For reasons of better readability, the male form is used in the case of gendered language and key words in this catalogue. These terms should automatically imply equal treatment for all genders and corresponding terms apply in principle. The shortened language form is only for editorial reasons and does not imply any judgement.

## made 2 perform

In nature or in the city. During training or leisure time. Sharp vision is essential. This ensures safety, improves performance and enables you to achieve your best. uvex sportstyle RX prescription sports glasses are the ideal companion for whatever you have planned. Materials finished to a high quality, innovative technologies and state-of-the-art safety standards offer the best protection. And the excellent design ensures the perfect look. See more. Accomplish more. Safety while you perform.

STU  
INTERNATIONAL

# uvex sportstyle RX. Prescription sports glasses.

uvex sports glasses with individual prescription lenses enable you to see clearly right to the edge. Better vision means greater safety and enjoyment, enabling you to perform. The collection includes full-frame versions for direct prescription lenses (RXd/RXc) as well as rimless versions for indirect prescription lenses (RXi/RXs) with the innovative uvex clipnetic® technology. All lenses and frames are shatterproof for optimal protection.

#made2perform

# uvex sportstyle RX models. Direct prescription lenses (RXd/RXc). Indirect prescription lenses (RXi/RXs).

uvex sportstyle RX glasses are made exclusively from impact-resistant material and offer maximum protection for ambitious athletes. The collection comprises 12 models in different colour variations – 7 with direct prescription lenses (RXd/RXc) and 5 with indirect prescription lenses (RXi/RXs). On RXd models, standard, non-prescription sun protection lenses are replaced by your prescription lenses. On RXi/RXs models, by contrast, optical lenses are fitted into an insert and this is integrated into the glasses with uvex clipnetic® technology.

With indirect  
prescription lenses,  
e.g. RXs 4300

# R

1

Frames made from shatter-proof plastic. Wrap-around styles provide a wide field of vision, right up to the edge, and offer additional protection from draughts, dust and particles.

2

Impact-resistant polycarbonate lenses, fully coated. Available with single vision and varifocal lenses. Also mirrored, contrast-enhancing, polarising and self-tinting. 100% protection against harmful UV radiation up to 400 nm. For RXi/RXs and RXc, also with interchangeable lenses.

3

Adjustable non-slip sidearms and nose pads.

3

With direct  
prescription lenses,  
e.g. RXd 4001

## Material Bio-based plastic

uvex sportstyle RX frames are made of up to 45 percent bio-based polyamide. The uvex Group considers plant- and bio-based materials to be the future. That is why we are already using renewable raw materials today.

protecting planet

by using bio-based material

# uvex sportstyle RXs Shield. 100 % style. 100 % performance. Adaptable thanks to interchangeable lens technology.

Next-level technology and performance: The uvex sportstyle RXs 4302 offers an extra-wide field of vision, impressive protection and the proven clipnetic® system, which means glasses wearers can also benefit from indirect prescription lenses in shield glasses. The progressive oversize shield combines safety and convenience and is the perfect companion for when only the very best equipment will do. Thanks to the included interchangeable lens, the glasses can be used for many outdoor activities. The uvex sportstyle RXs 4302 offers safety, top performance and an extremely cool look.

**Lens ventilation:** Direct lens ventilation keeps the eyewear fog-free for longer to ensure clear vision.

**Clip:** The large optical clip is easy to use thanks to the uvex clipnetic® system and ensures optimal vision using your unique prescription.

**Click mechanism:** Have the lighting conditions changed? Thanks to the new click mechanism, you can change your lenses even faster and easier.

# uvex sportstyle RXc Conture Cut. Half-rim design for optimal wearer comfort.

RXc Conture Cut, the new type of uvex direct prescription glasses. The non-prescription sun protection lenses can be exchanged for lenses with your prescription. All the advantages of direct prescription lenses combined with the design and lightness of half-rim glasses.

Change of lens:  
Simple uvex inter-  
changeable lens  
technology for different  
lighting conditions.

Conture Cut: Direct  
prescription with a half rim.  
Unrestricted vision right to  
the edge.

Adjustable arm angle:  
Thanks to the adjustable  
sidearms, the glasses can  
be perfectly adjusted to  
the individual wearer.

# uvex sportstyle RXd

## Direct prescription lenses.

## For lovers of the outdoors

## who value protection, style

## and high performance.

Functionality meets style. These prescription glasses are the perfect companion for all terrains thanks to their removable side protection. They boast a classic design. An all-round pair of glasses that sets new standards.

Lens curve: The glasses are curve 6 to ensure a wide field of vision, style and perfect application of your prescription.

Tint: uvex polavision® offers reliable protection against interfering reflections. uvex variomatic® ensures that your glasses become tinted in a matter of seconds in changing light conditions.

