# protecting people

**This is the mission of the uvex brand. It is our sole purpose and our responsibility.**

uvex protects people – during work, sports, and leisure. With innovative products, we set standards year after year and continually implement revolutionary new technologies. uvex partners with top-class international sport, equipping more than 1,000 elite athletes worldwide. Like personal protective equipment in the workplace, the products designed for sports use have to meet the highest demands in terms of safety, functionality, and comfort. Based on decades of experience, we recognize the value of knowledge transfer between the occupational safety and sports sectors. In this way, we promote the continuous development of our products, creating innovations and solutions with advanced technologies that deliver reliable protection in every situation: at the factory, on the ski slope, or on the mountain bike trail.

uvex safety and uvex sports are leading providers in their respective disciplines – and form an unbeatable team with a clear, common goal: the winners' podium.

# wherever your vision counts

uvex sportstyle RX frames are equipped with high definition (HD) prescription lenses with the latest freeform technology. The lenses are made of polycarbonate or Trivex to guarantee the best possible protection for a wide variety of sports. The collection includes full-rim frames with direct glazing and rimless frames for indirect glazing with the innovative uvex clipnetic technology. Advanced eye protection for every face shape – from narrow to wide. For maximum safety, visual comfort, and superior flexibility.

uvex colorvision®

# uvex colorvision®

Riding roots on the singletrack or exploring the urban jungle. E-scooter or road bike. Brake lights or sunset. The uvex colorvision® lens technology delivers the visual performance required for different light conditions, different environments, and different sports.

The three uvex colorvision® filters – urban, daily, and outdoor – ensure optimum contrast enhancement and color perception. For improved detail detection and better awareness of uneven terrain. For town, trail, and everyday use.

## uvex colorvision® technology

colorvision®  
urban

colorvision®  
daily

colorvision®  
outdoor

- Ultimate contrast enhancement
- Maximum color perception
- 100 % UVA, UVB & UVC protection

uvex colorvision®

## uvex sportstyle RXi 4103 CV V

Forest trail, running track, or ski slope. The uvex sportstyle RXi 4103 CV V is the perfect companion for all sports. The large, mirrored lenses provide an increased field of vision, protect against UVA, UVB, and UVC rays, and reduce sun glare. Individual adjustment options ensure perfect adaptability to suit the wearer's specific requirements.

### uvex colorvision®

The innovative uvex colorvision® lens technology provides ultimate contrast enhancement and maximum color perception on every trail.

### uvex variomatic®

For automatic lens tinting from filter category 1 to 3: from light to dark in 25 seconds.

### uvex inclination

The side arm inclination can be precision-adjusted to ensure a perfect fit.

## uvex sportstyle RXi 4103 CV V

The uvex sportstyle RXi 4103 CV V combines the uvex colorvision® technology with the fully automatic self-tinting of the uvex variomatic® lenses. The half-rim design ensures increased field of vision. Thanks to the uvex clipnetic technology, the nose bridge can be quickly and easily removed to allow a prescription lens to be fitted.

- Adjustable, non-slip arm tips
- 100% UVA, UVB, UVC protection up to 400 nm
- Interchangeable lenses

## uvex sportstyle RXi 4101 CV V

The modern, frameless design of the uvex sportstyle RXi 4101 CV V ensures the best all-round visibility. Thanks to the uvex clipnetic technology, the glasses can also be worn with a prescription lens or contact lenses. The combination of uvex colorvision® and uvex variomatic® technology ensures enhanced color brilliance and more defined contrast in all lighting conditions.

- 100% UVA, UVB, UVC protection up to 400 nm

direct glazing

## uvex sportstyle RXd

The highly curved frame design gives a good fit and provides optimal protection against wind and airborne particles. For the glazing of the wrap-around style frames, we use HD lenses made from extremely impact-resistant plastic materials and with the corresponding base curve. To ensure an unrestricted field of vision, the angle of inclination in front of the eye is also taken into account when calculating the prescription data. The lenses are then custom made with the resultant compensatory values. Further individual parameters such as vertex distance, pantoscopic tilt and head/body position during sporting activity may be taken and directly incorporated into the lens.

