For reasons of better readability, the male form is used in the case of gendered language and key words in this catalogue. These terms should automatically imply equal treatment for all genders and corresponding terms apply in principle. The shortened language form is only for editorial reasons and does not imply any judgement.

# made2perform

**uvex is performance.**

made2perform is our pledge to design and manufacture products that deliver exceptional performance without compromising on safety, comfort, quality or sustainability.

# protecting people since 1926

**Professional or recreational. Competition or fun.  
As one of the leading international manufacturers  
of protective products with headquarters in Fuerth,  
we at uvex inspire our customers every day with  
groundbreaking technologies and innovative products.  
24/7 – since 1926. To achieve the best, whether  
in leisure, sports or work. To protect people.**

# uvex sportstyle RX. prescription sports glasses.

uvex sports glasses with individual prescription lenses enable you to see clearly right to the edge. Better vision means greater safety and enjoyment, enabling you to perform. The collection includes full-frame versions for direct prescription lenses (RXd/RXc) as well as rimless versions for indirect prescription lenses (RXi/RXs) with the innovative uvex clipnetic® technology. All lenses and frames are shatterproof for optimal protection.

#made2perform

**“With my eyesight, I have to be able to count on my optical sports glasses at all times. The uvex RX series’ large field of vision and their secure fit even on rough terrain really boost my confidence.”**

Herrmann Meyer, GER, MTB

Optical values:

R: +3.00 -2.00 30°

L: +4.00 -2.00 145°

# uvex sportstyle RX models.

uvex sportstyle RX glasses are made exclusively from impactresistant material and offer maximum protection for ambitious athletes. On RXd models, standard, non-prescription sun protection lenses are replaced by your prescription lenses.

On RXi / RXs models, by contrast, optical lenses are fitted into an insert and this is integrated into the glasses with uvex clipnetic® technology.

Indirect prescription  
(RXi/RXs).

Direct prescription  
(RXd/RXc).

1

Frames made from shatter-proof plastic. Wrap-around styles provide a wide field of vision, right up to the edge, and offer additional protection from draughts, dust and particles.

2

Impact-resistant polycarbonate lenses, fully coated. Available with single vision and varifocal lenses. Also mirrored, contrast-enhancing, polarising and self-tinting. 100% protection against harmful UV radiation up to 400 nm. For RXi / RXs and RXc, also with interchangeable lenses.

3

Adjustable non-slip sidearms and nose pads.

# indirect prescription lenses: the rimless uvex sportstyle RXs 4303 with uvex clipnetic and interchangeable lens technology.

uvex clipnetic technology makes it quick and easy to attach the right prescription insert for your needs to your frameless uvex sportstyle RX. Each RXi/RXs model comes with a nose bridge, allowing the glasses to be worn without a prescription or combined with contact lenses.

red**dot** winner 2025

Replacement lens included to optimise usage during numerous outdoor activities in changing light conditions.

Rimless frame for a light-weight and minimalist design.

The included clip allows the glasses to be glazed indirectly in your prescription.

# direct prescription lenses: uvex sportstyle RXd 4009 with integrated side guard and 100% style.

The curved frames offer optimum protection against flying particles and air turbulence. For an unrestricted field of vision, we only use HD lenses, meaning that individual variables such as your corneal vertex distance, frame lens angle or natural head and body position are taken into account.

**Lens curve:** The glasses are curve 6 to ensure a wide field of vision, style and optimal application of your prescription.

**Tinting:** uvex colorvision® (RXd 4008) adds a pop of colour and makes colours appear more vivid.

The side guard integrated into the middle part of the 'design looks stylish and offers perfect protection against glare, no matter whether you're out running or busy in the city.

#### uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: Lens tinting and contrast enhancement – in a single innovative uvex lens. Made for sporting activities in any weather and in any setting.

#### Curve 8

The curved frames offer a great fit for increased safety and comfort. This allows the glasses to better fit the natural shape of the head and lie closer at the sides.

#### Decentred lenses

Distortions and curvatures in the field of vision can quickly become irritating. That's why uvex uses class 1 decentred lenses that allow distortion-free vision.

#### Direct lens ventilation

uvex climate management ensures permanent, draught-free ventilation. The field of vision remains fog-free for twice as long as the standard specifies.

#### Replaceable lenses

uvex interchangeable lens technology guarantees ease of use and perfect visibility in many weather conditions.

#### Soft nose pads and arms

Glasses fit perfectly when you don't know you're wearing them. Soft nose pads and soft sidearms ensure high comfort without pressure points. The soft sidearms are malleable on all models. They ensure a perfect fit easily.

#### Robust and scratch-resistant

Produced from extremely robust polycarbonate, the lenses can withstand temperatures down to –40°C, without compromising their mechanical strength. A special coating to protect against damage according to standard EN ISO 12312-1:2022 makes the lenses scratch-resistant without affecting visibility.

#### uvex inclination

The adjustable arm angle allows the glasses to be individually adjusted to the face, ensuring a perfect fit whatever the sports activity.

#### UV protection

UV absorbers integrated directly into the raw material filter UVA, UVB and UVC radiation harmful to the retina up to 400 nm.

# lens tech. everything in view: on trails, on runs, outdoors and during leisure.

Lens technology is the brand DNA of uvex. Based on in-house engineering and in-house production. High-tech products, quality and perfect vision are guaranteed.

## **uvex sportstyle RX:** **Prescription sports eyewear.**

- Sports glasses – individually adapted to the wearer's prescription

you  
perform

## Protection

Protecting people is the mission of the uvex group. We have been protecting people in sports, leisure and at work since 1926 with our products. This commitment to protecting people also includes responsibility with respect to society and the environment. We use the best materials, which we continuously test in our own laboratories to make sure that we exceed the required standards.

## Performance

uvex sportstyle RX are prescription sports glasses designed for a wide range activities. Out in the wild or amidst the urban jungle, in bright or diffuse light. Whether walking, cycling or playing ball. The versatility of features and filter options helps athletes sustain or even improve their performance as much as possible. These features deliver the highest level of comfort and quality of vision – without compromise. Wherever you perform.

## Collection

The uvex sportstyle RX collection includes full-frame versions with direct glazing (RXd) as well as rimless versions for indirect glazing (RXi) with uvex clipnetic® technology, and shield glasses (RXs). We rely on innovative, break-resistant materials. The frames are fitted with high-definition (HD) prescription lenses that feature state-of-the-art freeform technology. The polycarbonate lenses provide the highest level of protection for a wide range of sports.

## Technology

Our innovative technologies, such as uvex clipnetic® technology for adapting a correction insert and unique uvex colorvision® colour filters for a wide range of lighting conditions and vision requirements, perfectly support the wearer. All uvex sportstyle RX models use the uvex “anatomic” sports lenses to guarantee an optimal field of vision for prescription wearers. Thanks to lenses made by first-class manufacturers, our top-quality products ensure maximum safety, visual comfort and flexibility.

## Custom fit

Perfect visibility and optimal protection thanks to a custom fit. Adjustable nose bridges, non-slip sidearms with metal inserts and adjustable inclination settings enable the frames to fit perfectly – from wide to narrow head shapes. HD lenses with modern free-form technology for prescription wearers ensure visibility perfectly matched to the needs of athletes. Corrected. Protected. Perform.

## Durable products

Our custom products are characterised in particular by their longevity. Compared to standard products, they are used for a much longer time, saving us valuable resources and, calculated over the entire period of use, producing much less waste. With our uvex sportstyle RX planet glasses and the corresponding sustainability concept, we take this one step further by continuously growing our commitment to protecting people and the environment.