Side protection: The easily removable side protection offers perfect protection and style. In the mountains, by the sea, wherever you go.

# Lens tech. Everything in view: on trails, on runs, outdoors and during leisure.

Lens technology is the brand DNA of uvex. Based on in-house engineering and in-house production. High-tech products, quality and perfect vision are guaranteed.

uvex colorvision®

uvex variomatic®

Note: The lenses are available with various glazing options. See marking.

## **uvex sportstyle RX: Prescription sports eyewear.**

- Sports glasses – individually adapted to the wearer's prescription
- High-definition (HD) prescription safety lenses with the latest Freeform technology
- Perfect vision right to the edge

## **uvex polavision®: glare-free and relaxed on the go.**

- Reduces distracting reflections
- Relaxes eyes and minimises glare

**uvex variomatic®:**  
**ultimate comfort.**

- Automatic, continuous self-tinting
- Three levels of protection in a single pair of glasses (cat. 1–3)
- From light to dark in a few seconds

**uvex colorvision®:**  
**wow-factor included.**

- Ultimate contrast enhancement
- Maximum colour recognition
- 100 % UVA, UVB and UVC protection up to 400 nm

# uvex colorvision®

## More contrast.

## More detail.

## See more.

uvex colorvision® lens technology is designed specifically for the visual requirements and light conditions of different surroundings and sports.

lens tech

### uvex colorvision® outdoor

Improved depth perception through the optimised contrast makes potholes, boulders or dangerous uneven ground more visible. High contrast – more detail.

Mountain biking // Climbing // Trail running

### uvex colorvision® daily

The daily colour filter makes your everyday life a whole new experience. Natural colours are rendered more clearly and shine with a new brilliance. Comfortable, stylish, trendy.

Running // Biking // Water sports

### **uvex colorvision® urban**

The urban colour filter helps to quickly identify traffic lights or Quickly detect brake lights to improve your reaction time. See better, react faster, ride safely.

E-Bike // Road bike // City running

### **uvex colorvision® nature**

The nature colour filter makes outdoor sport a new experience. Clear contours and the colour brilliance of nature in all its splendour are elevated. Sharp vision. Strong colours. More detail.

Golf // Hiking // Winter sports

### **uvex colorvision® variomatic®**

A perfect match: uvex variomatic® meets uvex colorvision® technology. Each lens comes with automatic lens tinting and optimal contrast enhancement to create the perfect visual experience.

# made 2 perform Summer and winter: perfect visibility for your sport.

See more. Accomplish more. Safety while you perform.  
When playing sport and when relaxing. The uvex sportstyle RX  
offers different frames and filters for your sporting activity.  
Optimal protection. 365 days a year.

your  
uvex  
sportstyle  
RX**

# uvex sportstyle RXd/RXc

## Direct prescription lenses

A highly curved frame offers a great fit and excellent protection from wind, dust and flying objects. For the glazing of the wrap-around style frames, we only use HD lenses made from extremely impact-resistant plastic materials and with the corresponding base curve. For an unrestricted field of view, the corrective value is calculated based on the curve of the lens in front of the eye. The lenses are then produced in line with the resulting, compensated values. We can also consider other parameters such as corneal vertex distance, the frame lens angle or your individual head and body position during sports when using direct prescription lenses.

# uvex sportstyle RXi/RXs

## Indirect prescription lenses

Thanks to the state-of-the-art uvex clipnetic® technology – with patent application pending – the magnetic prescription insert can be quickly and easily attached to the rimless uvex sportstyle RX frames. The correction insert can be mounted and dismantled with one hand, which makes cleaning the glasses and correction lenses particularly easy. The uvex RXi/RXs models are supplied with a nose bridge for changing the lenses. The glasses can be worn without a prescription or combined with contact lenses.

uvex sportstyle RXc 4200

## uvex sportstyle RXc 4200

Lightness, functionality and performance

The uvex RXc 4200 combines the benefits of direct glazing with the stylish design of half-rim glasses. Interchangeable lenses can be fitted quickly and provide optimal vision in different lighting conditions. Thanks to the angle-adjustable sidearms, the glasses can be adapted perfectly to the wearer.

- Shatterproof plastic frame
- uvex interchangeable lens technology
- Adjustable arm angle
- Adjustable, soft nose pads
- Adjustable and non-slip sidearms
- 100 % UVA, UVB and UVC protection up to 400 nm

### Interchangeable lenses optional

# uvex sportstyle RXd planet. Sustainable protection.

The uvex sportstyle RX planet line – engineered in Germany – is made of recycled materials from the airbag industry and with bio-based lenses (with 100 % UVA, UVB, UVC protection up to 400 nm). There are two frame models (uvex sportstyle RXd 4001/4003 planet) in the colour option black matt/ natural brown. Due to their classic shape with base curve 8, the shatterproof uvex plastic frames of the planet line offer a wide field of vision and high wearer comfort is guaranteed by the soft, adjustable nose pads and non-slip sidearms. In the interests of sustainability, no paint or polish has been applied to the frame. Each piece is unique and, what's more, the environment is protected.

## uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: Lens tinting and contrast enhancement – in a single innovative uvex lens. Made for sporting activities in any weather and in any setting.

## Replaceable lenses

uvex interchangeable lens technology guarantees ease of use and perfect visibility in many weather conditions.

## uvex inclination

The adjustable arm angle allows the glasses to be individually adjusted to the face, ensuring a perfect fit whatever the sports activity.

## Curve 8

The curved frames offer a great fit for increased safety and comfort. This allows the glasses to better fit the natural shape of the head and lie closer at the sides.

## Soft nose pads and arms

Glasses fit perfectly when you don't know you're wearing them. Soft nose pads and soft sidearms ensure high comfort without pressure points. The soft sidearms are malleable on all models. They ensure a perfect fit easily.

## UV protection

UV absorbers integrated directly into the raw material filter UVA, UVB and UVC radiation harmful to the retina up to 400 nm.

## Decentred lenses

Distortions and curvatures in the field of vision can quickly become irritating. That's why uvex uses class 1 decentred lenses that allow distortion-free vision.

## Robust and scratch-resistant

Produced from extremely robust polycarbonate, the lenses can withstand temperatures down to –40°C, without compromising their mechanical strength. A special coating to protect against damage according to standard EN ISO 12312-1:2022 makes the lenses scratch-resistant without affecting visibility.

## Direct lens ventilation

uvex climate management ensures permanent, draught-free ventilation. The field of vision remains fog-free for twice as long as the standard specifies.

# uvex i-performance. Performance system.

uvex i-performance combines decades of experience with innovative technologies to protect the eyes and boost individual performance. Focus on your performance – we will take care of the rest.

## Protection

Protecting people is the mission of the uvex group. We have been protecting people in sports, leisure and at work since 1926 with our products. This commitment to protecting people also includes responsibility with respect to society and the environment. We use the best materials, which we continuously test in our own laboratories to make sure that we exceed the required standards.

## Performance

uvex sportstyle RX are prescription sports glasses designed for a wide range activities. Out in the wild or amidst the urban jungle, in bright or diffuse light. Whether walking, cycling or playing ball. The versatility of features and filter options helps athletes sustain or even improve their performance as much as possible. These features deliver the highest level of comfort and quality of vision – without compromise. Wherever you perform.

## Collection

The uvex sportstyle RX collection includes full-frame versions with direct glazing (RXd) as well as rimless versions for indirect glazing (RXi) with uvex clipnetic® technology, and shield glasses (RXs). We rely on innovative, break-resistant materials. The frames are fitted with high-definition (HD) prescription lenses that feature state-of-the-art freeform technology. The polycarbonate lenses provide the highest level of protection for a wide range of sports.

## Technology

Our innovative technologies, such as uvex clipnetic® technology for adapting a correction insert and unique uvex colorvision® colour filters for a wide range of lighting conditions and vision requirements, perfectly support the wearer. All uvex sportstyle RX models use the uvex “anatomic” sports lenses to guarantee an optimal field of vision for prescription wearers. Thanks to lenses made by first-class manufacturers, our top-quality products ensure maximum safety, visual comfort and flexibility.

## Custom fit

Perfect visibility and optimal protection thanks to a custom fit. Adjustable nose bridges, non-slip sidearms with metal inserts and adjustable inclination settings enable the frames to fit perfectly – from wide to narrow head shapes. HD lenses with modern free-form technology for prescription wearers ensure visibility perfectly matched to the needs of athletes. Corrected. Protected. Perform.

## Durable products

Our custom products are characterised in particular by their longevity. Compared to standard products, they are used for a much longer time, saving us valuable resources and, calculated over the entire period of use, producing much less waste. With our uvex sportstyle RX planet glasses and the corresponding sustainability concept, we take this one step further by continuously growing our commitment to protecting people and the environment.

# uvex

uvex products protect people at work as well as in sport and leisure. As a partner of top-level international sport, uvex provides equipment to over 1000 elite athletes worldwide.

The transfer of expertise between uvex safety and uvex sports makes our products even safer, more functional and more comfortable. This idea that the two product lines strengthen one another was perfectly demonstrated at the Challenge Roth event, the biggest long-distance triathlon competition in the world: uvex safety provided equipment to the construction team and uvex sports equipped the athletes – that's what you call successful team work.