**Please ensure all relevant measurements are provided when ordering.**

direct glazing

## uvex sportstyle RXd 4003

Uncompromising protection, sharp vision right to the edge, and a cool style – the uvex sportstyle RXd 4003 combines everything that sports glasses need. Due to the advanced customization options, these glasses provide a perfect fit for all sports, while the black gloss/pink color combination also gives a modern, feminine look. The combination of the red mirror lenses, made of break-resistant polycarbonate, and the lightweight, adaptable comfort frame in black/pink is the ultimate in sport chic.

**Wrap-around style**  
The 8-base frame curve adapts to the wearer's head shape and provides perfect protection against airborne particles and wind.

**Direct glazing**  
The glazing uses the latest freeform technology to ensure sharp and comfortable vision in all areas of view.

**Comfort**  
The non-slip, flexible nose pads guarantee a perfect fit at all times.

## uvex sportstyle RXd 4000

The robust uvex sportstyle RXd 4000 with a 6-base curve design is also suitable for higher diopter values. It gives the wearer reliable protection during all activities. The soft nose pads and arm tips ensure uncompromising comfort.

indirect glazing

## uvex sportstyle RXi

The revolutionary clipnetic technology (patent pending) allows fast and easy magnetic fitting of prescription lenses into the uvex sportstyle RX frames. The prescription lens can be fitted and removed with just one hand, which makes cleaning the glasses and the prescription lenses easy. The uvex RXi models come with a removable nose bridge. This allows the glasses to be used with prescription lenses or contact lenses.

indirect glazing

## uvex sportstyle RXi 4102

A clear view, whatever the weather. With the interchangeable lens technology, the uvex sportstyle RXi 4102 is equipped for all weather conditions. It offers 100 % UVA, UVB, and UVC protection as well as optimal sun glare protection. The nose bridge can be quickly and easily removed to accommodate the prescription lens. And the direct lens ventilation ensures prolonged anti-fog performance.

### Replacement lenses

Thanks to the innovative interchangeable lens technology, the dark lenses in filter category 3 can easily be exchanged for bright, contrast-enhancing lenses in filter category 1.

### uvex clipnetic technology

The revolutionary, patent-pending uvex clipnetic technology allows quick and easy removal of the nose bridge to accommodate a prescription lens.

### Secure fit

The soft, non-slip arm tips are easily customizable and ensure optimum grip, wherever you ride or run.

## uvex sportstyle RXi 4100

The half-rim frame of the sporty uvex sportstyle RXi 4100 provides a wide field of vision and is individually adjustable with its soft, customizable nose pads and arm tips. Thanks to the innovative interchangeable lenses, contrast-enhancing lenses can be quickly fitted to cope with different lighting conditions. The uvex clipnetic technology allows the nose bridge to be easily removed to accommodate a prescription lens.

### Features

### Protection

“Protecting people” is our mission. We develop and produce products that protect the user – during work, sports, and leisure. We use only the best materials, which are continuously tested in our own laboratories to ensure they exceed the required standards.

### Technology

Innovative technologies, such as the patent-pending uvex clipnetic technology, which allows a prescription lens to be fitted, and the uvex “anatomic” sports glazing, are used on all uvex sportstyle RX models. For maximum comfort and quality of vision – without compromise!

### Individual fit

uvex has been developing and producing eyewear for different head shapes and uses for 90 years. The fit of the frame can be altered with the adjustable nose pieces, sprung metal hinges, and non-slip arm tips. The use of HD prescription lenses makes the uvex sportstyle RX an individually unique product for the wearer.

### Performance

With our “anatomic” sports glazing, we take into account a variety of parameters as well as the individual posture adopted during specific sports. It is this attention to detail that helps the athlete to sustain or even increase their performance. True to the motto “focus on your performance”, the wearer can fully concentrate on their sport – we’ll do the rest.

### Quality

The promise of quality is one of our core values. For the uvex sportstyle RX collection, only high-quality materials are used. These materials have proven themselves time and time again through their use in our prescription safety glasses. We vouch for this with our name: highly visible on every frame, discreet and inconspicuous on every lens.

