wearer during many activities. Soft nose pads and earpieces ensure uncompromising comfort.

- Shatterproof plastic frame
- Adjustable, soft nose pads
- Adjustable and non-slip earpieces
- 100% UVA, UVB and UVC protection up to 400 nm

uvex sportstyle RXd planet

Sustainable protection

The uvex sportstyle RX planet line – engineered in Germany – is made of recycled material from the airbag industry and with bio-based lenses (with 100% UVA, UVB, UVC protection up to 400 nm). There are two frame models (uvex sportstyle RXd 4001/4003 planet) in the colour option black matt/natural brown. Due to their classic shape with base curve 8, the shatterproof uvex plastic frames of the planet line offer a wide field of vision and high wearer comfort is guaranteed by the soft, adjustable nose pads and non-slip earpieces. In the interests of sustainability, no paint or polish has been applied to the frame. Each piece is unique and what's more: the environment is protected.

uvex colorvision® variomatic®
uvex variomatic® meets uvex colorvision® technology: Lens tinting and contrast enhancement – in a single innovative uvex lens. Made for sporting activities in any weather and in any setting.

Curve 8
The curved frames offer a great fit for more safety and comfort: This allows the glasses to better fit the natural shape of the head and lie closer at the sides.

Decentred lenses
Distortions and curvatures in the field of vision can quickly become irritating. That's why uvex uses class 1 decentred lenses that allow distortion-free vision.

Direct lens ventilation
uvex climate management ensures permanent, draught-free ventilation. The field of vision remains fog-free for twice as long as the standard specifies.

UV blue
The UV blue lenses ensure high contrast and fatigue-free vision. 100% UV filtering up to and including 400 nm.

Replaceable lenses
uvex interchangeable lens technology guarantees ease of use and perfect visibility in many weather conditions.

Robust and scratch-resistant
Produced from extremely robust polycarbonate, the lenses can withstand temperatures down to -40°C, without compromising their mechanical strength.

A special coating to protect against damage according to standard EN ISO 12312-1:2013 + A1:2015 makes the lenses scratch-resistant without affecting visibility.

Soft nose pads and earpieces
Glasses fit perfectly when you don't know you're wearing them. Soft nose pads and soft earpieces ensure high comfort without pressure points.

The soft earpieces are malleable on all models. They ensure a perfect fit easily.

uvex inclination
The adjustable arm angle allows the glasses to be individually adjusted to the face, ensuring a perfect fit whatever the sports activity.

UV protection
UV absorbers integrated directly into the raw material filter UVA, UVB and UVC radiation harmful to the retina up to 400 nm.

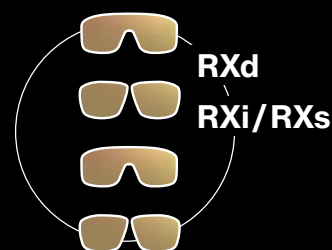

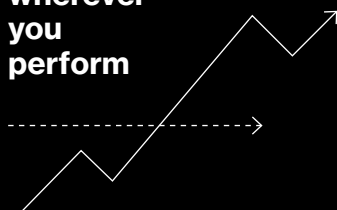

uvex i-performance

Performance system

uvex i-PERFORMANCE combines decades of experience with innovative technologies to protect the eyes and boost individual performance. Focus on your performance – we will take care of the rest.

wherever
you
perform

Protection

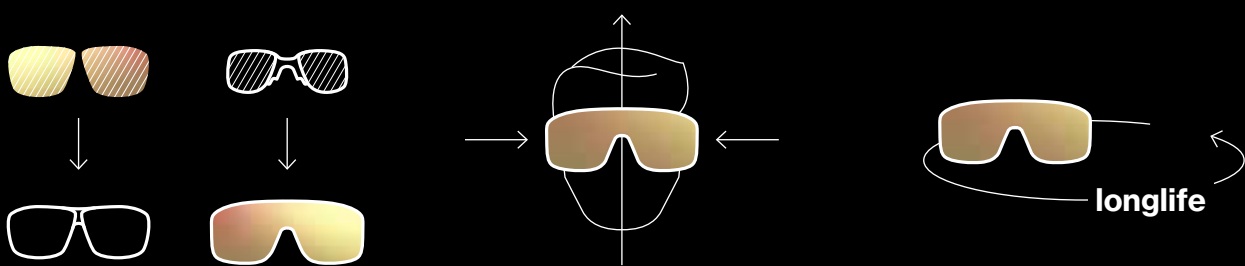

Protecting people is the mission of the uvex group. We have been protecting people in sports, leisure and at work since 1926 with our products. This commitment to protecting people also includes responsibility with respect to society and the environment. For decades we have been developing and producing products to protect users. We use the best materials, which we continuously test in our own laboratories to make sure that we exceed the required standards.

Performance

uvex sportstyle RX are prescription sports glasses designed for a wide range of activities. In nature or in urban areas, in bright or diffused light. For walking, cycling or playing ball sports. The versatility of features and filter options helps athletes sustain or even improve their performance as much as possible. For the highest level of comfort and quality of vision – without compromise. Wherever you perform.

Collection

The uvex sportstyle RX collection includes full-frame versions for direct prescription lenses (RXd) as well as rimless versions for indirect prescription lenses (RXi) with the innovative uvex clipnetic technology, and shield glasses (RXs). We rely on innovative, break-resistant materials. The frames are fitted with high-definition (HD) prescription lenses that feature state-of-the-art freeform technology. The polycarbonate lenses provide the highest level of protection for a wide range of sports.

Technology

Our innovative technologies, such as uvex clipnetic technology for adapting a corrective insert and unique uvex colorvision colour filters for a wide range of lighting conditions and vision requirements, perfectly support the wearer. All uvex sportstyle RX models use the uvex “anatomic” sports lenses to guarantee an optimal field of vision for prescription wearers. Collaborating with leading lens manufacturers, we are able to create top-quality products. For maximum safety, visibility and flexibility.

Custom fit

Perfect visibility and optimal protection thanks to a custom fit. Adjustable nose bridges, non-slip earpieces with metal inserts and adjustable inclination settings enable the frames to fit perfectly – from wide to narrow head shapes. HD lenses with modern free-form technology for prescription wearers ensure visibility perfectly matched to the needs of athletes. This means that each pair of glasses can be precisely matched to the individual wearer’s specification. Corrected. Protected. Perform!

Longlife products

Our custom products are characterised in particular by their longevity. Compared to standard products, they are used for a much longer time, saving us valuable resources and, calculated over the entire period of use, producing much less waste. With our uvex sportstyle RX planet glasses and the corresponding sustainability concept, we even go one step further.

uvex

uvex products protect people at work as well as in sport and leisure. As a partner of top-level international sport, uvex provides equipment to over 1000 elite athletes worldwide.

The transfer of knowledge between uvex safety and uvex sports makes our products even safer, more functional and more comfortable – both product divisions benefit mutually from the collaboration. This was perfectly demonstrated in the Challenge Roth event, the biggest long-distance triathlon competition in the world: uvex safety provided equipment to the construction team and uvex sports equipped the athletes – that's what you call successful team work.
