For reasons of better readability, the male form is used in the case of gendered language and key words in this catalogue. These terms should automatically imply equal treatment for all genders and corresponding terms apply in principle. The shortened language form is only for editorial reasons and does not imply any judgement.

made 2 perform

uvex sportstyle RXs 4303

uvex

protecting people since 1926

Professional or recreational. Competition or fun. As one of the leading international manufacturers of protective products with headquarters in Fuerth, we at uvex inspire our customers every day with groundbreaking technologies and innovative products. 24/7 – since 1926. To achieve the best, whether in leisure, sports or work. To protect people.

uvex sportstyle RX. Prescription sports glasses.

uvex sports glasses with individual prescription lenses enable you to see clearly right to the edge. Better vision means greater safety and enjoyment, enabling you to perform. The collection includes full-frame versions for direct prescription lenses (RXd/RXc) as well as rimless versions for indirect prescription lenses (RXi/RXs) with the innovative uvex clipnetic® technology. All lenses and frames are shatterproof for optimal protection.

#made2perform

“With my eyesight, I have to be able to count on my optical sports glasses at all times. The uvex RX series’ large field of vision and their secure fit even on rough terrain really boost my confidence.”

Herrmann Meyer, GER, MTB

Optical values:

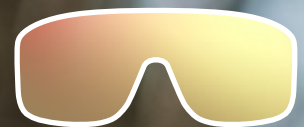

R: +3.00 -2.00 30°

L: +4.00 -2.00 145°

uvex sportstyle RXs 4301

Indirect prescription lenses: The rimless uvex sportstyle RXs 4303 with uvex clipnetic and interchangeable lens technology.

uvex clipnetic technology makes it quick and easy to attach the right prescription insert for your needs to your frameless uvex sportstyle RX. Each RXi/RXs model comes with a nose bridge, allowing the glasses to be worn without a prescription or combined with contact lenses.

Replacement lens included to optimise usage during numerous outdoor activities in changing light conditions.

Rimless frame for a light-weight and minimalist design.

The included clip allows the glasses to be glazed indirectly in your prescription.

Direct prescription lenses: uvex sportstyle RXd 4009 with integrated side guard and 100% style.

The curved frames offer optimum protection against flying particles and air turbulence. For an unrestricted field of vision, we only use HD lenses, meaning that individual variables such as your corneal vertex distance, frame lens angle or natural head and body position are taken into account.

Lens curve: The glasses are curve 6 to ensure a wide field of vision, style and optimal application of your prescription.

Tinting: uvex colorvision® (RXd 4008) adds a pop of colour and makes colours appear more vivid.

The side guard integrated into the middle part of the 'design looks stylish and offers perfect protection against glare, no matter whether you're out running or busy in the city.

uvex sportstyle RXd 4008

NEW

Specials

Ultimate protection, ultimate contrast

RXd 4008: lifestyle, protection, performance. Easy to add your prescription. Integrated side guard with ventilation. Adjustable thanks to nose piece and sidearms. Their design makes them ideal for a multitude of sports.

- Shatterproof plastic frame
- uvex colorvision® lens technology
- Direct lens ventilation
- Integrated side guard
- Adjustable, soft nose pads and non-slip sidearms
- 100% UVA, UVB and UVC protection up to 400 nm

Lens tech. Everything in view: on trails, on runs, outdoors and during leisure.

Lens technology is the brand DNA of uvex. Based on in-house engineering and in-house production. High-tech products, quality and perfect vision are guaranteed.

uvex colorvision®

uvex variomatic®

Note: The lenses are available with various glazing options. See marking.

uvex sportstyle RX: Prescription sports eyewear.

- Sports glasses – individually adapted to the wearer's prescription
- High-definition (HD) prescription safety lenses with the latest Freeform technology
- Perfect vision right to the edge

uvex polavision®: glare-free and relaxed on the go.

- Reduces distracting reflections
- Relaxes eyes and minimises glare
- For more detail even in low light conditions

The background features a scenic mountain landscape with a lens-shaped overlay. The lens is divided into two sections: the left section shows a mountain peak under a clear blue sky, while the right section shows a mountain range under a sunset sky with orange and yellow hues. The lens overlay is semi-transparent, allowing the background image to be seen through it.

V

uvex variomatic®:
ultimate comfort.

- Seamless contrast: photochromic lens automatically adjusts to light conditions
- Fast adaptation: tint goes from light to dark in seconds
- Flexible protection: protection level 1 to 3 depending on the light conditions

CV

uvex colorvision®:
wow-factor included.