### Competence

uvex has accumulated over 90 years of development expertise for frames and lenses. In our development centers, our opticians work hand in hand with our designers on state-of-the-art CAD systems to make ideas become reality. Collaboration with first-class lens manufacturers results in high-end products.

uvex i-performance

# performance system

uvex i-PERFORMANCE combines decades of experience with innovative technologies to provide advanced eye protection and promote increased individual performance. Focus on your performance – we’ll take care of the rest.

## tech summary

### uvex colorvision®

The three innovative colorvision® color filters of the uvex lenses provide unique contrast enhancement and perfect vision – with a lens for every situation.

- Ultimate contrast enhancement
- Maximized color perception
- 100% UVA, UVB, UVC protection up to 400 nm

uvex colorvision® urban color filter    uvex colorvision® outdoor color filter    uvex colorvision® daily color filter

### uvex variomatic®

Eyewear with uvex variomatic® automatically reacts to the natural light conditions. They achieve a tint of 20-92% (cat. 1-3).

- Automatic self-tinting
- 100% UVA, UVB, UVC protection up to 400 nm
- From light to dark in 25 seconds
- Three filter categories in one lens (cat. 1-3)

Automatic tinting

### uvex polavision®

Reliable protection against sun glare and reflections. Lenses with uvex polavision® absorb diffuse light and thus protect against eye strain.

- Polarizing lenses for reduced reflection
- Reduction of diffuse light and sun glare
- For a comfortable viewing experience

Reduced reflection

### Constant tinting

The lenses provide reliable protection against sun glare. The color and intensity of the tint can be chosen according to personal preference.

Choice of lens tints

## tech summary

### Lens types

Light conditions	Weak light	Moderately sunny // sunny	Sunny
filter category	cat. 1	cat. 2	cat. 3

mirror // litemirror	litemirror orange (cat. 1)		silver (cat. 3) blue (cat. 3) green (cat. 3) red (cat. 3)
basic			grey (cat. 3) green (cat. 3) brown (cat. 3)

### uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: lens tinting and contrast enhancement in one innovative uvex lens. Made for sports activities in any weather and any environment.

### Easy to clean

The special coating on the surface of the lens means moisture or fingerprints can be easily removed.

### Soft nose pads and arm tips

You know your eyewear fits perfectly when you can't feel you're wearing it. Soft nose pads and arm tips ensure pressure-free comfort.

### Curve 8

The curved design conforms to the natural shape of the head and fits more snugly at the sides for improved comfort and security.

### Interchangeable lenses

The interchangeable lenses guarantee uncomplicated handling and perfect visibility in all weather conditions.

### uvex inclination

The soft arm tips are cold-formable on all models. So it's easy to achieve the perfect fit.

### Decentered lenses

Distortions and curvatures in the field of vision can quickly become annoying. uvex uses grade 1 decentered lenses to ensure a distortion-free view.

### Robust and scratch-resistant

Made of extremely durable polycarbonate, the lenses can withstand temperatures of -40° C without compromising their breaking strength. A special, protective coating in

### Direct lens ventilation

The uvex climate management system delivers permanent, draft-free ventilation. It also ensures that the field of vision remains fog-free for twice as long as the norm requires.

conformance with the EN ISO 12312-1: 2013 + A1: 2015 (D) standard makes the lenses scratch-resistant without causing any vision impairment.

### UV protection

UV absorbers integrated directly into the raw material filter harmful UVA, UVB, and UVC radiation up to 400 nm to protect the retina.

one  
brand.  
mission.  
one  
vision.

uvex products protect people – during work, sports, and leisure. uvex partners with top-class international sport, equipping more than 1,000 elite athletes worldwide.

The know-how transfer between uvex safety and uvex sports makes our products even safer, more functional, and more comfortable. The two product divisions benefit from this mutual cooperation. This was also highlighted in the Challenge Roth, the world's largest long-distance triathlon competition, when uvex safety equipped the construction team and uvex sports equipped the athletes. A brilliant example of successful teamwork!