- Ultimate contrast enhancement
- Maximum colour recognition
- 100 % UVA, UVB and UVC protection up to 400 nm

uvex colorvision® More contrast. More detail. See more.

uvex colorvision® lens technology is designed specifically for the visual requirements and light conditions of different surroundings and sports.

uvex colorvision®

lens tech

uvex colorvision® outdoor

Improved depth perception through the optimised contrast makes potholes, boulders or dangerous uneven ground more visible. High contrast – more detail.

Mountain biking // Climbing //
Trail running

uvex colorvision® daily

The daily colour filter makes your everyday life a whole new experience. Natural colours are rendered more clearly and shine with a new brilliance. Comfortable, stylish, trendy.

Running // Biking // Water sports

uvex colorvision® urban

The urban colour filter helps to quickly identify traffic lights or Quickly detect brake lights to improve your reaction time. See better, react faster, ride safely.

E-Bike // Road bike // City running

uvex colorvision® nature

The nature colour filter makes outdoor sport a new experience. Clear contours and the colour brilliance of nature in all its splendour are elevated. Sharp vision. Strong colours. More detail.

Golf // Hiking // Winter sports

uvex colorvision® variomatic®

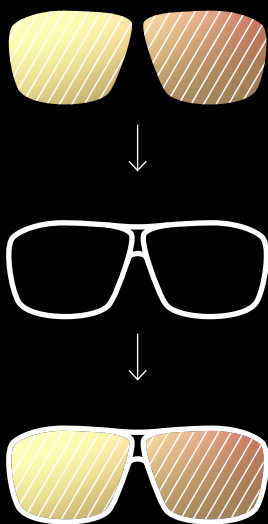

A perfect match: uvex variomatic® meets uvex colorvision® technology. Each lens comes with automatic lens tinting and optimal contrast enhancement to create the perfect visual experience.

uvex sportstyle RX models. Direct prescription lenses (RXd/RXc). Indirect prescription lenses (RXi/RXs).

uvex sportstyle RX glasses are made exclusively from impact-resistant material and offer maximum protection for ambitious athletes. The collection comprises 12 models in different colour variations – 7 with direct prescription lenses (RXd/RXc) and 12 with indirect prescription lenses (RXi/RXs). On RXd models, standard, non-prescription sun protection lenses are replaced by your prescription lenses. On RXi/RXs models, by contrast, optical lenses are fitted into an insert and this is integrated into the glasses with uvex clipnetic® technology.

Direct prescription lenses, e.g. RXd 4001

The curved frames offer optimum protection against flying particles and air turbulence. For an unrestricted field of vision, we only use HD lenses, meaning that individual variables such as your corneal vertex distance, frame lens angle or natural head and body position are taken into account.

1

Frames made from shatter-proof plastic. Wrap-around styles provide a wide field of vision, right up to the edge, and offer additional protection from draughts, dust and particles.

2

Impact-resistant polycarbonate lenses, fully coated. Available with single vision and varifocal lenses. Also mirrored, contrast-enhancing, polarising and self-tinting. 100% protection against harmful UV radiation up to 400 nm. For RXi/RXs and RXc, also with interchangeable lenses.

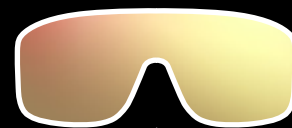

3

Adjustable non-slip sidearms and nose pads.

X

With direct prescription lenses, e.g. RXs 4300

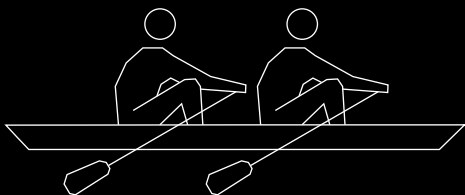

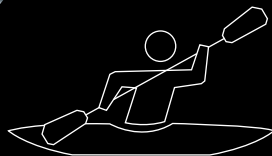

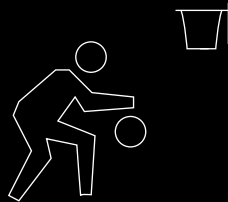

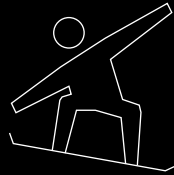

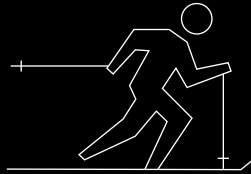

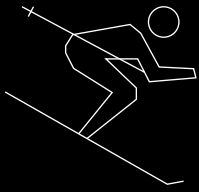

uvex clipnetic technology makes it quick and easy to attach the right prescription insert for your needs to your frameless uvex sportstyle RX. Each RXi/RXs model comes with a nose bridge, allowing the glasses to be worn without a prescription or combined with contact lenses.

made 2 perform Summer and winter: perfect visibility for your sport.

See more. Accomplish more. Safety while you perform.

uvex

protecting planet

Every solution starts with the responsibility to protect not only people but also the environment. protecting planet is our promise to people and the environment – and the label for our most sustainable products.

To help us meet our sustainability targets, we asked ourselves how the uvex group can protect people and nature most effectively and what measures are needed to do this. We used a materiality analysis to ascertain the four most relevant focus areas and consequently define how we (will) live and breathe sustainability at the uvex group both now and in the future.

Environmental transformation

We will make savings in terms of CO₂ emissions, waste and water in order to expand our climate targets.

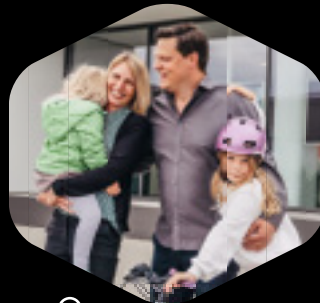

42% less CO₂ by 2030, significantly lower water consumption, waste and scrap. The uvex group has set itself ambitious targets and will be climate neutral by 2045

Innovation driver in the circular economy

We process materials in order to use them again and again.

The uvex group has set itself the target of keeping materials such as plastics, metals and textiles in circulation for as long as possible. We will do this through resource efficiency, durability and recyclability, using recycled and bio-based materials coupled with innovative, recyclable product solutions

Social responsibility

Those who take responsibility can inspire others to do the same.

This is why the uvex group is continuously expanding its social commitment with employee training, fair working conditions, eco-friendly and socially responsible supplier management, and programmes for children and young people, who can expect a better future thanks to the Rainer Winter Foundation.

Environmental and health considerations

Less pollutants thanks to stricter controls.

The uvex group is striving to reduce pollutants as much as possible through systematic global supplier controls, increased production in Germany and environmental impact assessments as early as the product development phase. Our standards are stricter than those required by law. We call that "safety made in uvex".

uvex sportstyle RXd planet. Sustainable protection.

The uvex sportstyle RX planet line – engineered in Germany – is made of recycled materials from the airbag industry and with bio-based lenses (with 100% UVA, UVB, UVC protection up to 400 nm). There are two frame models (uvex sportstyle RXd 4001/4003 planet) in the colour option black matt/natural brown. Due to their classic shape with base curve 8, the shatterproof uvex plastic frames of the planet line offer a wide field of vision and high wearer comfort is guaranteed by the soft, adjustable nose pads and non-slip sidearms. In the interests of sustainability, no paint or polish has been applied to the frame. Each piece is unique and, what's more, the environment is protected.

protecting planet

by using environmentally-
friendly packaging

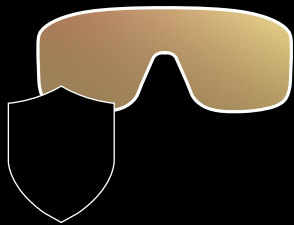

protecting planet

by using recycled material //
by using bio-based material

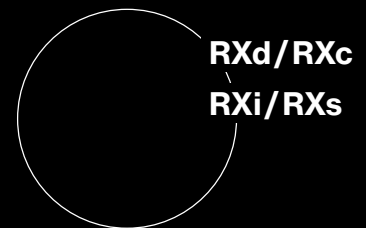

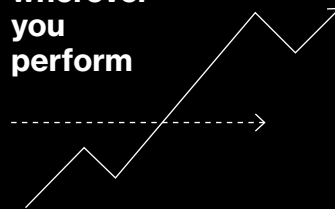

uvex i-performance. Performance system.

uvex i-performance combines decades of experience with innovative technologies to protect the eyes and boost individual performance. Focus on your performance – we will take care of the rest.

wherever
you
perform

Protection

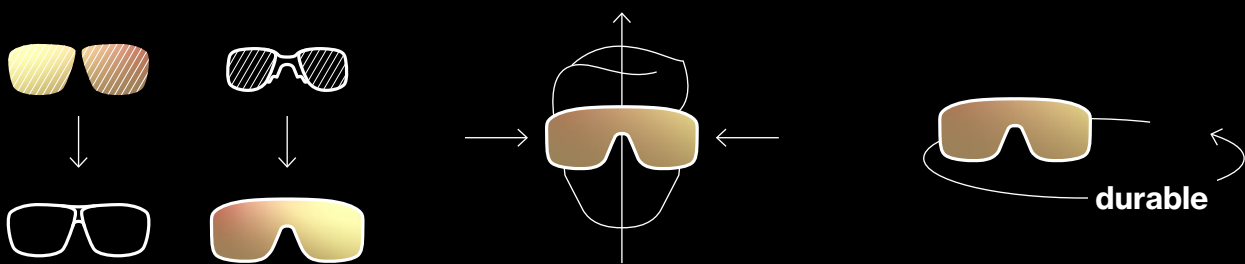

Protecting people is the mission of the uvex group. We have been protecting people in sports, leisure and at work since 1926 with our products. This commitment to protecting people also includes responsibility with respect to society and the environment. We use the best materials, which we continuously test in our own laboratories to make sure that we exceed the required standards.

Performance

uvex sportstyle RX are prescription sports glasses designed for a wide range of activities. Out in the wild or amidst the urban jungle, in bright or diffuse light. Whether walking, cycling or playing ball. The versatility of features and filter options helps athletes sustain or even improve their performance as much as possible. These features deliver the highest level of comfort and quality of vision – without compromise. Wherever you perform.

Collection

The uvex sportstyle RX collection includes full-frame versions with direct glazing (RXd) as well as rimless versions for indirect glazing (RXi) with uvex clipnetic® technology, and shield glasses (RXs). We rely on innovative, break-resistant materials. The frames are fitted with high-definition (HD) prescription lenses that feature state-of-the-art freeform technology. The polycarbonate lenses provide the highest level of protection for a wide range of sports.

Technology

Our innovative technologies, such as uvex clipnetic® technology for adapting a correction insert and unique uvex colorvision® colour filters for a wide range of lighting conditions and vision requirements, perfectly support the wearer. All uvex sportstyle RX models use the uvex “anatomic” sports lenses to guarantee an optimal field of vision for prescription wearers. Thanks to lenses made by first-class manufacturers, our top-quality products ensure maximum safety, visual comfort and flexibility.

Custom fit

Perfect visibility and optimal protection thanks to a custom fit. Adjustable nose bridges, non-slip sidearms with metal inserts and adjustable inclination settings enable the frames to fit perfectly – from wide to narrow head shapes. HD lenses with modern free-form technology for prescription wearers ensure visibility perfectly matched to the needs of athletes. Corrected. Protected. Perform.

Durable products

Our custom products are characterised in particular by their longevity. Compared to standard products, they are used for a much longer time, saving us valuable resources and, calculated over the entire period of use, producing much less waste. With our uvex sportstyle RX planet glasses and the corresponding sustainability concept, we take this one step further by continuously growing our commitment to protecting people and the environment.

uvex colorvision® variomatic®
uvex variomatic® meets uvex colorvision® technology: Lens tinting and contrast enhancement – in a single innovative uvex lens. Made for sporting activities in any weather and in any setting.

Replaceable lenses
uvex interchangeable lens technology guarantees ease of use and perfect visibility in many weather conditions.

Curve 8
The curved frames offer a great fit for increased safety and comfort. This allows the glasses to better fit the natural shape of the head and lie closer at the sides.

Soft nose pads and arms
Glasses fit perfectly when you don't know you're wearing them. Soft nose pads and soft sidearms ensure high comfort without pressure points. The soft sidearms are malleable on all models. They ensure a perfect fit easily.

Decentred lenses
Distortions and curvatures in the field of vision can quickly become irritating. That's why uvex uses class 1 decentred lenses that allow distortion-free vision.

Robust and scratch-resistant
Produced from extremely robust polycarbonate, the lenses can withstand temperatures down to –40°C, without compromising their mechanical strength. A special coating to protect against damage according to standard EN ISO 12312-1:2022 makes the lenses scratch-resistant without affecting visibility.

Direct lens ventilation
uvex climate management ensures permanent, draught-free ventilation. The field of vision remains fog-free for twice as long as the standard specifies.

uvex inclination
The adjustable arm angle allows the glasses to be individually adjusted to the face, ensuring a perfect fit whatever the sports activity.

UV protection
UV absorbers integrated directly into the raw material filter UVA, UVB and UVC radiation harmful to the retina up to 400 nm.
